

THE FUTURE OF AUTOMOTIVE TESTING

MOBILITY & SAFETY | EXPERTS IN CONDUCTING VEHICLE CRASH TESTS

Providing Premier Automotive Testing Services to the Transportation Industry

- Calspan has a rich history dating back to the 1940s, when it was originally founded as Cornell Aeronautical Laboratory (C.A.L.). Over the years, the company has grown and evolved into a premier provider of testing and technology development services, solutions, and systems for the aerospace, defense, and automotive industries. Calspan's focus is on "Testing the Future," which means partnering with government and commercial customers to solve some of the most challenging technological problems.
- Calspan's wide range of tools and capabilities are what sets it apart from its competitors. The company boasts advanced modeling and simulation tools, which allow for the exploration of complex engineering problems in a virtual environment. In addition, Calspan operates world-leading testing laboratories that offer comprehensive and accurate data on product performance, safety, and reliability.
- Calspan's support covers all stages of product development, from fundamental research to manufacturing validation. The company's services include aerodynamics testing, aircraft and ground vehicle testing, materials and structures testing, tire testing, and crash testing. With such a broad range of capabilities, Calspan is uniquely positioned to offer its customers a complete solution for their testing and technology development needs.
- As a trusted partner for both government and commercial customers, Calspan has a reputation for delivering innovative solutions and high-quality results. Whether it's developing new technologies, testing cutting-edge products, or improving existing systems, Calspan is committed to helping its customers stay ahead of the curve and achieve their goals.

About Us

Calspan Mobility & Safety provides premier automotive testing services to the transportation industry to help make vehicles and roadways safer. Calspan operates as an independently owned and operated automotive testing site that values customer security and confidentiality.

Calspan's four automotive business units are Crash Testing, Sled Testing, Tire Testing, and Barrier Testing. They feature multiple state-of-the-art facilities and high-quality testing equipment to deliver concise, accurate data. Calspan's talented teams collaborate to ensure testing programs proceed in a successful manner.

Industry Leading Capabilities

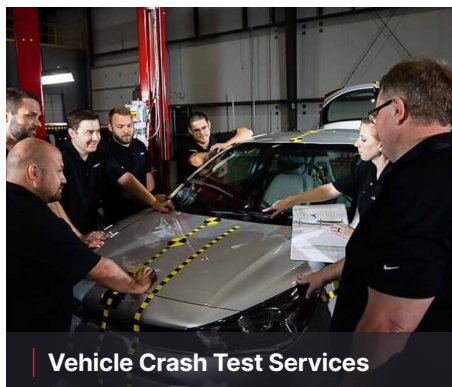

From talented team members to robust testing equipment, Calspan maintains the best environment for producing reliable testing results. We don't see limitations, only opportunities to discover a better way of validating customer projects. Trust Calspan to be your capable testing partner.

State-of-the-Art Facilities

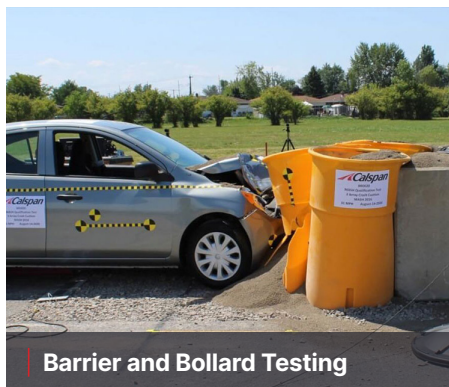

Calspan recently built new, modern facilities for Crash Testing and SLED Testing to offer customers an impressive testing experience and secure environment. The Crash Hall features MESSRING equipment (the gold standard in the industry), and the SLED lab features two ServoSleds, a 3.1 MN and 1.0MN. Both facilities also feature private customer work areas and storage space for test articles or other equipment.

Customer Centricity

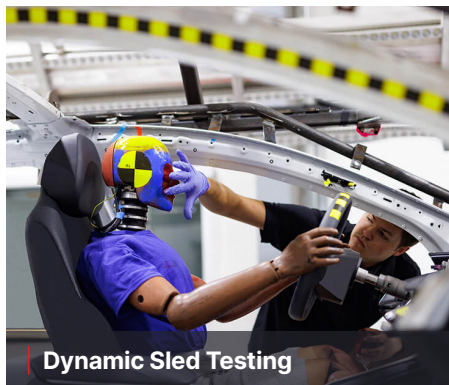

Calspan's teams proudly dedicate their time to providing top-tier customer service. We work diligently with our customers through every stage of product and test development to deliver the best results with the least amount of stress.
