

COMPLY WITH COMPLIANCE

# ATS GROUP

ATS Group is a group of companies operating in the field of Inspections, Testing, Certifications, and Type Approvals.

Our companies provide services to manufacturers and producers who need the Type Approval of Vehicles, components, systems, and technical units in compliance with all ECE and EU Regulations, allowing them to proceed with mass production of their products.

# ATS GROUP

ATS Group is the commercial identity of a group of companies, specifically consisting of ATS San Marino, ATS Europe, ATS India, ATS China, ATS Brazil, and several ATS points.

The latter operate in commercial partnership with local companies, promoting internationalization and ensuring a widespread commercial presence.

ATS EUROPE S.R.L.

Designation as a Technical  
Service by the State Office  
for Metrology of the  
Republic of Croatia (DZM).

## DESIGNATED TECHNICAL SERVICE

ATS is a Designated Technical Service exclusively appointed by the Republic of San Marino Authority (Type Approval code E57), the Swedish Transport Agency – Transportstyrelsen (Type Approval code E5/e5), the National Standards Authority of Ireland (Type Approval code E24/e24), by the State Office for Metrology of the Republic of Croatia (DZM) (Type Approval code E25 / e25) and by the Ministry of Transport of the Czech Republic (Type Approval code E8 / e8).

Our mission is to revolutionize the approval process, halving the time required to issue the certificate.

# REPUBLIC OF SAN MARINO

Designation as Technical Service by the

of the Czech Republic

# TECHNICAL SERVICE

## CONFORMITY OF PRODUCTION

ATS Group, through its dedicated COP & surveillance team, conducts audits aimed at the initial and periodic evaluation of the production process and the approved product.

## ACCREDITED LABORATORY

ATS Group, for the execution of tests subject to inspection activities, relies on laboratories accredited according to the ISO/IEC 17025:2017 standard. In cases where they are not accredited, it is still able to conduct an audit to recognize the laboratory as suitable for performing the tests.

## TYPE APPROVALS

ATS Group carries out testing and inspection activities through its extensive network of inspectors and affiliated laboratories, aimed at obtaining the Type Approval certificate according to ECE and EU Regulations.

## VEHICLES AND SYSTEMS CATEGORIES FOR TYPE APPROVAL

- CATEGORY M, N, O: passenger cars, vans, buses, trucks, and trailers.
- CATEGORY L: motorcycles, scooters, mopeds, tricycles, and quadricycles.
- CATEGORY T, C, R, S: tractors, harvesters, agricultural trailers, and towed machinery.
- NON-ROAD MOBILE MACHINERY (NRMM): engines for construction machinery, generators, industrial and naval sector.
- INDIVIDUAL APPROVALS: prototypes, one-off Vehicles, and specially imported models not covered by Type Approval.
- INDEPENDENT COMPONENTS, SYSTEMS, AND TECHNICAL UNITS: lighting systems, ADAS systems, seatbelts, tyres and electronic control units (ECUs)

## ELECTRIC VEHICLES TYPE APPROVAL

ATS Group offers comprehensive services for the Type Approval of electric Vehicles, acting as a strategic partner for manufacturers who wish to introduce their products to the European and international markets.

The Whole Vehicle Type Approval (WVTA) is a fundamental step to ensure that electric Vehicles meet all safety and environmental requirements. The regulatory basis for WVTA in the EU is Regulation (EU) 2018/858, which establishes the administrative framework and procedures for the approval and market surveillance of motor Vehicles, including electric Vehicles, and their components.

## TYPE APPROVAL OF THE MAIN UNECE REGULATIONS

### ELECTROMAGNETIC COMPATIBILITY

It ensures that Vehicles and their electronic sub-assemblies (ESAs) do not cause excessive electromagnetic interference (EMI) that could disrupt other electronic devices.

### LIGHTING SYSTEMS

From Full LED headlights to Matrix and Laser systems, new technologies provide greater safety, efficiency, and comfort. Our accredited laboratories are capable of performing tests with the highest level of reliability.

