

**MOTILE Standardizes Testing Everywhere**  
Create uniform, repeatable NVH environments without permanent track construction

# NVH Testing Varies by Site

## Leading to Inconsistent Results and Late-Stage Quality Issues

### Cut Validation Time, Standardize Tests

Motile enables OEMs to execute the same test anywhere, anytime by delivering uniform, repeatable surface conditions.

### Higher Quality, Fewer Resources

Accomplish more with your staff. Motile reduces prep time and ensures consistent results—meet aggressive launch metrics.

### Early Detection, Reduce Warranty Cost

Motile exposes BSR and NVH issues earlier in development. Cut claims, boost durability scores, strengthening brand perception.

### Repeatable Test Conditions Anywhere

Test at any site - plant, proving ground, or supplier. Ensuring consistent data, for accurate decisions and predictable outcomes

**The Result: Predictable Outcomes, Faster Root-Cause Detection, Fewer BSR Surprises**

V.10.0

-  Made in U.S.A.
-  Each individual section measures 4'x6'
-  Usable on top of nearly any surface
-  Usable in any weather condition
-  Portable, interlocking surfaces
-  Fully customizable surface designs
-  Space-saving solution versus a fixed test track
-  Time-saving solution vs. concrete construction
