

Achieve true business transformation using a multi-cloud strategy

Bradley Harrad

Product Marketing and Market Development

11th March 2020

**CLOUD EXPO
EUROPE**

In partnership with

Agenda

- ▶ How cloud is changing business models
- ▶ Current trends that we are seeing
- ▶ New demands on IT
- ▶ Key considerations
- ▶ Cloud as the business enabler

An intro to OVHcloud

About OVHcloud

30 Data Centers
in 12 locations

34 Points of Presence
on a 20 TBPS Bandwidth
Network

2200 Employees
in 12 locations

115K Private Cloud
VMs running

300K Public Cloud
instances running

380K Physical Servers
running in our data
centers

1 Million+ Servers
produced since 1999

1.5 Million Customers
across 132 countries

3.8 Million
Websites
hosting

1.5 Billion Euros
Invested
since 2016

P.U.E. 1.09
Energy efficiency
indicator

20 Years in
Business
Disrupting since
1999

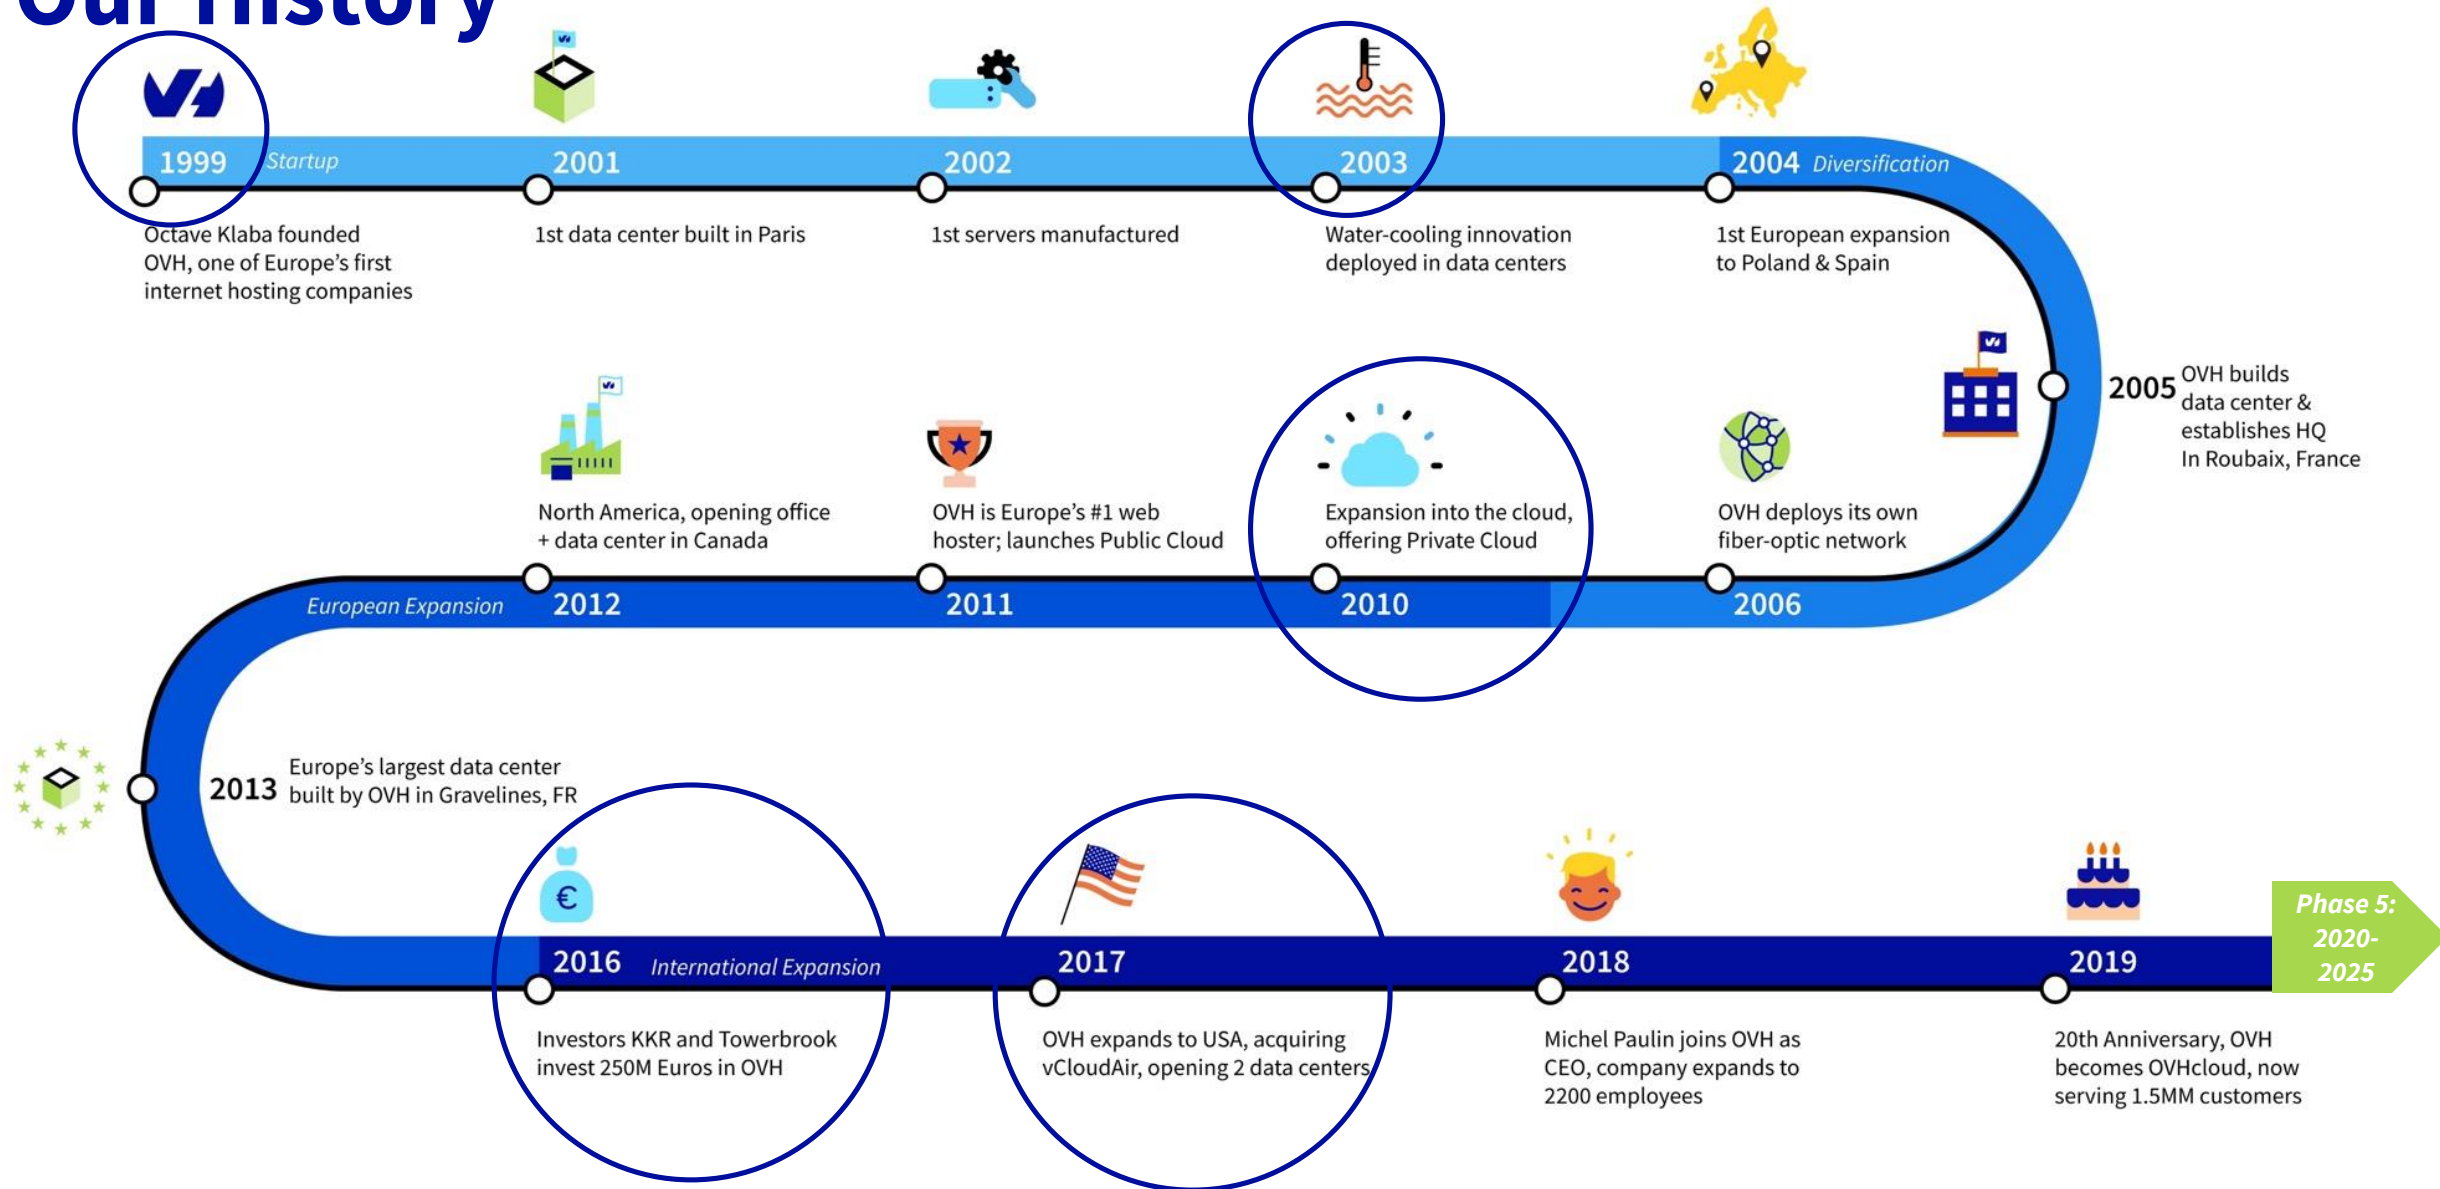

What makes us different?

We believe that how we do business is as important as what we do:

- ▶ We are an alternative cloud and we challenge the status quo.
- ▶ We believe in open standards and being part of an ecosystem.
- ▶ We believe in freedom to build. We are multi-local and committed to innovation.
- ▶ We are committed to environmental sustainability and data security.

Our History

Introduction

Digital Transformation: A Data Odyssey

By 2025, data will be x10 the volume of the total pre-2016 datasphere*.

Exponential data growth challenges IT to manage costs and governance, and plan for new use cases:

- ▶ Edge Computing
- ▶ IoT Platform & Smart Cities
- ▶ Deep Learning & Artificial Intelligence
- ▶ Blockchains & Biochips
- ▶ Autonomous Vehicles, Smart Robots & Drones