### TYRES

Tyres are tested in proving grounds on mixed surfaces and under various climatic conditions, ensuring performance, safety, and reliability essential for every Vehicle on the road.

# TYPE APPROVAL OF THE MAIN UNECE REGULATIONS

## ACTIVE SAFETY (ADAS)

ADAS systems are tested in proving grounds, simulating real scenarios and variable weather conditions to ensure active safety, driver assistance, and reliable performance in every potential danger situation.

## PASSIVE SAFETY

Passive safety includes laboratory testing systems such as airbags, seatbelts, and impact-absorbing structures, designed to reduce the consequences of an accident and effectively protect drivers and passengers.

## NOISE POLLUTION

Reducing noise pollution in Vehicles enhances comfort, safety, and quality of life. Specific tests measure sound emissions, helping develop quieter, more environmentally friendly cars.

## TYPE APPROVAL OF THE MAIN UNECE REGULATIONS

### VISIBILITY

Rearview mirrors and vision systems help drivers monitor their surroundings, ensuring clear awareness of pedestrians, cyclists, and obstacles, thereby reducing the risk of accidents.

### EMISSIONS

Controlling emissions is essential to reduce the environmental impact of Vehicles. Accurate testing measures gases and particulates, ensuring compliance with standards, improving engine efficiency, and contributing to cleaner cities and healthier air for everyone.

### ENGINE POWER

Engine power, whether from internal combustion or electric motors, is crucial for Vehicle performance, acceleration, and efficiency.

# TYPE APPROVAL OF THE MAIN UNECE REGULATIONS

## CYBERSECURITY

With the rise of connected and automated Vehicles, cybersecurity has become essential to protect vehicle data, electronic control systems, and passenger safety.

The UNECE regulations, (UN Regulation No. 155 and 156), set strict requirements to prevent unauthorized access, cyberattacks, and tampering with vehicle software and networks. Compliance with these regulations ensures that Vehicles are not only safer and more reliable but also meet international standards, reducing risks and vulnerabilities in modern mobility.

## INSPECTION BODY

ATS Group is an inspection body accredited by the Italian accreditation body "Accredia" in accordance with the ISO/IEC 17020:2012 standard.

As an inspection body, ATS Group exclusively carries out conformity assessment activities and is therefore a third-party organization.

The inspection body must ensure that all inspections are conducted with impartiality, independence, and competence.

At the conclusion of the inspection phase, the body issues a final inspection report in which the activity records are documented, indicating whether or not they comply with a standard.

A photograph of a hand holding a wooden-handled stamp with a brass base, positioned over a document. The background is blurred, showing a person in a white shirt. A large, dark blue diagonal shape is overlaid on the left side of the image.

## CERTIFICATION BODY

### ACCREDITED BODY

ATS is a certification body accredited by the Italian accreditation body Accredia pursuant to the ISO/IEC 17021-1:2015 standard.

### AUDITING

Through a network of experienced and qualified auditors with proven expertise in the sector, ATS ensures competence and flexibility in its activities. With this approach, ATS Europe provides additional solutions to fully meet its clients' needs, facilitating the attainment of the following certifications.

### ISSUE OF CERTIFICATIONS

Following auditing, ATS, as a certification body, is able to issue mandatory and voluntary certifications.

