

The Swedish Perspective on Training for THE FUTURE

Col Lars Karlsson
Head of Train/eval
Branch
SWE AF HQ

Optimizing for high intensity
warfighting against a qualified
high-tech opponent.

The purpose of exercises ..

- SWAF Warfighting capability
- Testing war/CON plans
- Developing new capabilities
- Strategic Communication

The Dilemma ...

Optimising versus Flexibility

An ETEE- policy

Education, Training, Exercises and Evaluation Policy (ETEE)

Status of work:

- *ETEE-Policy*
- *Manual for Evaluation*
- *Manual for Exercise Planning*
- *Training policy*
- *Simulation policy*

Education, Training and Exercises

Long-term Plan

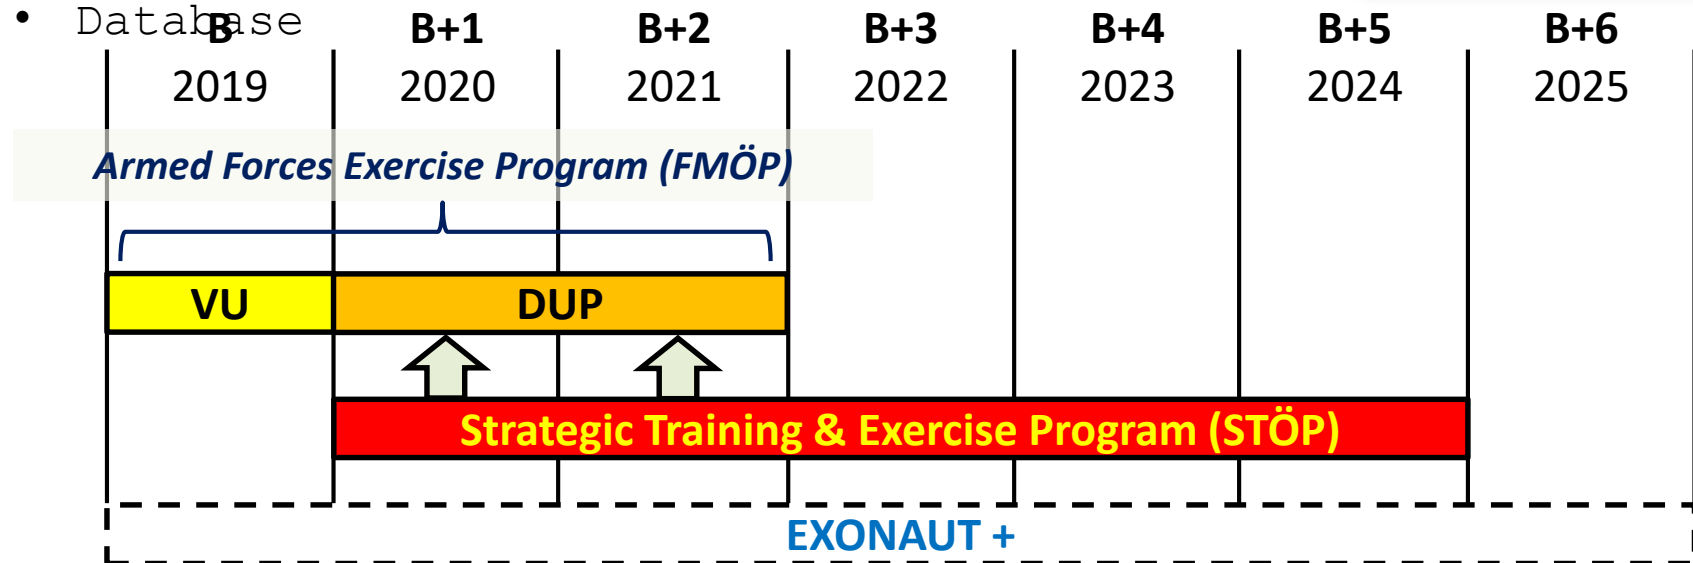

The two building block for long-term planning:

