WILDLIFE GARDEN

Joyful designs inspired by nature

Here and Now, Close to Nature

In a fast-moving world, the moments that bring us closer to the natural world – and to one another – feel more important than ever.

There is something reassuring about the here and now. A bird outside the window, the first signs of spring, a conversation shared. We see a growing desire to connect with the world around us and to make that connection a more present part of everyday life. Perhaps that is no surprise. Time spent close to nature can offer calm, perspective, and help ground us in the here and now.

At Wildlife Garden, that connection has always been at the heart of what we do. We look to wildlife, plants and the changing seasons, translating what we see into objects made to be used, enjoyed and kept.

This spring, the collection awakens with new designs shaped by the world around us. We introduce glass jars as an entirely new category, combining glass with hand-carved details drawn from flowers and insects. Our growing DecoBird family also welcomes new members, including a hen, Eurasian collared dove and colourful fairywrens. Alongside them are new designs celebrating familiar birds, animals, and the countryside, created to bring more character, warmth, and a sense of the outdoors into everyday spaces.

Over the past year, we have visited more trade fairs, leading to more opportunities to meet many of you in person. We value these face-to-face meetings enormously. Exchanging ideas, hearing about your shops and customers, and simply having time to talk gives us something no screen can replace. We carry those conversations with us as we look ahead.

For us, thoughtful design, a close connection to nature, and personal relationships are all part of the same bigger picture, creating a little more joy in everyday life, here and now.

Helena Nobel

Close Collaboration, Every Step of the Way

Every Wildlife Garden product begins with an idea and takes shape through sketches, material choices, prototypes, and careful adjustments. Behind this process are the people we work with – and relationships built on years of collaboration, shared knowledge, and trust.

Relationships Built Over Time

Our team works across Båstad, Sweden, and China, where Juanna, Zhu, and Kelly are based. Through close, regular contact, we develop our products together, from the first samples to the finished design.

Some of our manufacturing partnerships go back more than 15 years. Helena and Juanna have worked together for close to two decades and are in contact almost daily. Over the years, they have stayed in each other's homes and come to know each other's families.

That connection extends to the next generation, too. When Helena's son Ludvig studied in China, he stayed with Juanna. Today, he works as Supplier Quality Engineer at Wildlife Garden, continuing a connection that began long before he joined the company.

These long-standing relationships allow us to work openly, share knowledge, and address challenges together. They are an important part of how we develop our products and work with our manufacturing partners.

Close to the Materials and Manufacturing Process

Our close collaboration also means staying involved in the practical details of production. Knowing our products means understanding the materials, where they come from, and how they are used.

Zhu, our Quality & Technical Manager, works directly with manufacturers on material choices and technical solutions. Our team also visits factories regularly to follow production, identify potential issues early, and make adjustments where needed.

This hands-on approach gives us insight into how our designs take shape and helps us maintain consistency from one production run to the next.

Responsibility at Every Stage

All our manufacturers follow Wildlife Garden's Code of Conduct, which sets requirements for workplace safety and working conditions.

The majority of our production is also covered by independent assessments through Intertek's Workplace Conditions Assessment (WCA) programme. Together with our regular factory visits, these assessments provide valuable insight into working conditions and help us identify areas for continued improvement.

WCA - Workplace Conditions Assessment

Independent assessment by Intertek covering, among other areas, working conditions, working hours and wages, health and safety, management systems, environment and business ethics.

89/100 - Latest result

High - Intertek's highest performance level

The result was also above the stated benchmarks for country, industry and globally.

Organise

Shapes borrowed from nature give these everyday items their own playful design language. From carved magnets and keyrings to key cabinets, hand-carved hooks, and bookends, these functional items create a personal style that keep things organised and tidy in the hustle and bustle of daily life.

Key Cabinets

Create a striking focal point in your hallway with a nature-inspired key cabinet. Each cabinet, crafted in black cherry wood, features a playful, nature-inspired detail on its door.

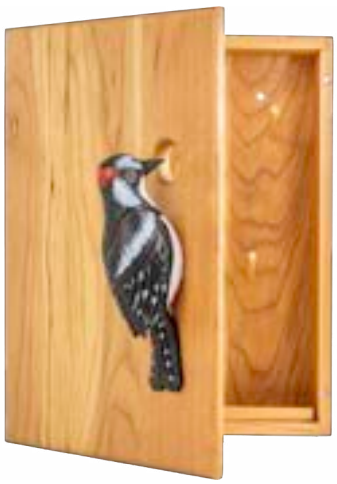

The cabinets have a traditional linseed oil finish, complementing the brass on the hinges. Magnets keep the doors shut and ensure they open and close smoothly, while a small ledge prevents anything from falling out. Inside, seven pegs organise the keys in two neat rows.

