DOBOND 度邦

New Design For Customer

- Dedicated to becoming a global leader in damper solutions for structural component issues
- A high-tech enterprise ranked No.1 in intelligent manufacturing of domestic dampers.
- Focusing on "intelligent manufacturing," we are committed to the R&D and production of dampers, new locking systems, and high-end automotive functional assemblies.

From the initial concept to the final product

Rotary dampers
Push push latches
Precision plastic injection molded parts
Automotive functional components

Design Engineering

We offer end-to-end solutions including:

- Product design support
- Mold development
- Mass production
- Automated assembly

Developing new technologies

Manufacturing

FANUC electric injection molding machines, Sumitomo electric injection molding machines, Engel hydraulic presses, fully automated assembly and testing machines imported from Japan.

Fully automated production

Accurate measurement

Metrology Testing

Multi-method measurement systems, including:

- SEREIN optical/video measuring instruments
- HEXAGON coordinate measuring machines (CMM)
- KEYENCE vision dimension measurement systems

Visual Inspection

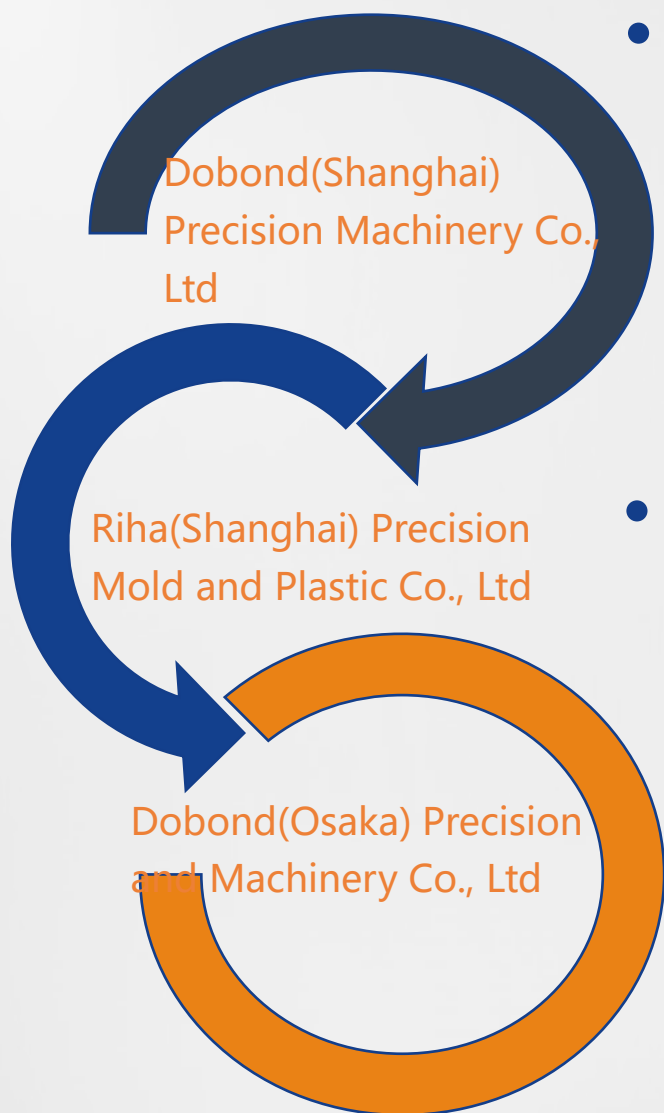

Mold automation processing

Feedback & Improvement

Progress Never Stops

度邦发展史

Dobond Development History

- Founded in 2008 and headquartered in Shanghai, China, we are certified to IATF 16949:2016 and ISO 9001:2015 standards. Our core operations include sales, R&D design, and financial management.

With 200+ long-term clients, we possess extensive experience in OEM, Tier 1, Tier 2 partnerships. At Dobond, customer-centricity drives everything we do—we collaborate closely with clients to deliver tailored product solutions.
- In 2016, Dobond acquired Riha, which is taking charge of mold design, mold processing, and quality control. Equipped with an automated mold processing center and ERP system for end-to-end monitoring from design to production, along with high-precision imported machining equipment, the company ensures customers' demands for high-quality products, cost efficiency, and short lead times are met.
- Established in 2018, headquartered in Osaka, Japan, the company primarily specializes in sales, catering to the demand for rotary dampers and functional parts from major Japanese clients such as Panasonic and Kyocera.

R&D Capabilities

Currently, we possess over 70 independent intellectual property patents in technological R&D, design application, process manufacturing, and trial production, including 20 invention patents. These cover core technologies such as dampers, latches and functional components.

R&D Investment

We prioritize R&D investment and gather top-tier technical experts to drive innovation.

