

Planned Care QOF/ LTC reviews & bookings

Medloop is an NHS digital assured provider built in collaboration with PCNs to best serve their needs. Medloop allows practices to optimise their QOF requirements and reduces administrative tasks via clinician-backed technology and empowerment of patients.

Identify, outreach, review & code patients with chronic conditions

- ♥ **Optimise QOF disease registers** by proactively identify and recalling patients due for an annual LTC or medication reviews using automated SMS and in-app notifications and reminders
- ♥ **Prioritise patients according to risk** with the Medloop's unique risk alert notification based on the patient's clinical presentation. The results tab clearly highlights patients to be prioritised
- ♥ **Care plans** completed using the template and sent directly to the patient and filed in the primary record

1. Identify Patients

2. Assign risk to prioritise patients

3. Perform and code Remote Reviews

- ♥ **Conduct comprehensive clinical reviews** by our certified clinical pharmacists at a fraction of the typical cost, thus also enabling practices to keep their internal staff focused on the day to day operations
- ♥ **Code all reviews back into the primary record** saving significant admin time and optimising QOF points
- ♥ **Minimise health inequalities** by listing patients without mobile numbers are listed to allow for alternative contact methods