The Swedish version of MTEP

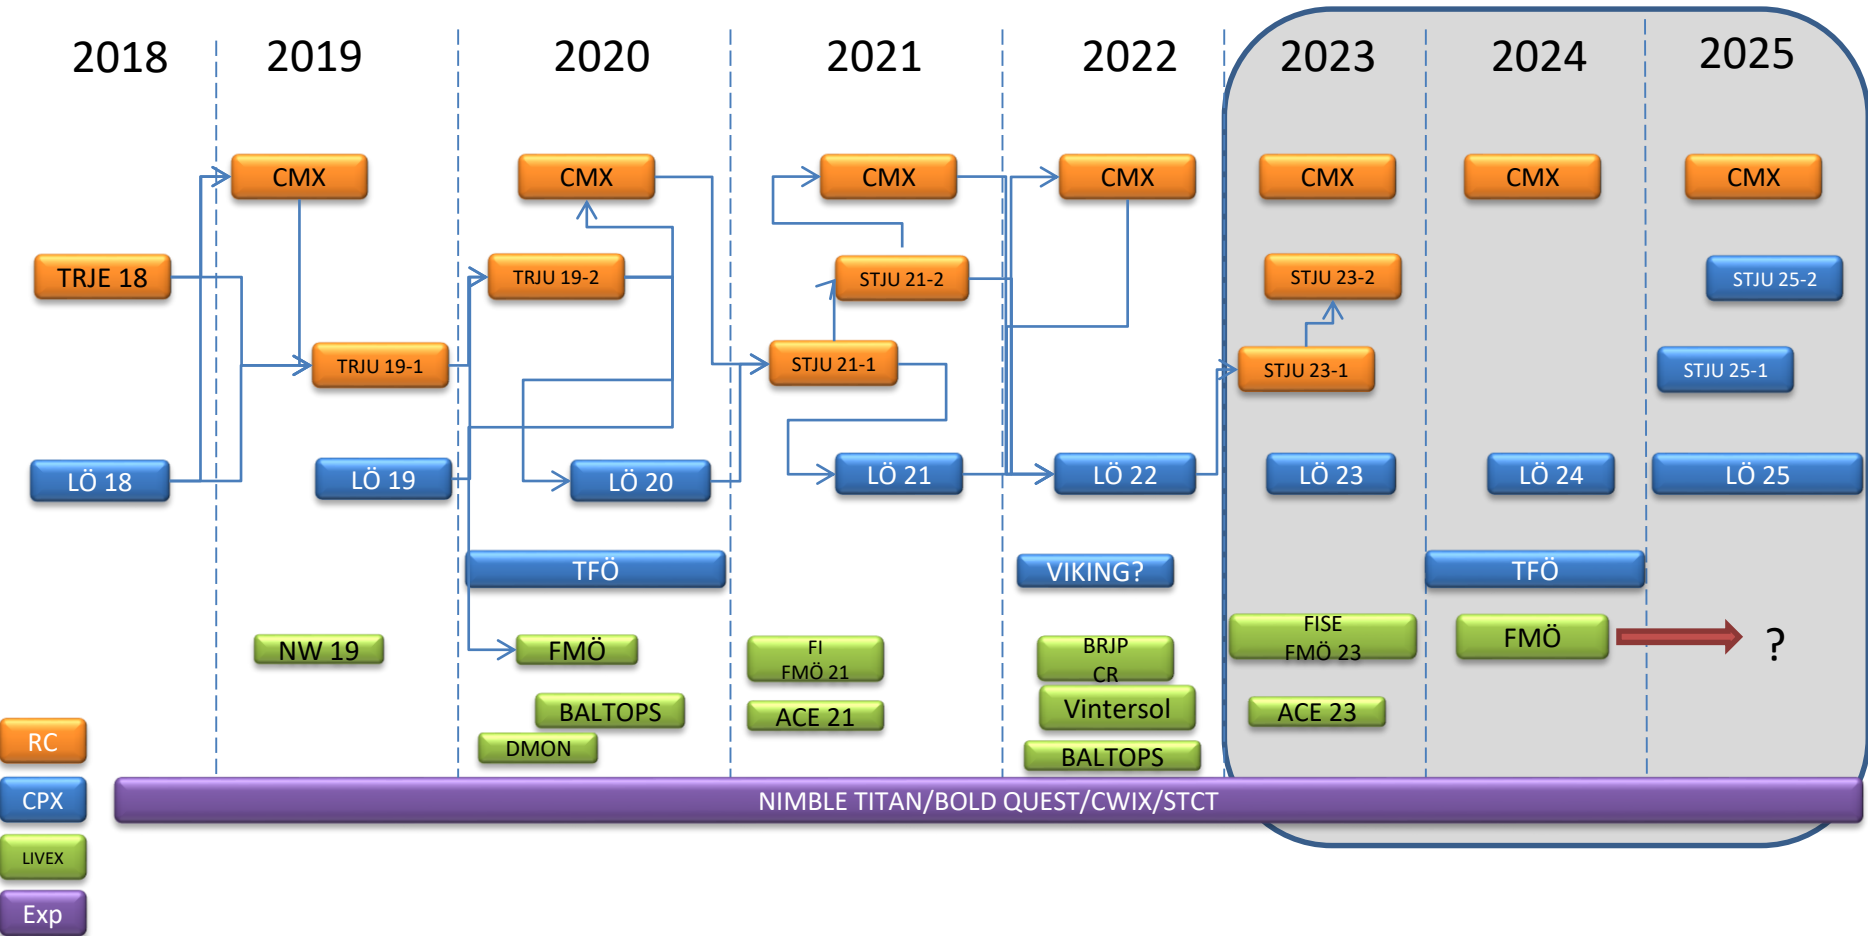

Strategic Training and Exercise Program (STÖP)

