

Unplanned Care Overflow Capacity

Medloop is an NHS digital assured provider built in collaboration with primary care practitioners to best serve PCN and patient needs. Our passion is to let the power of technology unlock the potential in primary care. We looked at the post COVID world and designed a way of using our technology to make a real difference. We're not about a quick fix: we want to leave a legacy that can continue to help people for years to come.

Ongoing Benefits

Medloop Software

- Centralised data collection point for PCN
- Software deployed across the PCN for continued efficiencies
- Centralised booking
- All clinicians able to write back to record across PCN

Centrally funded Practitioners

- ARRS FCP and Social Prescribers
- Aligned to both acute and LTCs

Funded long term condition reviews

- Potential for LTC reviews to be externally funded

Better Signposting and engagement

- Defined pathways across the PCN
- Patient engagement and consultation
- Appropriate referral pathways means fewer 111 calls and presentations at ED

PCN Providing innovative solutions

- Develop reputation for innovation excellence
- Continual improvement and solution focused

Partnership commitments

- Committed technology and capacity partner
- Improve access to healthcare for all