产品选择

Be Looking For It

优点Strengths

- ◆ Torque with colors, 100% tested, (-40 to over 95°C)
- ◆ Very high torques possible (0.12 – 90 Ncm)
- ◆ High stability under stress, 50000 cycles proven
- ◆ Inhouse laboratory for development and testing
- ◆ More than 60 patents covering all dampers

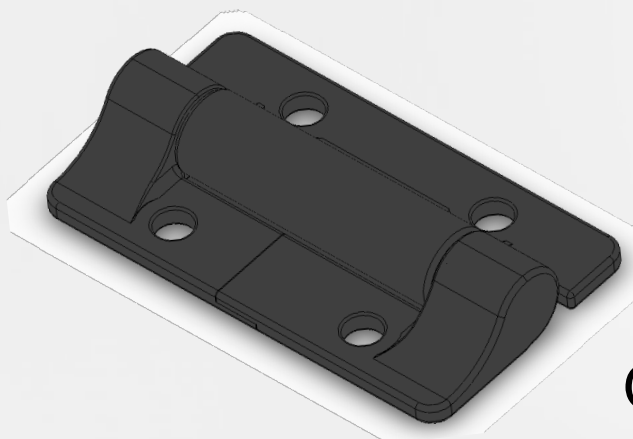

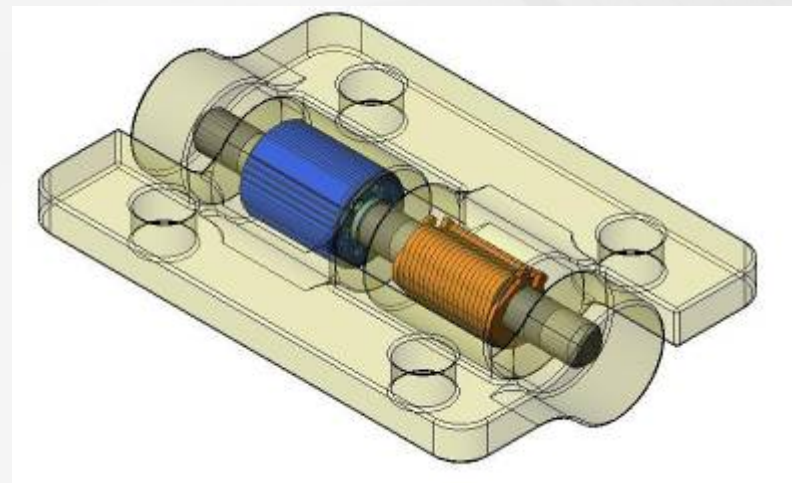

标准件产品

Meal Tray to armrest position hinge Aircraft or Train

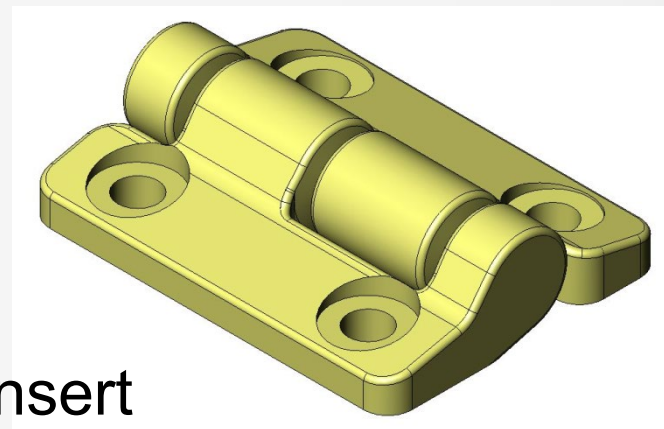

- 100% torque in one direction
- No torque in the opposite direction
- Options:
 - One-way nylon hinge (5 Nm / 0 Nm)
 - One-way zinc hinge (12Nm / 0 Nm)
 - One-way torque insert (5 Nm / 0 Nm)
- Custom and standard

One-way zinc hinge

One-way torque insert

400+
Customers

We serve more than 400 automotive and appliance manufacturers worldwide and are recognized by our customers.

Our Mission

WE KEEP THE WORLD IN MOTION

WHO WE ARE?

An innovation-oriented high-tech enterprise, mainly committed to the development and manufacturing of dampers, new locking systems, high-end automotive function parts assembly.

BEST SERVICE

We can provide customers with professional technical support and customized services.

WIDELY USED

Products are widely used in automobile and home appliances industry, to improve the comfort and convenience of life to a certain extent.

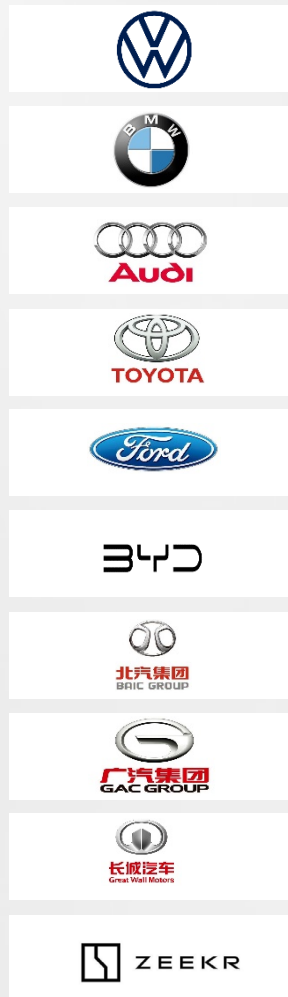

GOOD VISION

We are committed to building a company that accomplishes employees, realizes customer value and wins social respect.

Innovate for Change, Evolve for Growth
