# GatewayC

# Myeloma - Early Diagnosis

## Overview

This course aims to assist primary care staff who are working with patients facing a possible myeloma diagnosis. You will be presented with interactive video consultations introducing June Taylor, aged 70, who visits her GP for a routine medication review for her arthritis. These are accompanied by a range of activities to reinforce key learning points.

### This course will support you to:

- Recognise common myeloma indicators, such as hypercalcaemia and renal dysfunction
- Distinguishing concerning pain from common back pain in patients
- Effectively monitor patients who have been diagnosed with MGUS
- Confidently assess the need for referral in accordance with NICE NG12 guidelines

## Specialist interviews

- Dr Neil Rabin, Consultant Haematologist, outlining the symptoms of myeloma and appropriate investigations; including the role of serum protein electrophoresis and Bence-Jones protein urine test

## Who is it for?

FREE to all primary care professionals across NHS England, including GPs and practice nurses.

## 2 CPD hours available

**Royal College of General Practitioners**