Materials: *black cherry wood, linden wood, water-based acrylic paint, glass, brass metal, magnets, linseed oil.*

Weight: *1 kg*

Wooden Boxes

These boxes are designed for both function and beauty, perfect for storing jewellery, keys, and other small essentials. Their soft edges and understated form suit any room, from the hallway to the bedside table. Each piece is hand-carved and finished to age gracefully, its surface catching the light in delicate shadows that reveal the warmth of the wood.

Materials vary by model*: *black cherry wood, linden wood, water-based acrylic paint, glass*, linseed oil, brass*.*

Did you know?

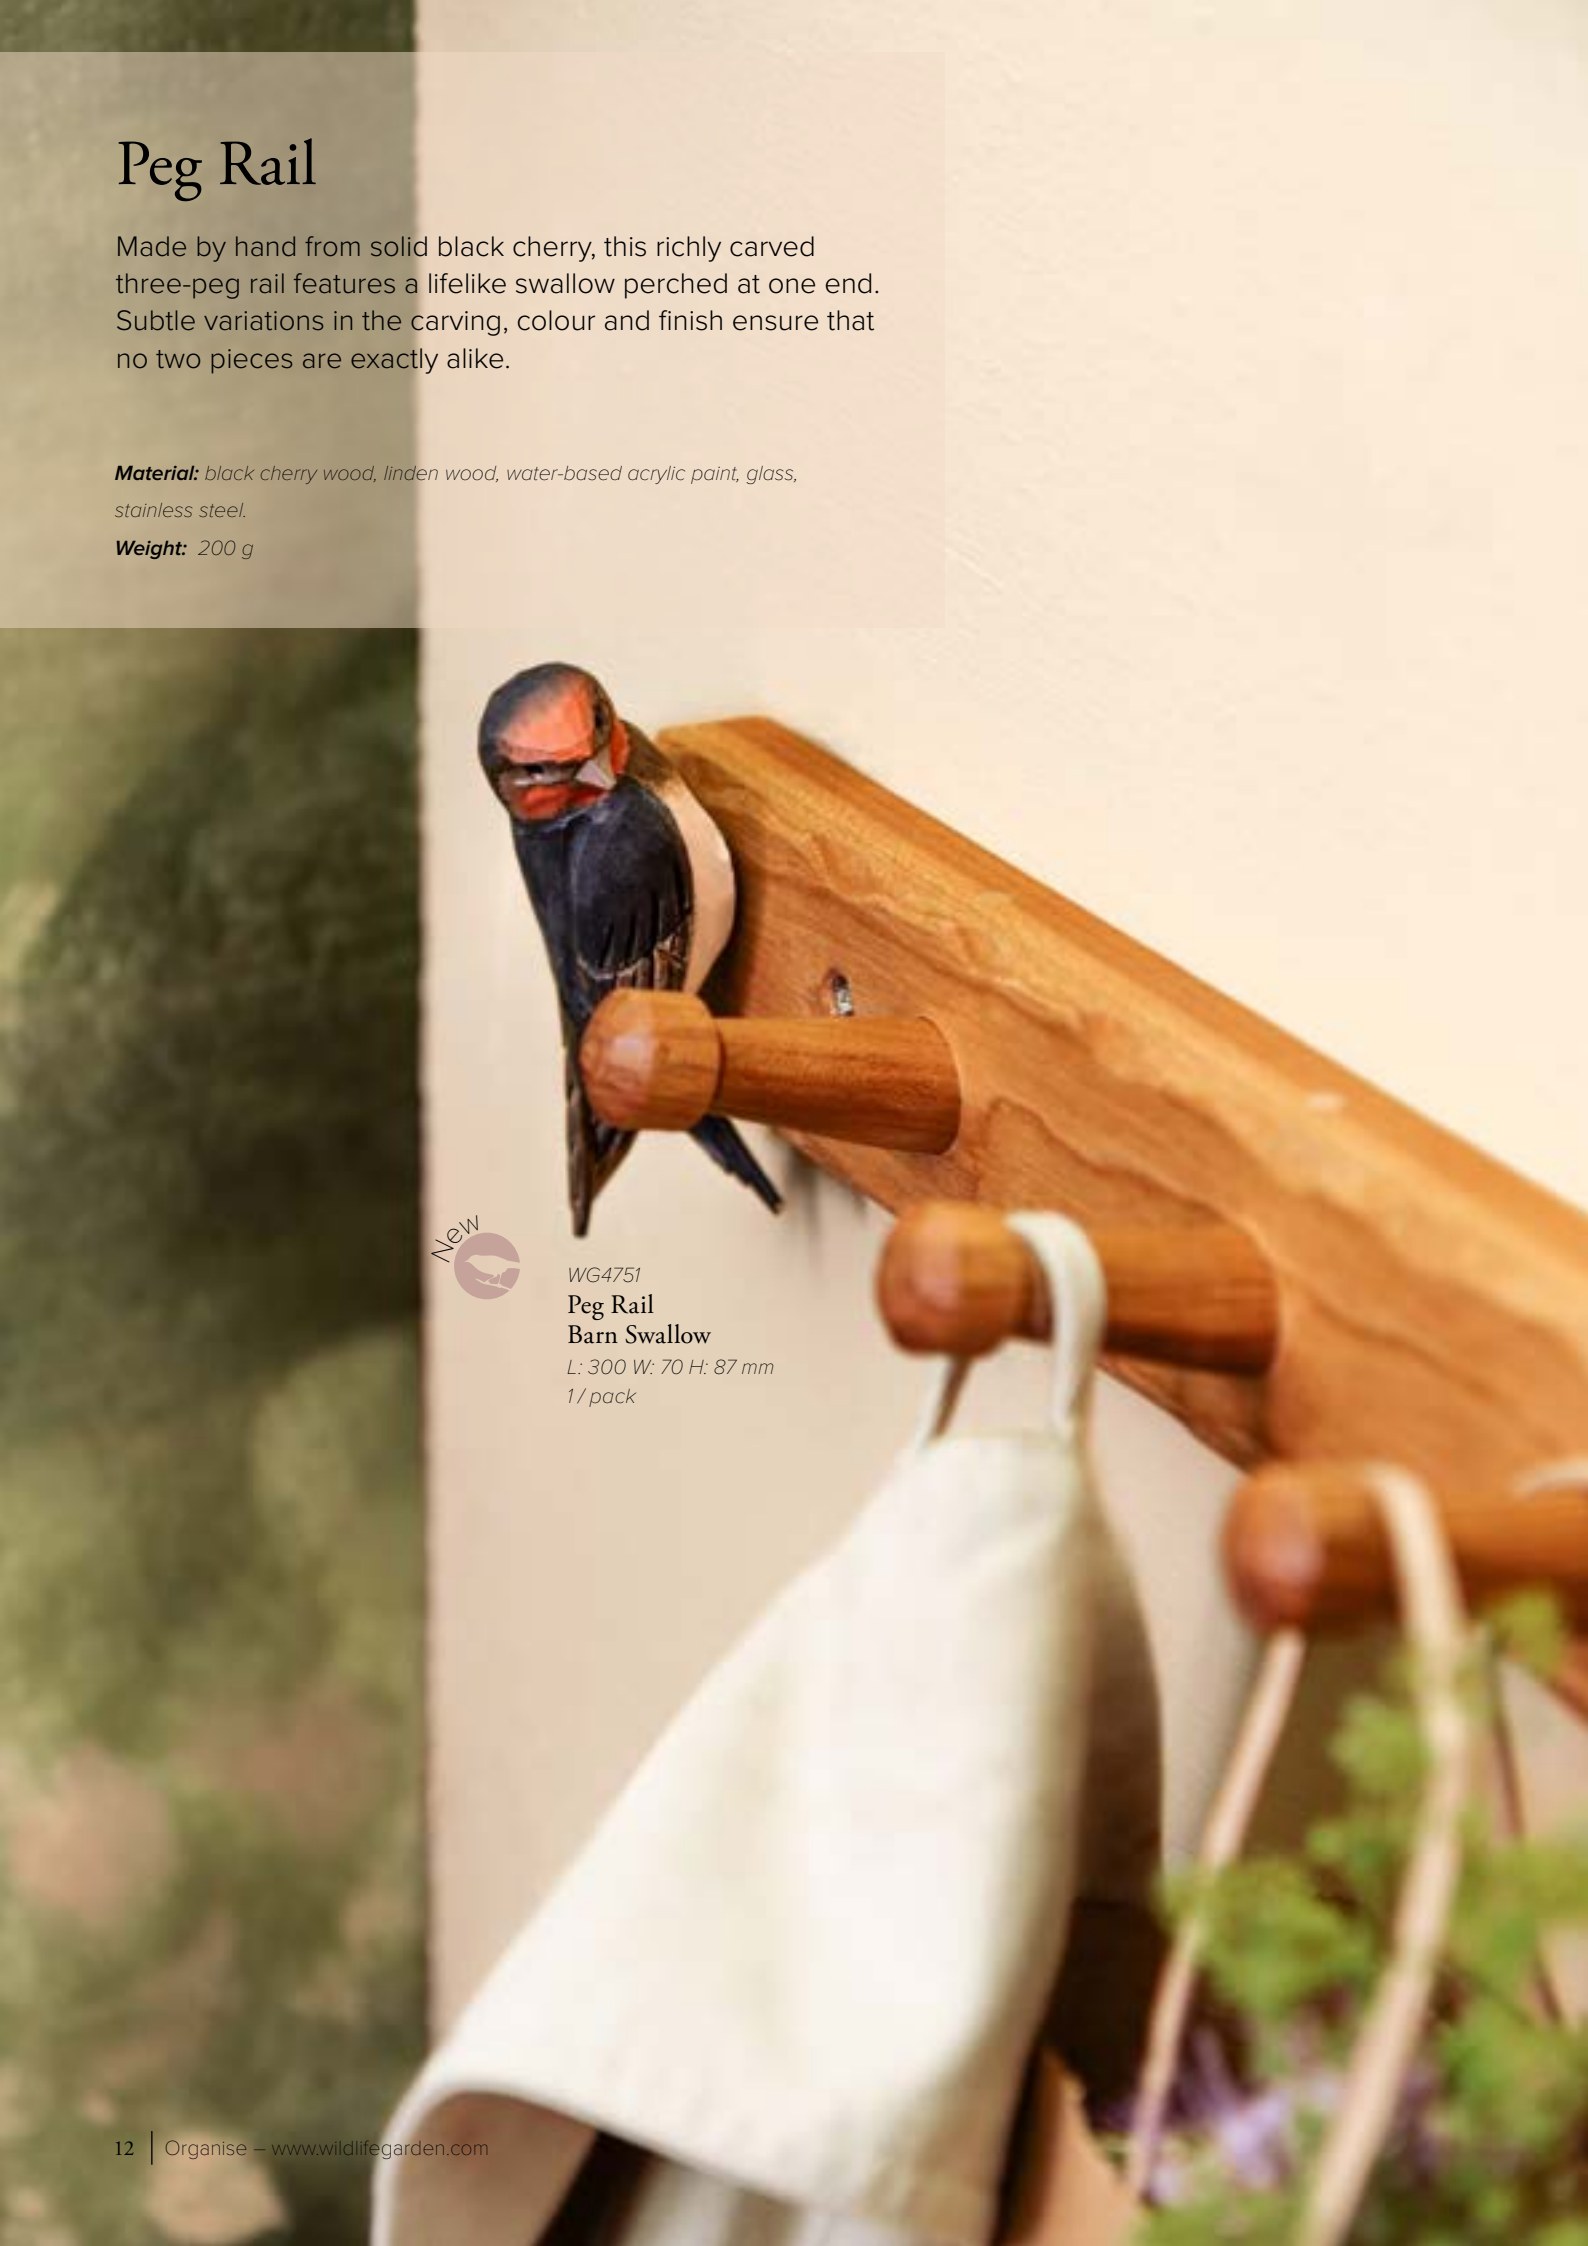

Squirrels can rotate their hind feet almost 180 degrees. This allows them to grip the bark with their sharp claws as they run headfirst down tree trunks.

Peg Rail

Made by hand from solid black cherry, this richly carved three-peg rail features a lifelike swallow perched at one end. Subtle variations in the carving, colour and finish ensure that no two pieces are exactly alike.

Material: *black cherry wood, linden wood, water-based acrylic paint, glass, stainless steel.*

Weight: *200 g*

Hand-Carved Hooks

Let nature be part of your homeware with these nature-inspired wall hooks. This impressive family of handcrafted hooks features intricate depictions of wild and domesticated animals, and handpicked individuals from the fungus kingdom. Each hook is a genuine piece of craftsmanship with a unique expression.

The hook is made of metal and attaches to a wall using a screw. Each hook comes with an informative booklet about the depicted species.

Materials vary by model: *linden wood, water-based acrylic paint, glass, brass-finished zinc alloy.*

Dimensions: *L: 37–103 W: 37–100 H: 98–185 mm*

Did you know?

