

Climate Action Stage

at the heart of the Innovation Zone at COP27

The Climate Action Stage, powered by Kite Insights, brings together a highly curated, ambitious programme of over 300 leaders, changemakers and experts from across the climate landscape. Built around six key thematic pillars, the Climate Action Stage is a generative space where people can explore the breadth of climate action: from Climate Moonshot's game-changing innovations to Climate Reality's gritty truths. Our dynamic daily programme will explore exciting and provocative issues and opinions from thought leaders, business champions, youth activists and more.

Join a holistic, interactive deep dive into the past, present and future of transformational climate action that is intellectual (head), emotional (heart) and action-oriented (hands).
