A NEW-AGE LMS BUILT FOR COMPREHENSIVE TEST LIFECYCLE MANAGEMENT (TLM)

Unify your test planning, resource scheduling, lab
operations, and test data management seamlessly
with TITAN.

WHAT IS TITAN ?

TITAN is a comprehensive Test Lifecycle Management solution. It acts as a single source of truth for your entire verification and validation process.

Instead of using fragmented tools for test planning, lab booking, data tracking, and reporting, TITAN brings everything into one unified system— making your test process simpler, faster, and more efficient.

What Does TITAN Do?

Titan creates a digital thread that connects every activity—from planning and scheduling to execution, reporting, and maintenance.

It enables:

- Clear assignment of tasks and responsibilities
- Real-time visibility into test schedules and progress
- Centralized capture of test data, results, and deviations
- Easy traceability and accountability across the test lifecycle

Why TITAN?

With Titan, teams avoid the hassle of managing disconnected tools and manual spreadsheets.

It helps you:

- Streamline workflows across test and lab operations
- Improve team collaboration and communication
- Boost efficiency across people, labs, and test equipment
- Support business agility while reducing software costs

Who Is It For?

Titan is designed for Product Development and Testing teams—from engineers and schedulers to lab managers and leadership.

Whether you run an in-house test lab or a certification facility, Titan brings structure, visibility, and control to your test lifecycle.

Business level struggles in fulfilling modern Testing needs:

Fragmented tool landscape

Lack of harmonized user

Outdated tools & technologies

Non-seamless information flow

Speed in fulfilling business

Leadership Struggles with Slow Access to Critical Information

When key insights are buried in disconnected tools and manual reports, leadership is forced to rely on slow, error-prone data compilation—wasting time, increasing costs, and reducing agility.

Daily challenges faced by the team

What is the status of my test?

Is test data ready for analysis?

Engineer

How can i accommodate last minute schedule changes?

Scheduler

How best to run the test?

When can i run the test?

Technician

What is overall project health?

What tests need my help?

Manager

FROM STRUGGLES TO STRUCTURE:

TITAN offers a unified, seamless approach to assist with all aspects of a modern test lab.

TITAN for OEMs, Tier-1 Suppliers and Component Manufacturers

01 Risk Mitigation Made Simple

- Project management
- Requirement analysis
- Risk management & analysis
- Traceability matrix

02 Effortless Verification Planning

- DVP management
- Test templates
- Test cases
- Test article management

03 Resource Harmony in Testing

- Dynamic test calendar
- Resource allocation
- Test facility management
- Equipment management
- ATD management

04 Execute Your Testing Operations With Precision

- Manage test execution process
- Configurable test workflow
- Reusable checklists
- Issue management