Chickens have their own alarm language. They use different warning calls for predators in the sky and on the ground, helping the flock react to danger.

Bottle Openers & Stoppers

Inspired by nature's diversity, this collection of bottle stoppers and openers unites charm and function. The stoppers feature animal and plant motifs, while the waterbird-shaped openers sit comfortably in the hand with the metal part hidden beneath. Each piece is hand-carved and painted with water-based colours – playful details that bring nature to the table.

Material: *linden wood, water-based acrylic paint, glass*, cork*, glue*, stainless steel*.*

**Materials vary between bottle openers and stoppers.*

Kitchen Roll Holders

The kitchen roll holders playfully combine form and function. Atop each solid wood holder sits a wood-carved bird, hand-painted in water-based paints. The kitchen roll holders come flat packed in three parts. Each pack contains two different-sized centre rods to suit different lengths of kitchen roll.

Material: *pine, linden wood, water-based acrylic paint, rubber, stainless steel, hemp cord, glass.*

Weight: *220 g*

Did you know?

Unlike many songbirds, both male and female European robins sing during winter. They use their songs to defend their territories, even in the coldest months.

Cabinet Knobs

These wooden cabinet knobs are hand-carved and painted in nature-inspired motifs. From seed pods to forest finds, each one is unique. A refined yet playful accent for drawers and cabinet doors. Supplied with a screw and spacer and finished with water-based paint.

Material: *linden wood, water-based acrylic paint, nylon, metal screw & washer.*

DecoBird—Wood-Carved Birds

Bring birdlife a little closer with DecoBird – an ever-growing collection of hand-carved wooden birds, painted with water-based colours. Created with ornithologists, designers and skilled craftspeople, each bird captures the distinctive character of a real species.

Loved by collectors, given as thoughtful gifts and displayed in nature-inspired homes, DecoBirds also bring wildlife into classrooms as learning aids.

Each comes with a booklet exploring the species' appearance, behaviour and distribution.

Designed for indoor use, larger birds come in classic cartons and smaller ones in windowed display boxes. The abbreviations beside each bird indicate where the species occurs – see below.

Material: *linden wood, water-based acrylic paint, glass, metal wire, hemp twine.* | ***Weight:*** *20–860 g*

Nests & Feeders

Our collections of architectural nests and feeders attract wildlife to the garden. All design work and production processes occur in collaboration with ornithologists and experts, resulting in products adapted to the guests' needs. The feeders designs prioritise hygiene to prevent diseases from spreading between birds, and the nests have a range of adaptations to ensure that the inhabitants thrive.

The whole collection features materials that are stylish, functional and weatherproof.

61

62

Multiholk

Be inspired by our lively assortment of dream homes for your feathery friends. The iconic Multiholk's clever design means it's usable year-round. During the colder months, the Multiholk is a bird feeder, and it transforms into a nest during the spring. You effortlessly change its use from feeder to nest by opening the entrance hole and inserting the base plate.

Multiholk is well-thought-out, with creative solutions and a playful design. Grooves below the inside of the entrance hole ensure the fledglings can climb out of the nest. And the material selection and ventilation holes help maintain the correct temperature during hot and cold days.

Multiholk is part of an ever-growing product family with classic, modern and countryside houses. All houses have decorative details that enhance their style.

Material: *pine, plywood, water-based acrylic paint, stainless steel, brass-plated zinc alloy.*

Weight: *~1 kg* | ***Capacity:*** *2 litres of feed.*

Accessories: *bracket, screws, wooden perches.*

Multifeeder Barn

The Multifeeder Barn has several interior compartments to fill with different types of birdfeed. Offering a greater variety of feed attracts a greater variety of birds. Try peanuts, sunflower seeds, suet balls or seed mixtures. The interior compartments protect the feed from the elements. And, as the small birds land to eat, they too are kept dry. The barn's narrow ledges make it difficult for larger birds to land and scare away the small birds.

Material: *pine, plywood, water-based acrylic paint, powder-coated metal, stainless steel, brass-plated zinc alloy.*

Weight: *1.8 kg* | ***Capacity:*** *ca 5 litres of bird food.*

Accessories: *screws, wooden perches, mounting plate.*

Bird Feeder with Bath

Create movement and life in your garden with a stylish house with a built-in bird bath. With its clever design, the house will attract different bird species all year round. The pool will be a place for garden birds to quench their thirst, wash and frolic.