Armed Forces Exercise Program (FMÖP) – two years

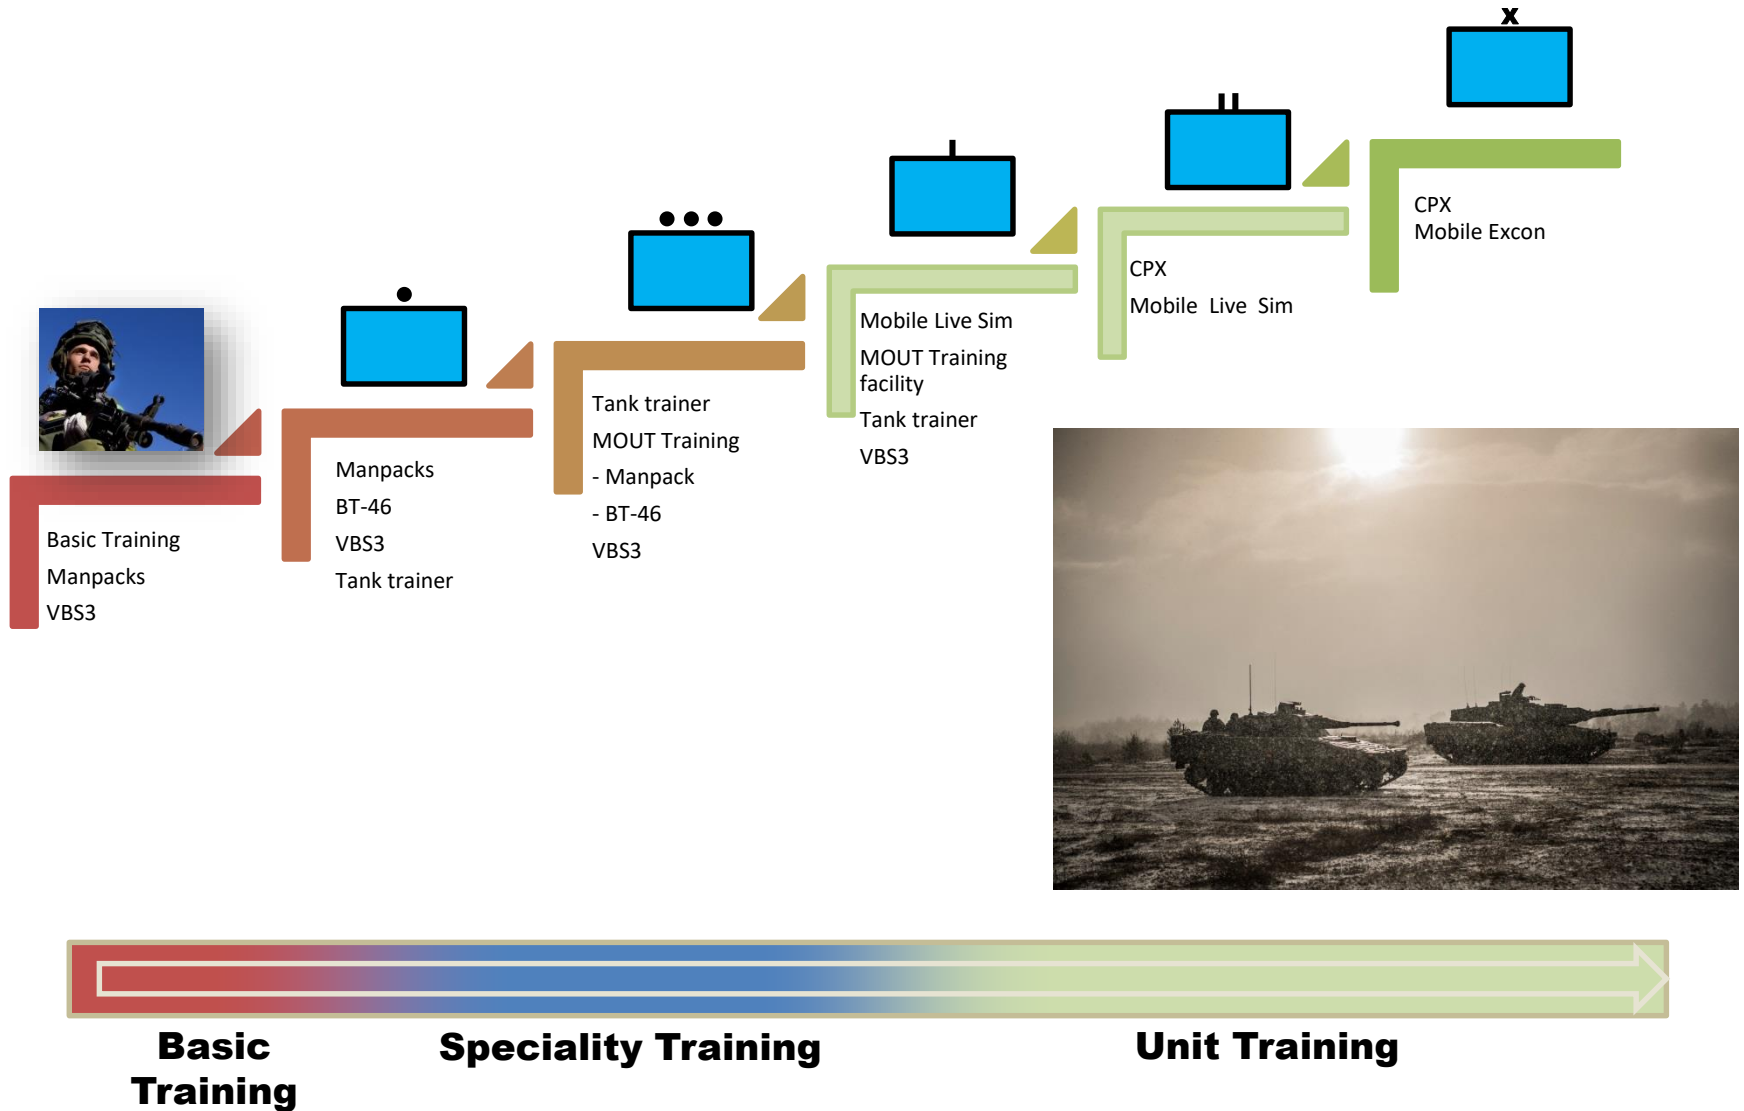

- Exercise program B+1-B+5 (overall).
- Exercise program B+1 (detailed).
- Exercise program B+2-B+5 (detailed draft).
- Concept development and experimentation .
- Database

SWE MTEP (STÖP)

Training cycle ...

Criteria for success

- Decentralized training equipment → always available for the user
- Suitable mix between live - simulators - virtual supported training → verify proficiency on soldiers and units continuously through the training cycle
- Dual-purpose equipment (BT-46)
- Supporting full combined arms concept → All branches/functions simulated
- Command & Control trainer → rehearses TTP and decision making
- Support tools for AAR available locally & central for all levels → understanding - learning - verification - documentation
- Communication & Coordination JOINT/COMBINED