**IDC Survey (2017) "Data Age 2025"*

Global IT Workloads

2016 - 160 Million

2021 - 255 Million

2050 - 596 Million

Traditional IT

117 Million

Private Cloud

19 Million

Public Cloud

24 Million

127 Million

48 Million

77 Million

113 Million

173 Million

310 Million

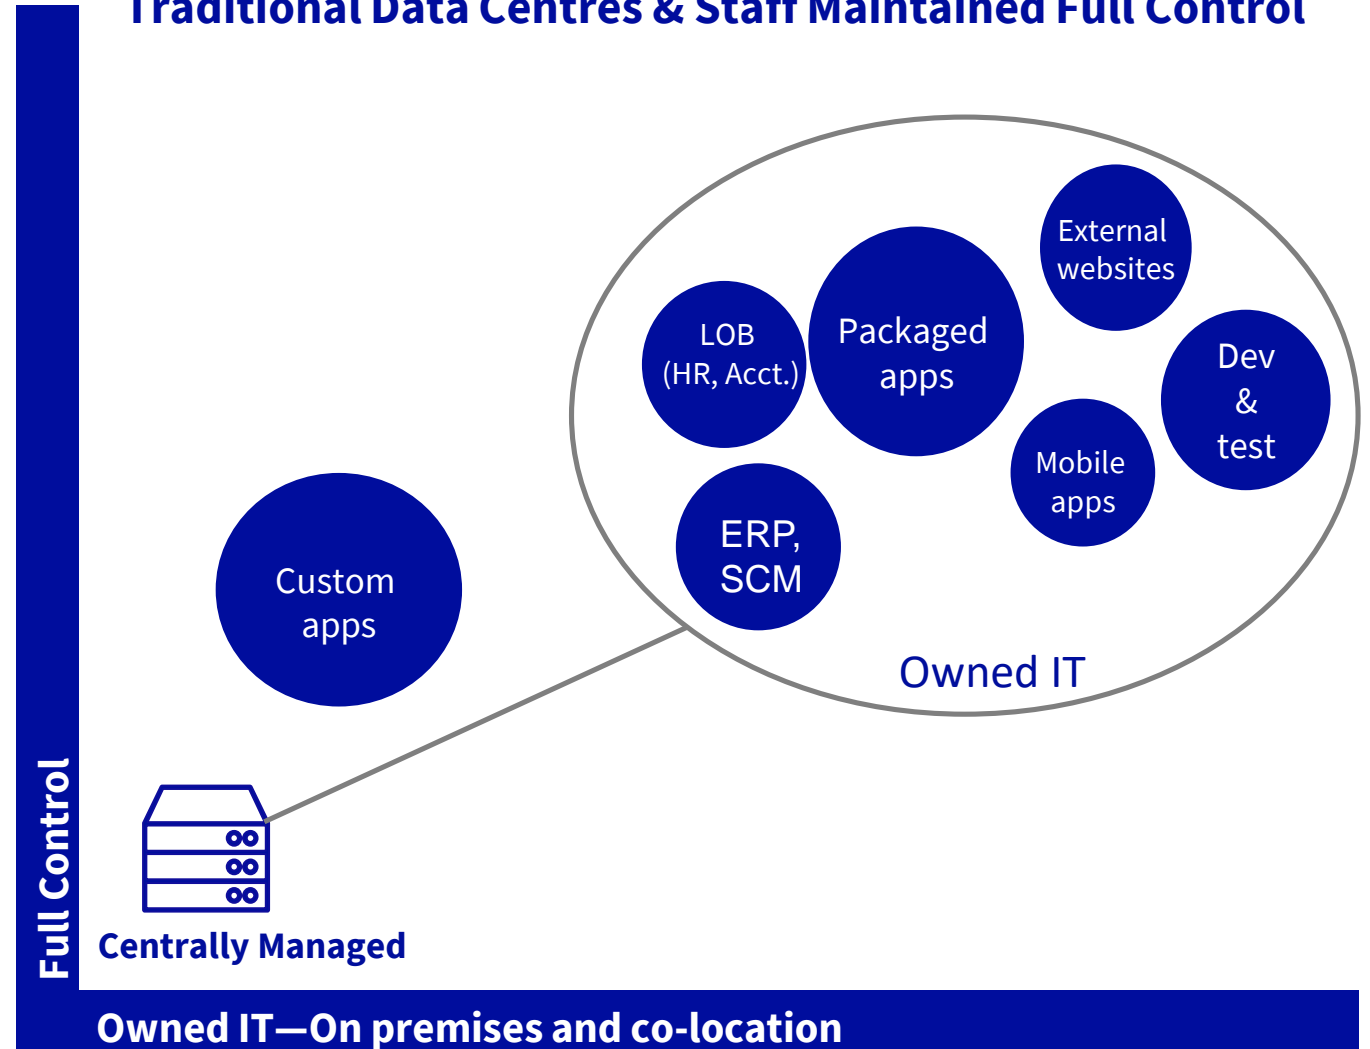

Multi-Cloud is here

Datacentre Evolution

- ▶ **Applications are centrally managed** under one infrastructure
- ▶ **The network perimeter and datacentre boundary** provided protection
- ▶ **IT staff ensured** availability, maintenance, performance, and security

