

AUTOMOTIVE TESTING EXPO
NORTH AMERICA 2026

OCTOBER 27-29 | NOVI, MI
VISIT BOOTH T1652

Software. Systems. Solutions.

Practical technology for engineering and operations teams.

Bring us the workflow that slows you down.

Scattered information. Manual handoffs. Repetitive reporting. Software that no longer fits the work. AEVUS helps define the problem and build a focused path forward.

CUSTOM SOFTWARE

Web and mobile applications, internal business tools, and platforms built around your users and workflows.

AI & WORKFLOW AUTOMATION

Assistants, agents, and repetitive-task automation using approved business information and human review.

SYSTEMS & CONNECTED DATA

System integrations, data architecture, and technical evaluation to connect information and support decisions.

MODERNIZE & SUSTAIN

Application modernization, ongoing support, project leadership, and practical operating improvement.

START WITH ONE CLEAR OUTCOME

Discuss the bottleneck → Define users, data, and permissions → Agree on scope and acceptance criteria → Build, review, and improve

Veteran-founded. Michigan-based. Engineering-led.

Custom delivery informed by product-building experience.
