

RE_CONSIDERED

TURNING WASTE INTO WONDER

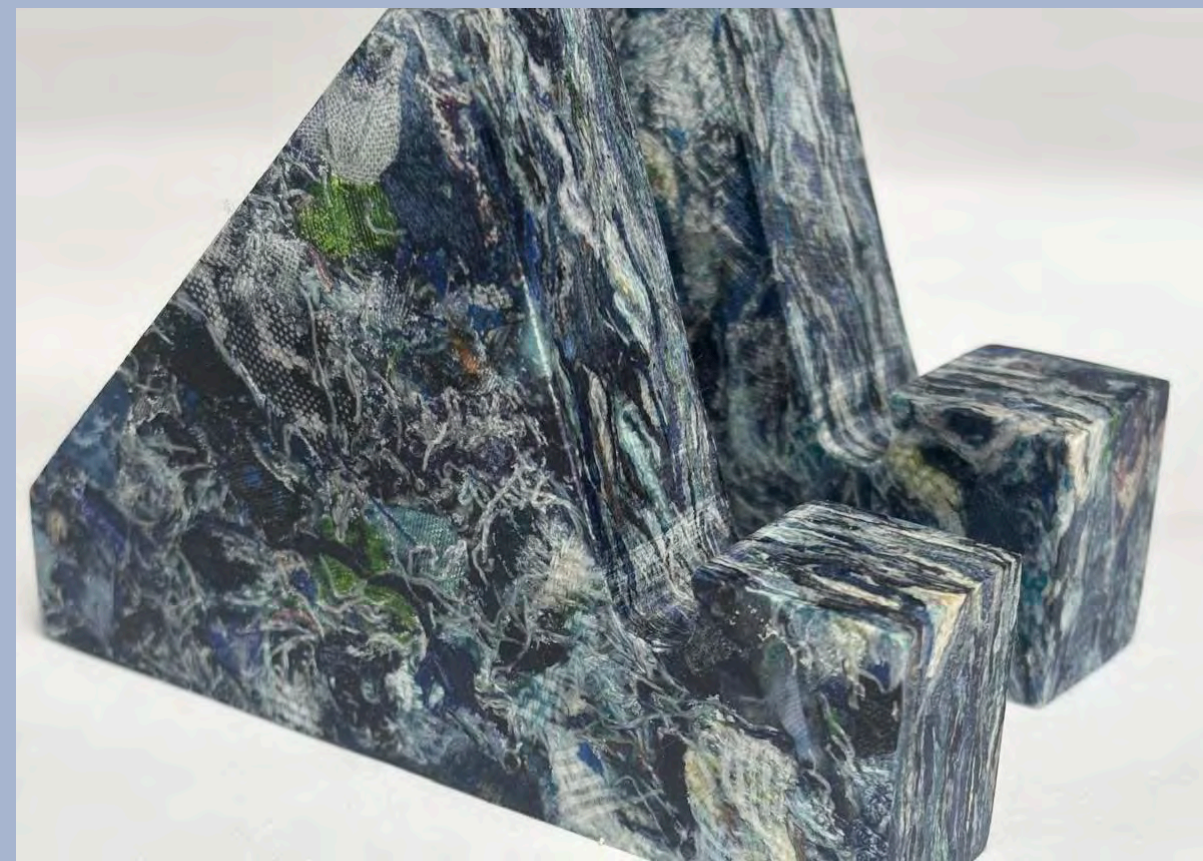

Homeware Look Book 2025

RE_CONSIDERED is a circular design house crafting sustainable objects from textile waste. We turn discarded materials into bold, beautiful, and functional products using Fabreco—our signature composite material made from upcycled fibres and bio-resin.

Each piece is handmade in the UK and designed to spark curiosity, conversation, and a deeper connection to what we own.

SHOP FIT-OUTS

If you're looking to revamp your store in an innovative and exciting way, we can create shelving and display units out of waste material that you send us or that we source locally.

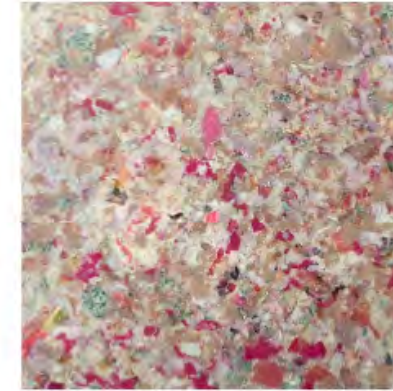

COLOURWAYS

Fabreco products are uniquely crafted, with each piece featuring distinct textures and varying colourways.

Every item is assigned a unique batch number, reflecting its place in a small, limited collection. The underside of each piece indicates how many items were made from that batch, similar to limited edition prints.

For wholesale orders, Fabreco provides images of the colour mix beforehand and can accommodate colour preferences to align with a store's aesthetic.
