

Product **Scanyphe OnDemand**

Customer **Leading North American cyber-insurer**

Assets **> 250K unique IPs**

Project **3 months**

Leading **insurers** understand that managing their customers' exposure to cyber risk must go beyond questionnaires and ratings.

The insurer's business-focused CTI team were already using **ONYPHE** data to get hard metrics on customer exposure to known exploited vulnerabilities & technologies.

Scanyphe OnDemand allowed them to fully integrate our technology with their on-boarding and underwriting processes, scanning customer assets in real-time, identifying risk and reducing claims by more than 60%

Scanyphe OnDemand :

- ONYPHE agentless scanning technology
- identifies hundreds of known-exploited vulnerabilities
- tags and categorises thousands of technologies and configurations
- domain name, FQDN or IP based
- automatic asset discovery process
- no limit on the number of assets
- fixed price per simultaneous scan process
- turnkey SAAS solution
- lightning-fast performance (200 ports @ 1000 IPs < 2 mins)
- access to the raw JSON data and APIs
- optional data-analytics platform
- premium support service