# ISSUE OF CERTIFICATIONS

## ISO 9001:2015

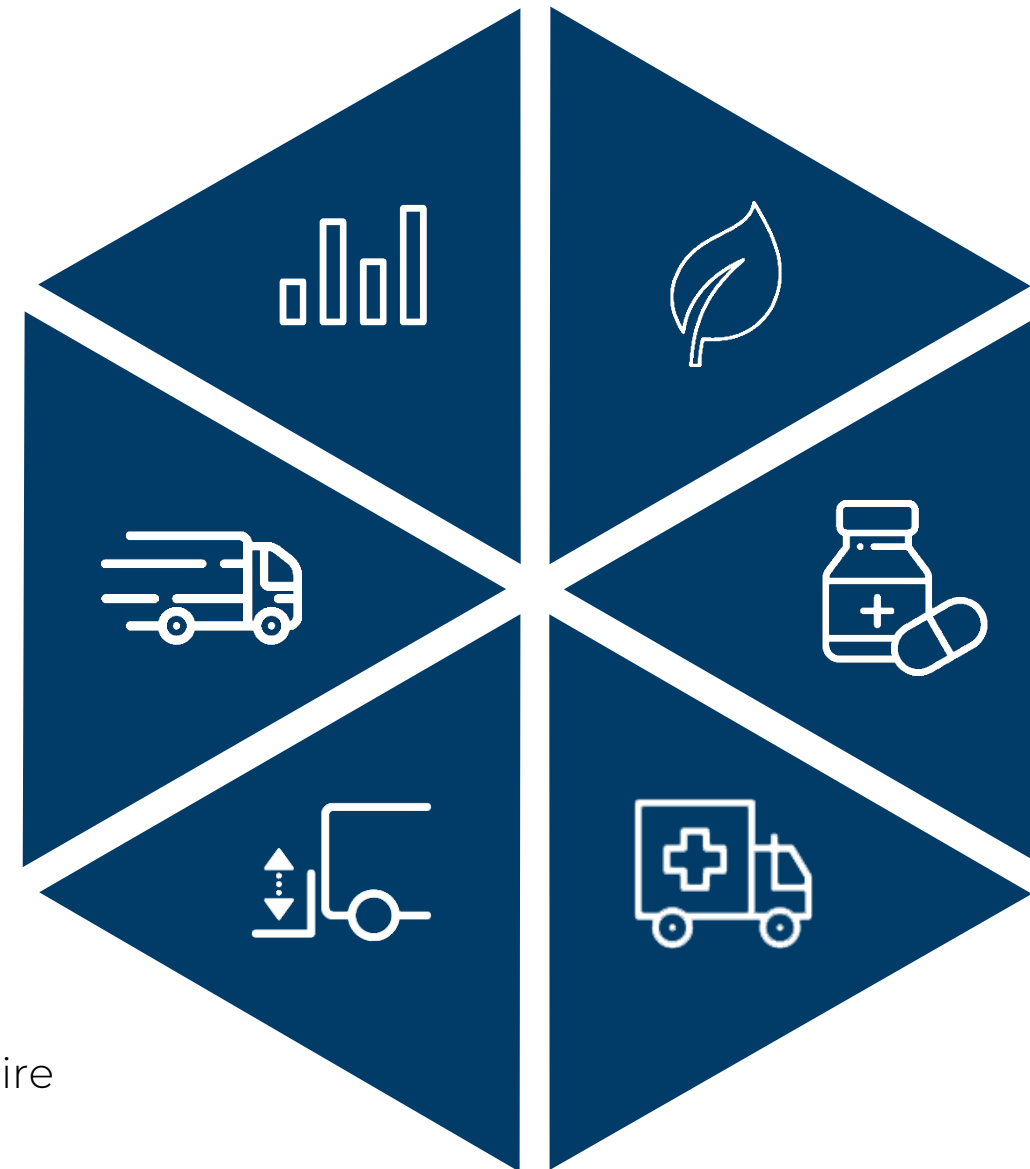

Quality Management Systems and Management Systems in general.

## EN 12642 XL

Structural strength of the Vehicle walls designed for load securing.

## ATS LIFT

Certification of Lift Gate Sides and the entire supply chain of end users.

## ISO 14001:2015

Environmental Management Systems.