The bird feeder is made of wood. The roof with the built-in pool consists of weather- and frost-resistant plastic.

Materials vary by batch: *plywood, fir, water-based acrylic paint, PU paint, PP plastic, brass-plated zinc alloy, stainless steel, powder-coated metal.*

Weight: *1.1 kg* | ***Capacity:*** *2.5 l of seeds.*

Accessories: *screws, metal perches.*

Metal Cottage Feeders

Suet ball feeders designed as charming little cottages made from steel mesh. The design allows small birds to perch easily while minimising the risk of disease transmission. Easy to hang using the included wire.

Material: *powder-coated metal, stainless steel, metal wire.*

Weight: *0,3 kg* | ***Capacity:*** *approximately 6 suet balls.*

Accessories: *metal wire*

Giant Feeder

Holding six litres of seed, the Giant Feeder only needs filling occasionally. Its recyclable plastic insert, which contains the birdseed, is easy to remove for cleaning. Larger birds find it difficult to land on the perching ring, meaning that small birds can enjoy their meals in peace. The Giant Feeder has six feeding windows, allowing many birds to feed at the same time.

Material: *powder-coated steel sheet, metal wire, MABS plastic.* ***Weight:*** *1.8 kg* | ***Capacity:*** *6 l* | ***Accessories:*** *screws.*

Combi Feeder Seeds

Combi Feeder Seeds is a hanging seed dispenser. Its design, with a plastic insert and feeding windows, lends itself to different seed mixes. The Combi Feeder also works as a suet ball or apple feeder. Remove the plastic insert and fill it with apples or suet balls.

Material: *powder-coated steel, metal wire, MABS plastic.* | ***Weight:*** *0.4 kg* ***Capacity:*** *1.2 l* | ***Accessories:*** *short and long perches, wire.*

For Pollinators and Other Garden Visitors

To support local wildlife, we've collaborated with experts to create homes for bees, butterflies, and bats, who struggle to find nesting places in our urban areas. We've also designed a squirrel feeder to help keep them fed and steer them away from the bird feeders.

Materials vary by model: *pine, bamboo*, plexiglass*, water-based acrylic paint, stainless steel, brass-plated zinc alloy.*

Did you know?

Around 90% of bee species are solitary. Instead of living in hives, females build their own nests and leave a supply of pollen and nectar for their young.

Posts & Mounts

Invite life and light into your garden. When walls or trees aren't available, posts lift bird feeders and nests where you want them, creating small havens for wildlife. As evening falls, the outdoor candle holder adds a soft glow and gentle movement in the dark.

WG907

Metal Pole

L: 80 W: 80 H: 1245 mm
2 kg | 4 / pack
Powder-coated steel, stainless steel.

The metal pole is stable, weather-resistant, and easy to place in the ground. It supports up to 10 kg and comes apart in three sections for convenient transport.

Fits:

- *Multiholk*
- *Multifeeder Barn*
- *Bird Feeder with Bath*
- *Giant Feeder*

Max load: 10 kg

WG908

Three-piece Post

L: 38 W: 38 H: 1205 mm
0,8 kg | 1 / pack
Pine, stainless steel, water-based black stain.

The three-piece, black-stained post comes in three, making it eary to transport. Each segment is 43 cm. The assembled post has a total length of 120 cm.

Fits:

- *Multiholk*
- *Bird Feeder with Bath*
- *Bee Nest*
- *Butterfly Box*
- *Squirrel Feeder*

WG905

Pole Black

L: 38 W: 38 H: 1203 mm
0,8 kg | 6 / pack
Pine, water-based black stain.

Post for firm assembly of bird feeders. The height is adapted to provide a stable fixture.

Fits:

- *All nests and feeders*

WG9909

Outdoor Candle Stake

L: 123 W: 123 H: 630 mm
0,4 kg | 1 / pack
Powder-coated steel, stainless steel.

The pole for outdoor candles lifts the light a bit higher, creating exciting shadows in the darkness.

Retail Displays

We offer several solutions for profiling and displaying Wildlife Garden's products. The display material, made of wood, comes complete with our logo.

Our packaging acts both to protect the product and as an attractive gift box, often with a display window.

The packaging, made of untreated corrugated cardboard, is 100% recyclable—our goal is to replace all plastic packaging with sustainable materials wherever possible.

Displays

To see more of our display materials, log into our retailer webshop, or contact us at +46 431-768 00 or info@wildlifegarden.se.

The displays are sold empty, please order your choice of products separately.
