Rapid Deployment of Divers

With increased safety

Rapid Deployment of Divers

By combining the demands from the extremely response-time focused rescue divers with the typical military specifications it is possible to make diving safer and less time consuming.

The Rescue Divers

Driving the development of rapid response equipment

The Rescue Divers

Ready to deploy in 180 seconds

The Rescue Divers

Ready to deploy in 180 seconds

The Rescue Divers

Despite the rapid response the safety level is very high

The Rescue Divers

Lets the divers focus on the task not on the diving equipment

The Rescue Divers

The need for rapid response is driving the development of simplicity

The Rescue Divers

Simplicity makes it safe

Simplicity makes it fast

The Military Divers

In general it is accepted in military dive organizations to spend hours on preparing the equipment before use.

The Military Divers

Focus on the task not on the diving equipment

The Equipment

What makes the equipment safe while contributing to a rapid deployment?

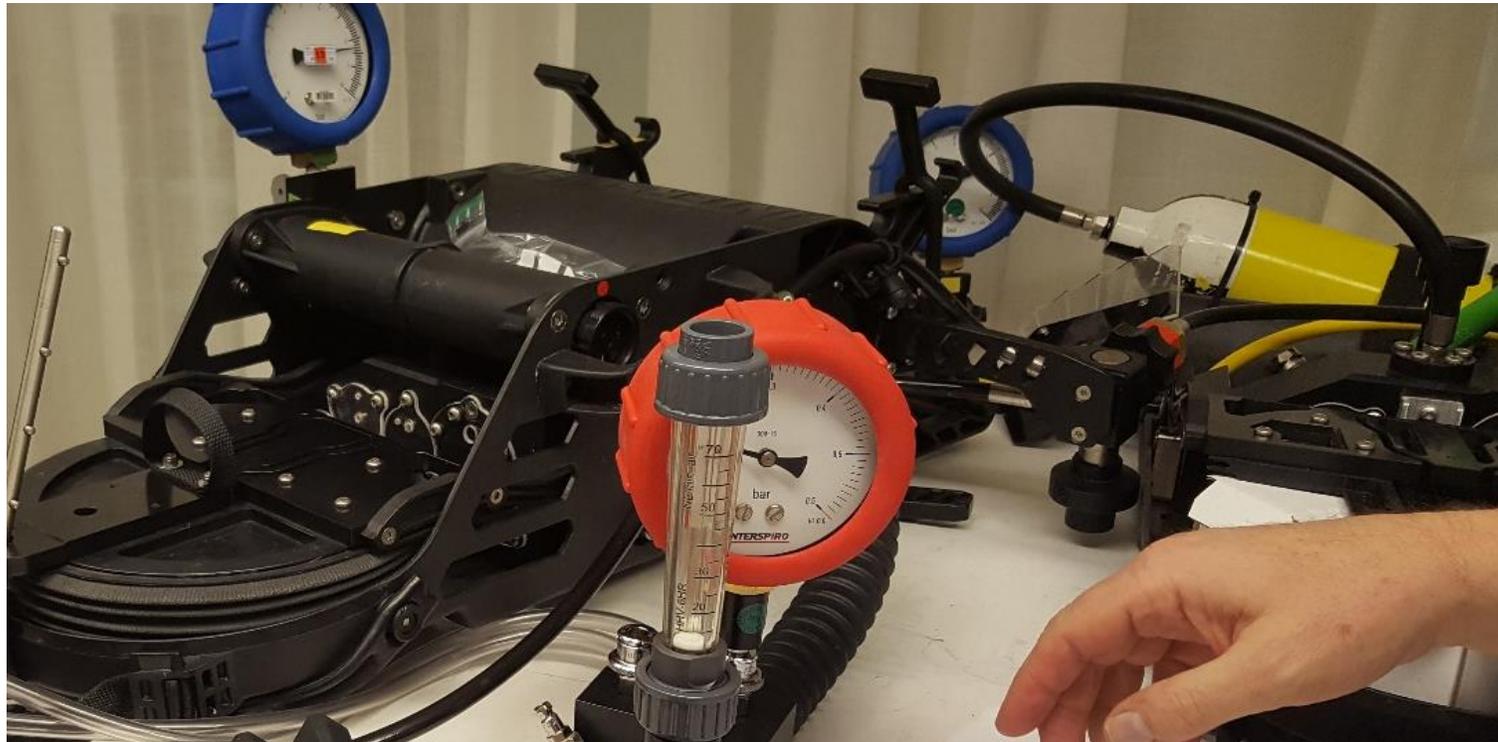

The Equipment

- Easy to prepare
- Easy to learn
- Easy to do daily maintenance

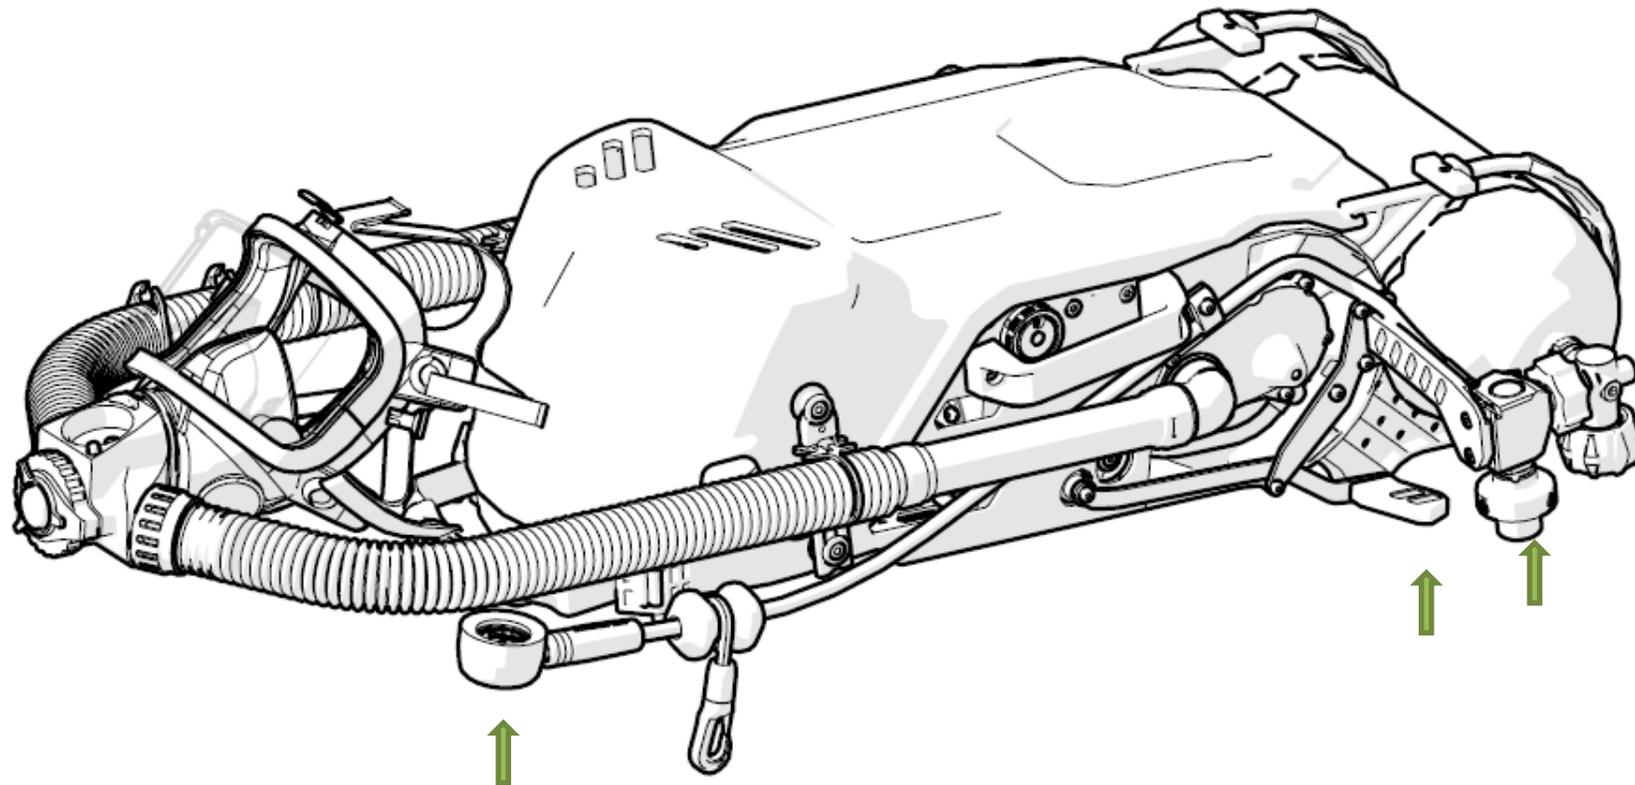

The Equipment

This needs to be considered when designing the equipment

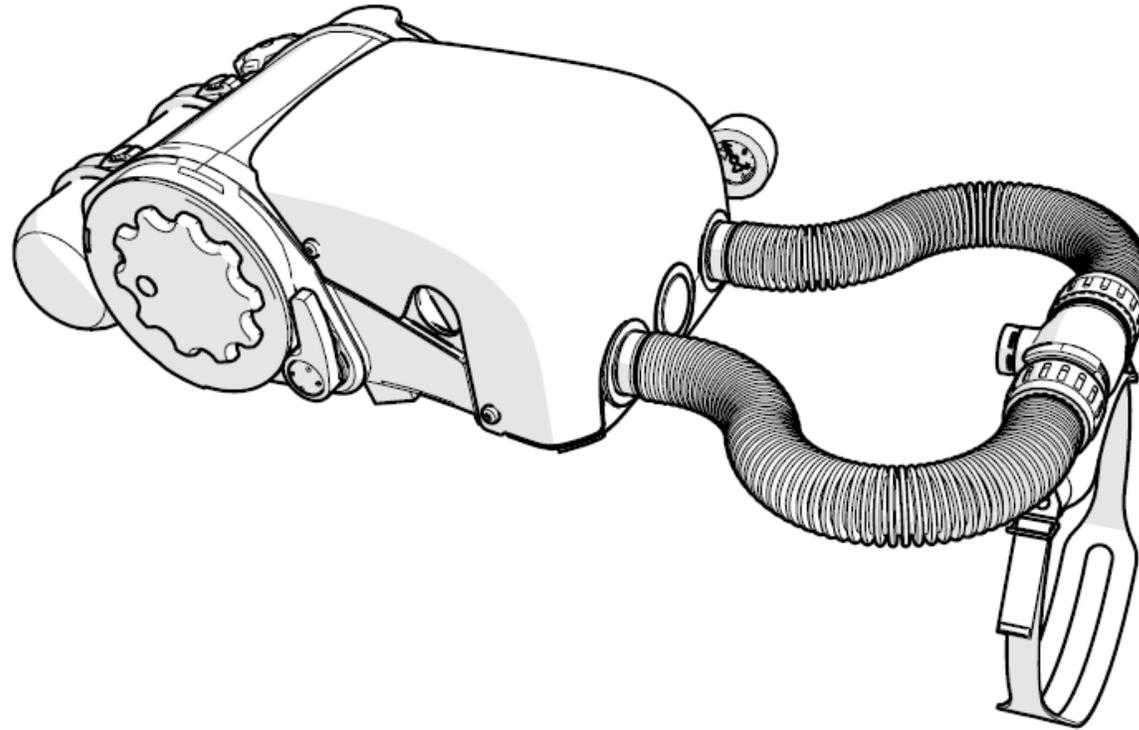

The Equipment

An example of easy to learn

The Equipment

An example of short time to prepare and maintain

Keeps You Breathing
