

## Benefits

## How it works

- AI-POWERED test case creation – test scripts in minutes instead of days
- Work like a **TECH HERO** – agile, iterative, collaborative
- Interactive dashboards for data-driven decisions – **75%** less review effort
- REAL-TIME TEST** results – early error identification

- Code
- AI-powered test case generation
- Automatic build and integration
- Continuous integration and testing
- Real-time reports and KPI dashboards
- Compliance check and promotion
- Release and rollout
- Software-defined vehicle

## It's time for **one:cx**

**one:cx** elegantly ushers the automotive industry into the software age by unifying fragmented tools, data, and processes into a centralized, AI-powered, cloud-based testing ecosystem—for continuous innovation, error minimization, and shortened development cycles.

# MAKE AN UNLIMITED PLATFORM YOUR SOLUTION

Scalable, modular platform for test and integration automation based on AI, cloud technology, and big data.

Transformation that feels like progress—not risk

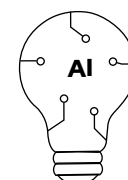

## Features

## Strengths

- DASHBOARDS** for transparency and traceability
- CENTRALIZED MANAGEMENT** of artifacts and test results
- SHARED EXCHANGE** of results and resources
- INTEGRATION** of various systems and tools
- END-TO-END AUTOMATION** from code to vehicle

- Integration Endpoint
- Automotive DNA
- CI/CD/CT
- Cloud-native
- Collaboration
- Expertise