## ISO 13485

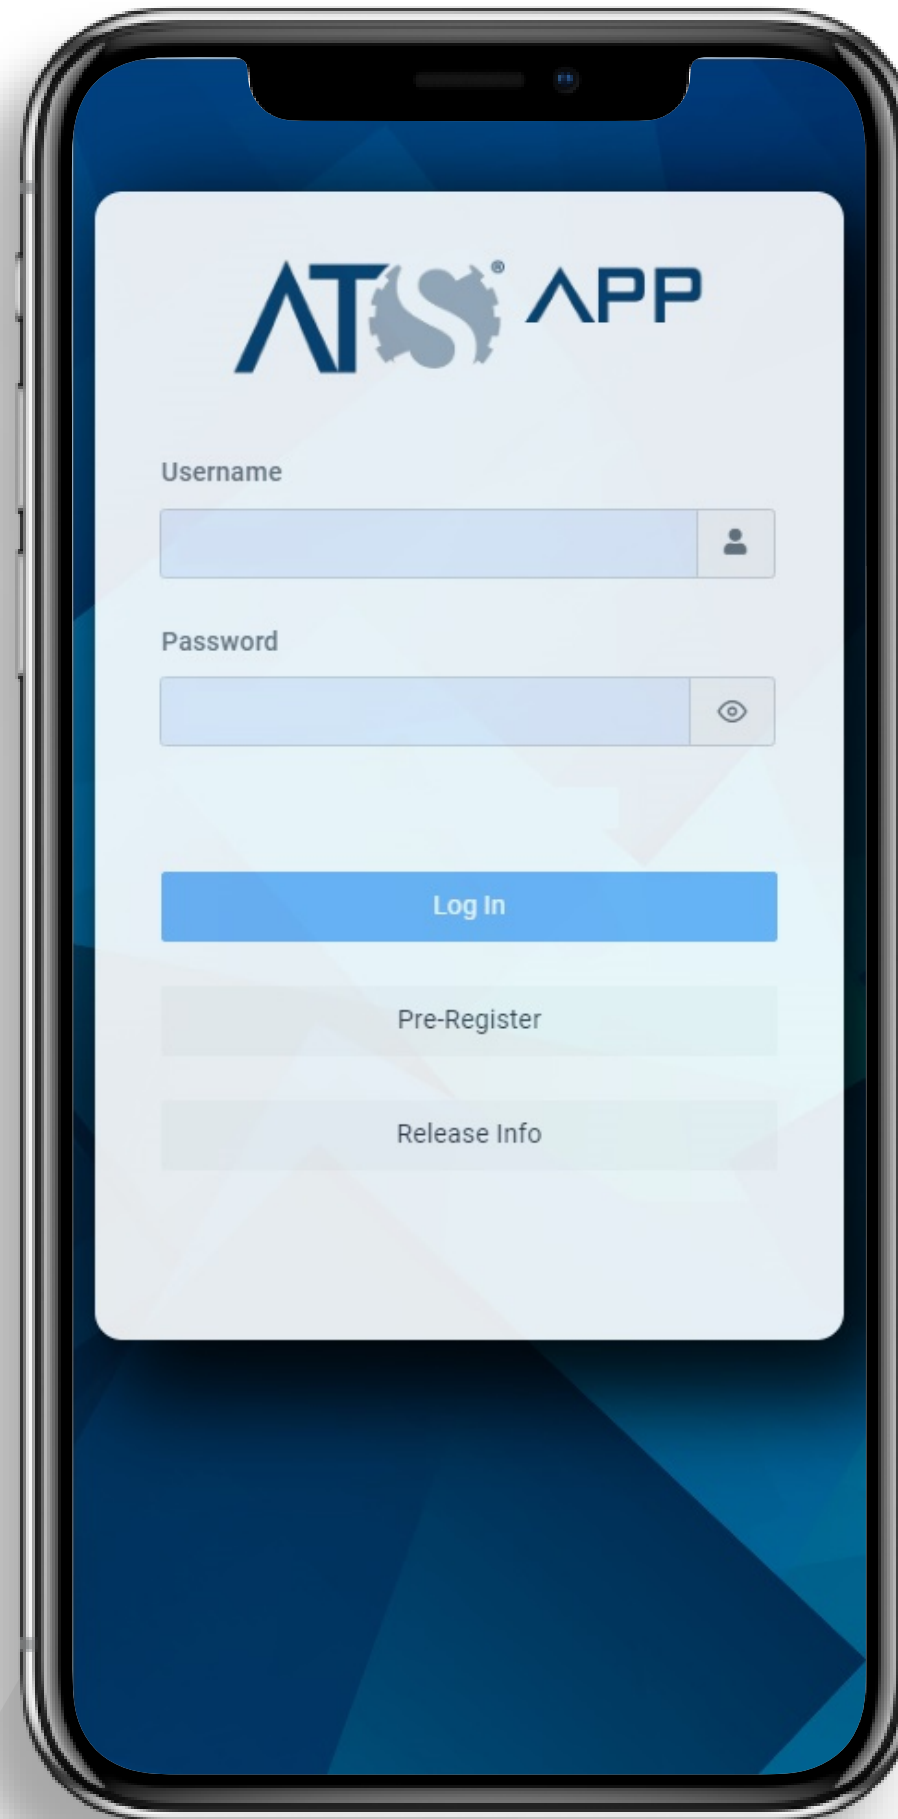

ISO 13485 contributes to ensuring the quality and safety of medical devices.

## ATS PHARMA

Good Distribution Practices for Human Medicines (GDP Certification)).

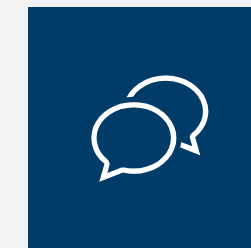

ATS App is the real strength of our technical service.  
ONE APP FOR MULTIPLE FUNCTIONS: A single enterprise cloud platform, developed entirely by and for ATS.  
An incredible tool that distinguishes us from any other Technical Service.

### DINAMYC

Process progress consultation, approval applications drafting, access to final documentation.

### FUNCTIONAL

Preparation of estimates, management of final inspection reports, technical / commercial consultation.

### PRODUCTIVE

Skills reporting, access and reporting of A.T.P. / A.D.R. Approval practices.

The ATS GeAR legal database is an advanced and comprehensive resource, designed to provide a simple and intuitive consultation experience. Thanks to its optimized structure, it allows quick and effective access to all the Regulations currently in force in the field of Type Approval. This tool proves to be indispensable for professionals and companies that need to stay up to date, ensuring reliable support in managing the complex regulatory requirements of the sector.

## GUIDELINES

Consult the guidelines to ensure an accurate, compliant, and seamless Approval process.

## AUTOMOTIVE

Stay updated on news and essential information in the Automotive sector with continuous insights and updates.

## E-COMMERCE

Subscribe to the monthly service: full access to features with dedicated support and included updates.