05 Maximize Your Data Control

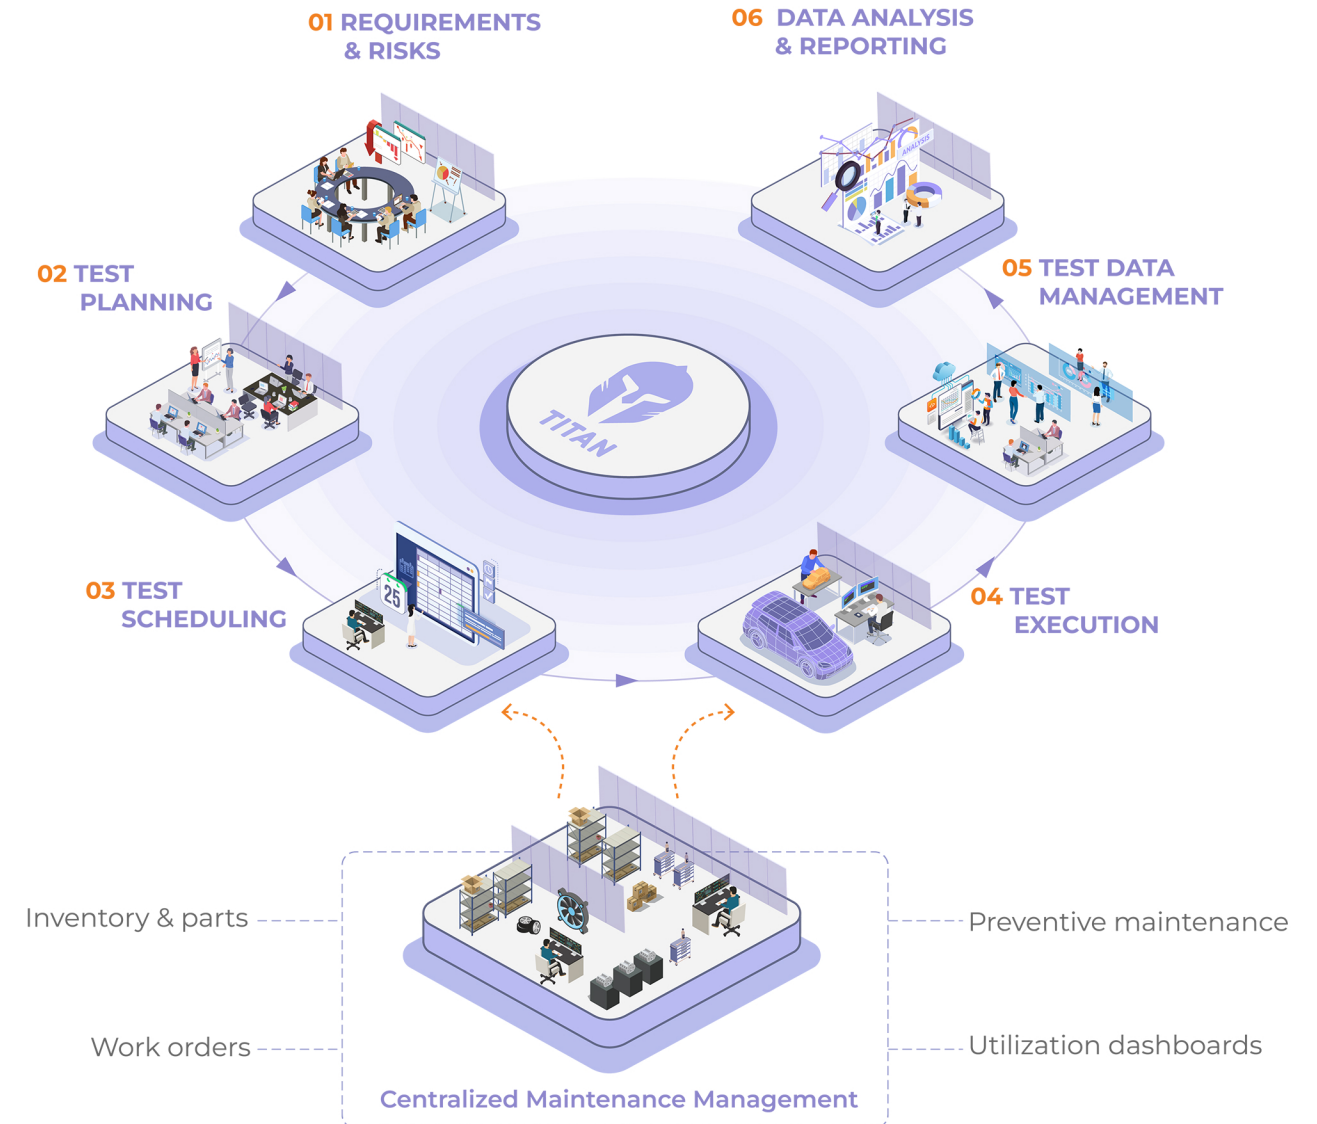

- Meta-data rich knowledge repository
- Any data file format or size

06 Insightful Reports, Instantly

- Automated test report generation
- KPI reports
- Data post-processing

Connect, control, and elevate your Test Lifecycle

Titan is designed for enterprise-scale testing ecosystems and requirement-driven programs—whether internal or customer-led. Plan complex test campaigns, coordinate resources, maintain traceability, and generate compliance-ready reports—all from a single, unified system.

TITAN for Testing, Inspection & Certification (TIC) Labs, and Proving Grounds

01 Customer Booking Made Simple

- Customer account & contact management
- Test request intake and approval workflow
- Inwarding test article info (serials, docs, specs)
- Auto-generated cost & resource estimates

02 Test Planning for Lab Efficiency

- Test plan & sequence management
- Standardized test templates
- Test article preparation and inspection

03 Resource Harmony in Testing

- Dynamic test calendar
- Resource allocation
- Test facility management
- Equipment management
- ATD management

04 Execute Your Testing Operations With Precision

- Manage test execution process
- Configurable test workflow
- Reusable checklists
- Issue management

05 Maximize Your Data Control

- Meta-data rich knowledge repository
- Any data file format or size

06 Insightful Reports, Instantly

- Automated test report generation
- KPI reports
- Data post-processing

Next-generation Lab Management System (LMS)

Titan transforms the way you manage customer testing requests—bringing structure and speed to your lab. It keeps your lab and assets running efficiently, enabling collaboration, traceability, and repeatable high-quality outcomes.
