

# Future Maritime Training

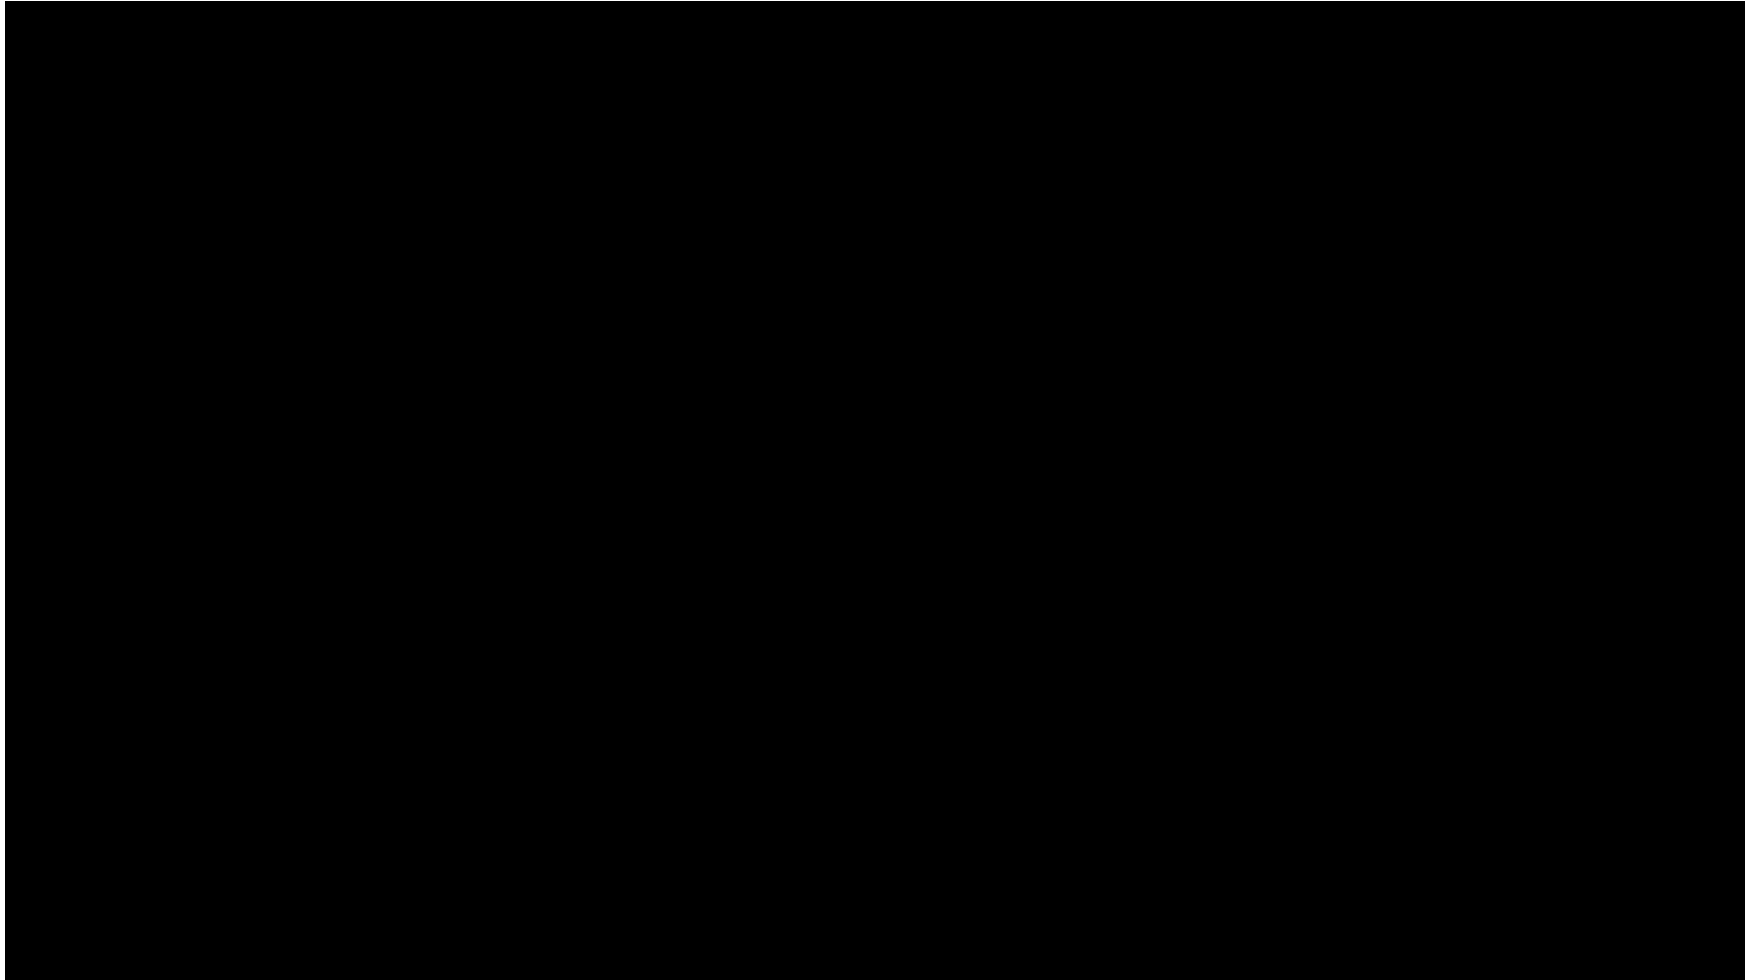

**CDR (DEU N) Jörg FELDHUSEN**  
**SO Education & Training**

**Centre of Excellence for Operations in Confined and Shallow Waters**

**Disclaimer:** This presentation does not necessarily reflect the notions of NATO or of the COE CSW Participating States

# Live Virtual Constructive -Training

# Opportunities & Challenges

- Synthetic Training incl. xR can provide low cost, scaleable and challenging training in a controllable environment
- Synthetic Training cannot replace live training completely, but will shorten work-up phases significantly
- Implementation of Multi-Crew-Concepts requires new training technology to maintain operational readiness
- Synthetic Training of entire ship`s crew very hard to realize  
→ xR may provide solutions, but do we really need everything?