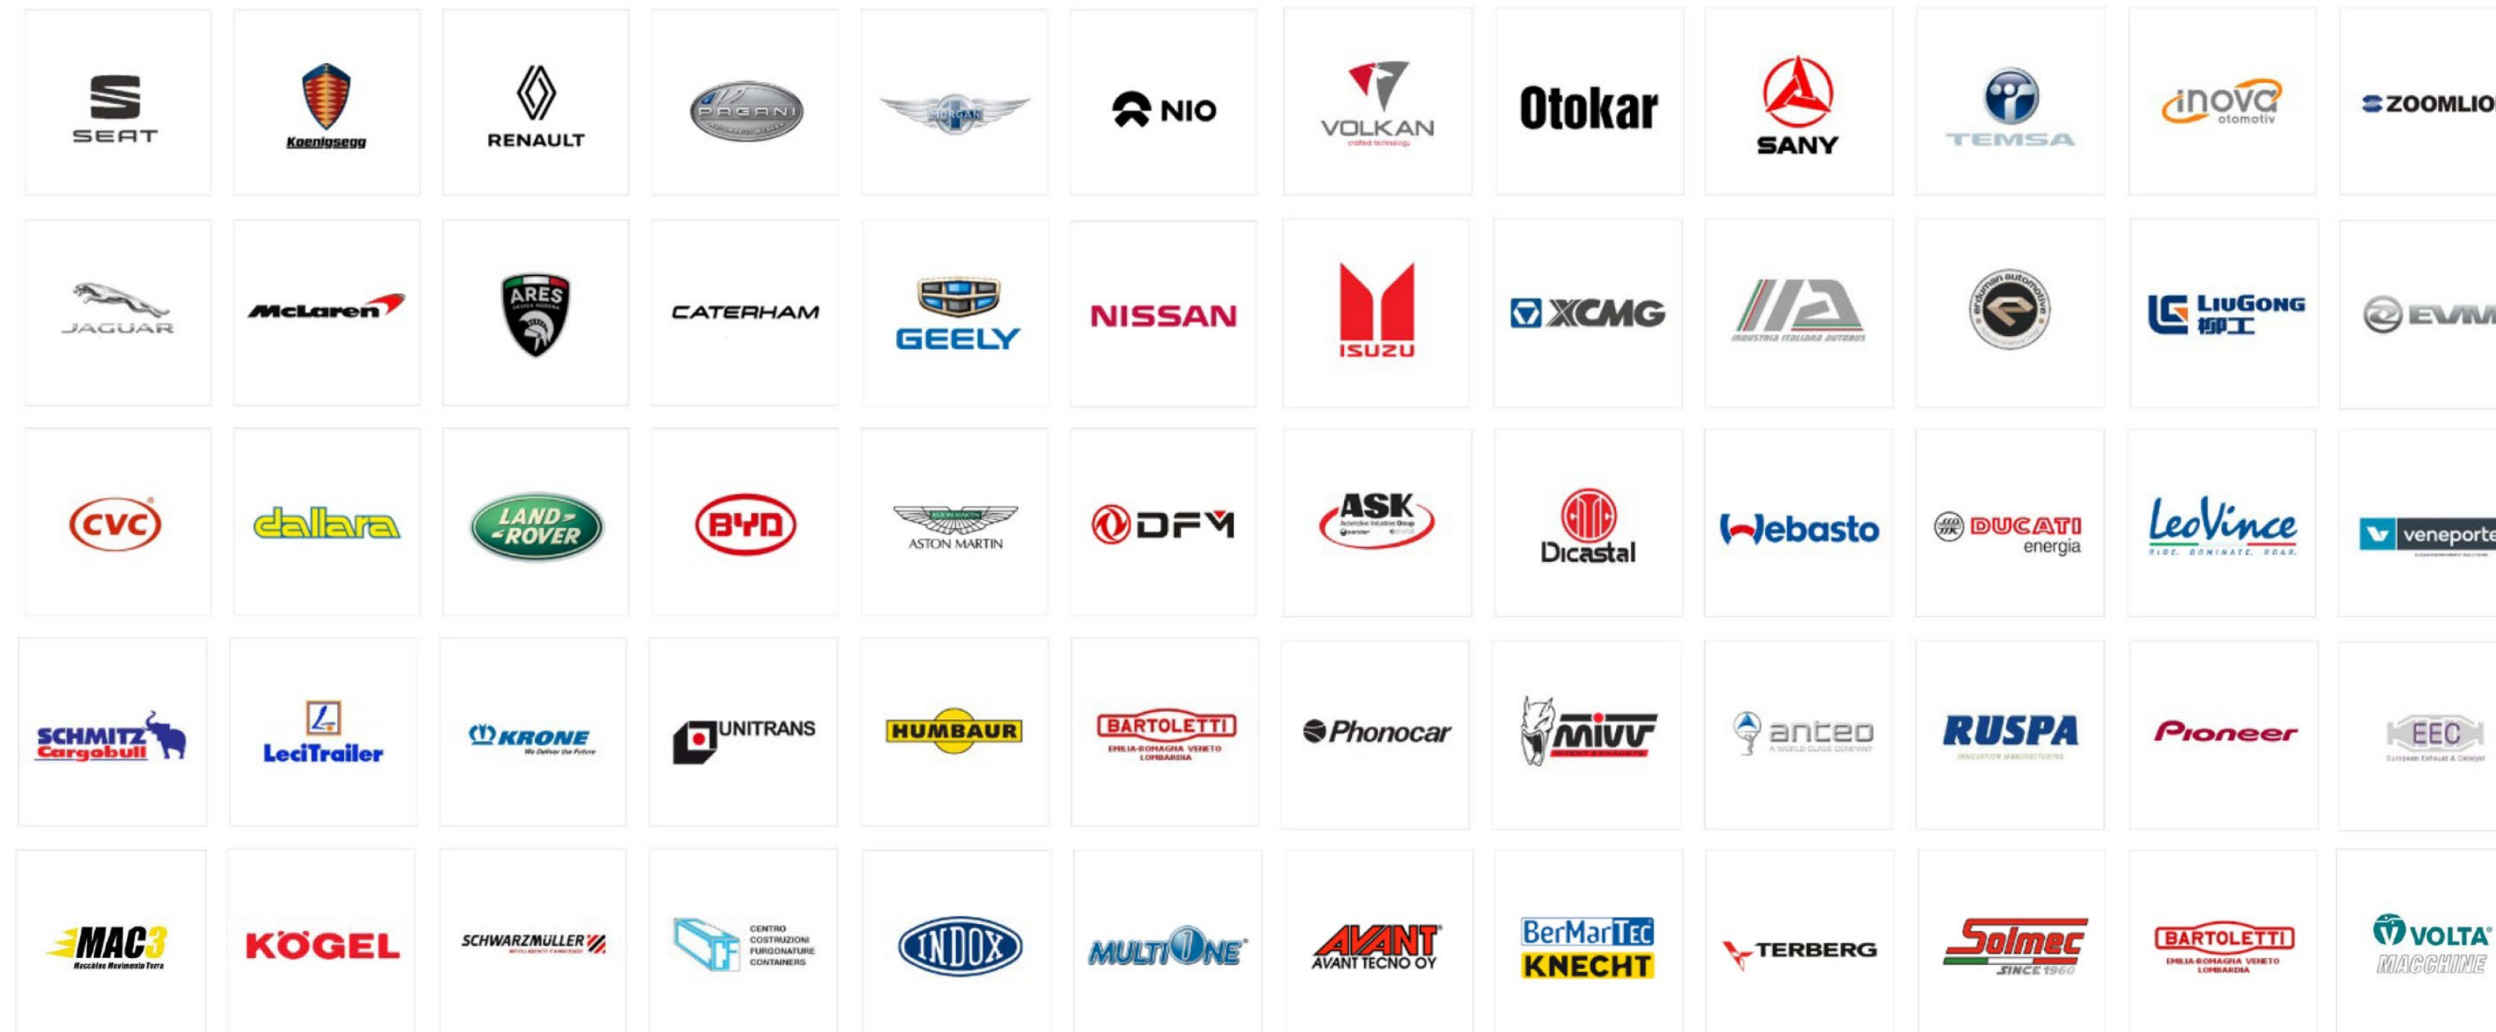

## REGULATIONS

Easily access official UN ECE and CE regulations: updated standards to ensure compliance and technical accuracy.

# ATS ACADEMY

ATS Academy, the training division of ATS Group, offers specialized courses: Technical Training (certification for the safe and compliant operation of machinery and special vehicles), Safety Training (to ensure a safe work environment), Safe Driving Courses (to handle any on-road situation and refine control techniques), Automotive Training (to work in the modern vehicle sector), and Medical Training (to update and specialize healthcare professionals). The Academy also provides the option for remote e-learning.

Some of the most important manufacturers with which ATS Group and/or its experts have collaborated.
