

Increase output and efficiency by transforming a collection of test systems into managed lab

In every automotive test laboratory, more and more emphasis is being put on improving efficiency and output. In order to do both, today's lab manager must address these four major challenges:

- Many tasks that have traditionally been done manually must now be automated by a lab management system.
- This same lab management solution must be able to integrate test cell automation systems from multiple vendors.
- The current test cell utilization must be accurately tracked in order to identify existing inefficiencies and target areas for improvement.
- Large amounts of data must be stored in one central location, with easy but secure access.

A&D's LabWorX® addresses all of these issues and more, providing solutions for the integration of any test system, central data storage and retrieval, utilization tracking, and unattended 24/7/365 operation.

The Customizable Adaptable Lab Management Glueware Suite that Connects Your Existing Lab Tools to Improve Process Quality and Operational Efficiency at the Lowest Lifetime Cost.

A&D's Team of Compassionate Experts is Always Available To Help With Troubleshooting, Consulting, and Programming On-Demand Modifications to Integrate New Custom Processes into Your LabWorX System

AUTOMATE, DIGITIZE, AND STREAMLINE ANY PROCESS

Detect Downtime
Crisis Management
Inventory Management
Workload Management
Equipment Life Tracking
Facility Conditions Monitoring
Multi-Lab Testing Queue
Skills Tracking
Forecast Accuracy
Process Audit
Performance Monitoring

IF YOU CAN DOCUMENT THE PROCESS, WE CAN CODE IT!

1. Establish a Team
2. Create Process Flowchart Maps
3. Identify Process Elements, Decision Points, Software, Roles & Responsibilities...A&D Does the Rest!

A&D's LabWorX® provides solutions for the integration of any test system, central data storage and retrieval, utilization tracking and reporting, and 24/7/365 operation.

Benefits

- Increased lab efficiency and output through automation, integration and optimized data management
- Scalable to any lab size; grows with the needs of the lab
- Remote monitoring and notification capabilities allowing for reduced overhead

Features

- Centralized data storage and retrieval capabilities for managing multiple terabytes of data
- Seamless integration of test systems from multiple vendors
- Configurable dashboards providing customized views to all test systems
- Automated test cell utilization tracking and reporting

System Architecture

Standard LabWorX® Components

LabCentral®

The centralized server that provides data storage and retrieval, test system utilization tracking, test request scheduling, as well as live monitoring of any system through configurable dashboards.

LabMinder

An automated notification and response system that allows for 24/7/365 unattended operation; the system can be configured to provide specific responses when certain errors occur, and notify designated personnel of significant events by text or email.

LabReporter

An automated report generator that formats incoming data and makes it available via the LabCentral server.

LabApps

Android-compatible apps that provide notification and response capabilities via hand-held devices.

Test System Agent

The Test System Agent is an interface package required for integrating any test system with LabWorX. LabAgent is included with any A&D's software, while an LabAgent plug-in is available for use with standard third-party test systems. iViewBox is an IO package that provides the interface to third-party hardware-only test systems.