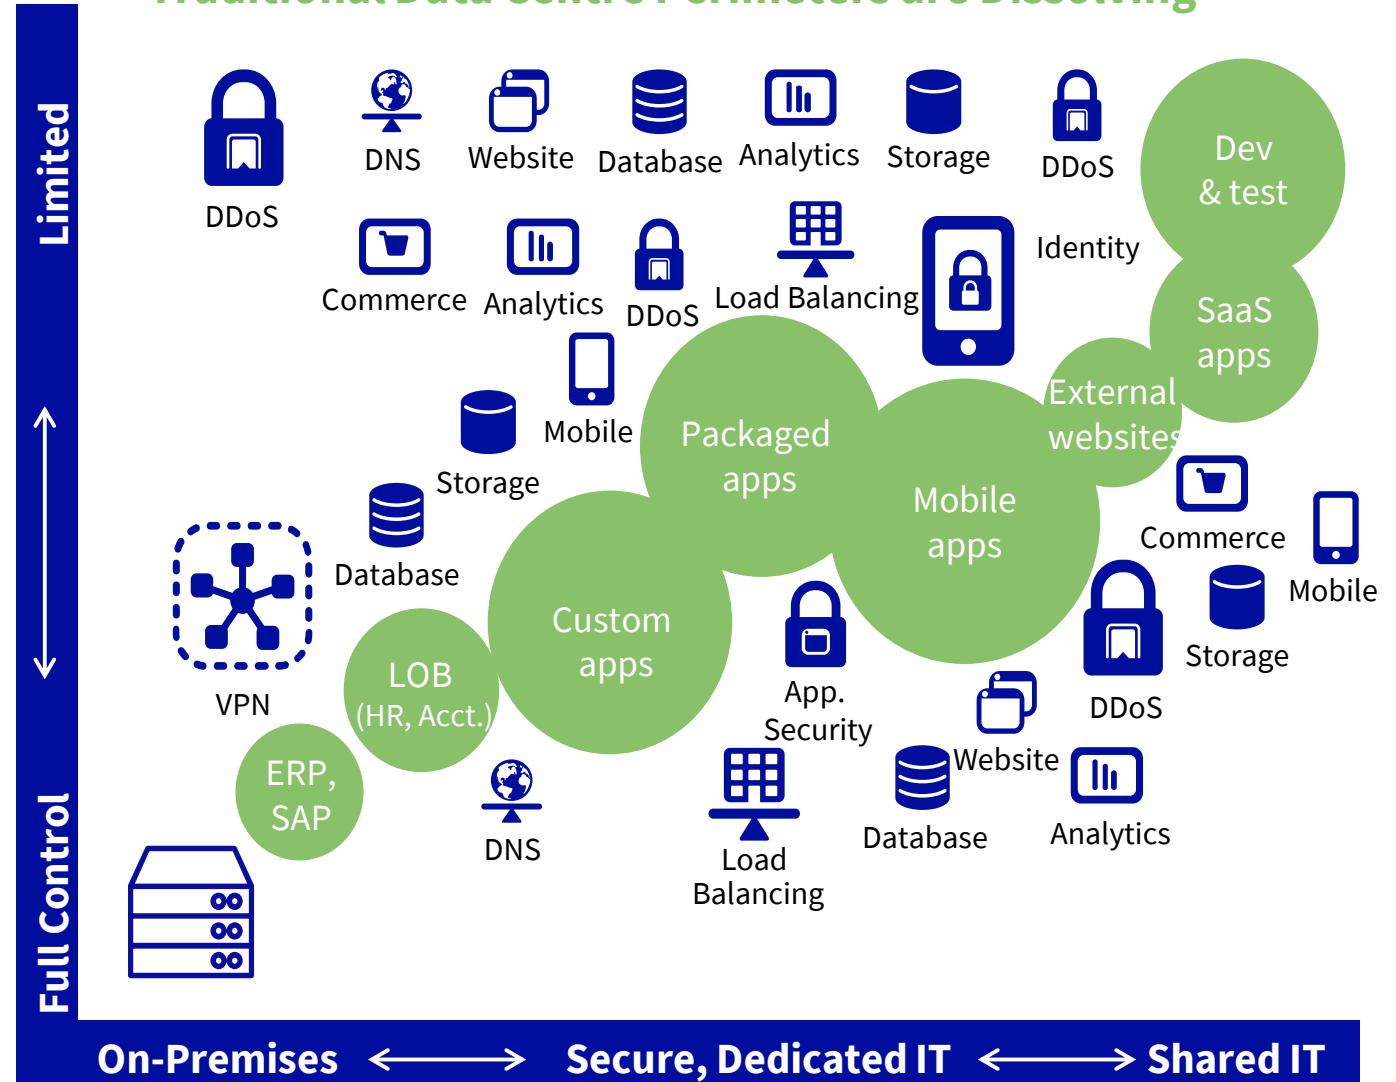

Traditional Data Centres & Staff Maintained Full Control

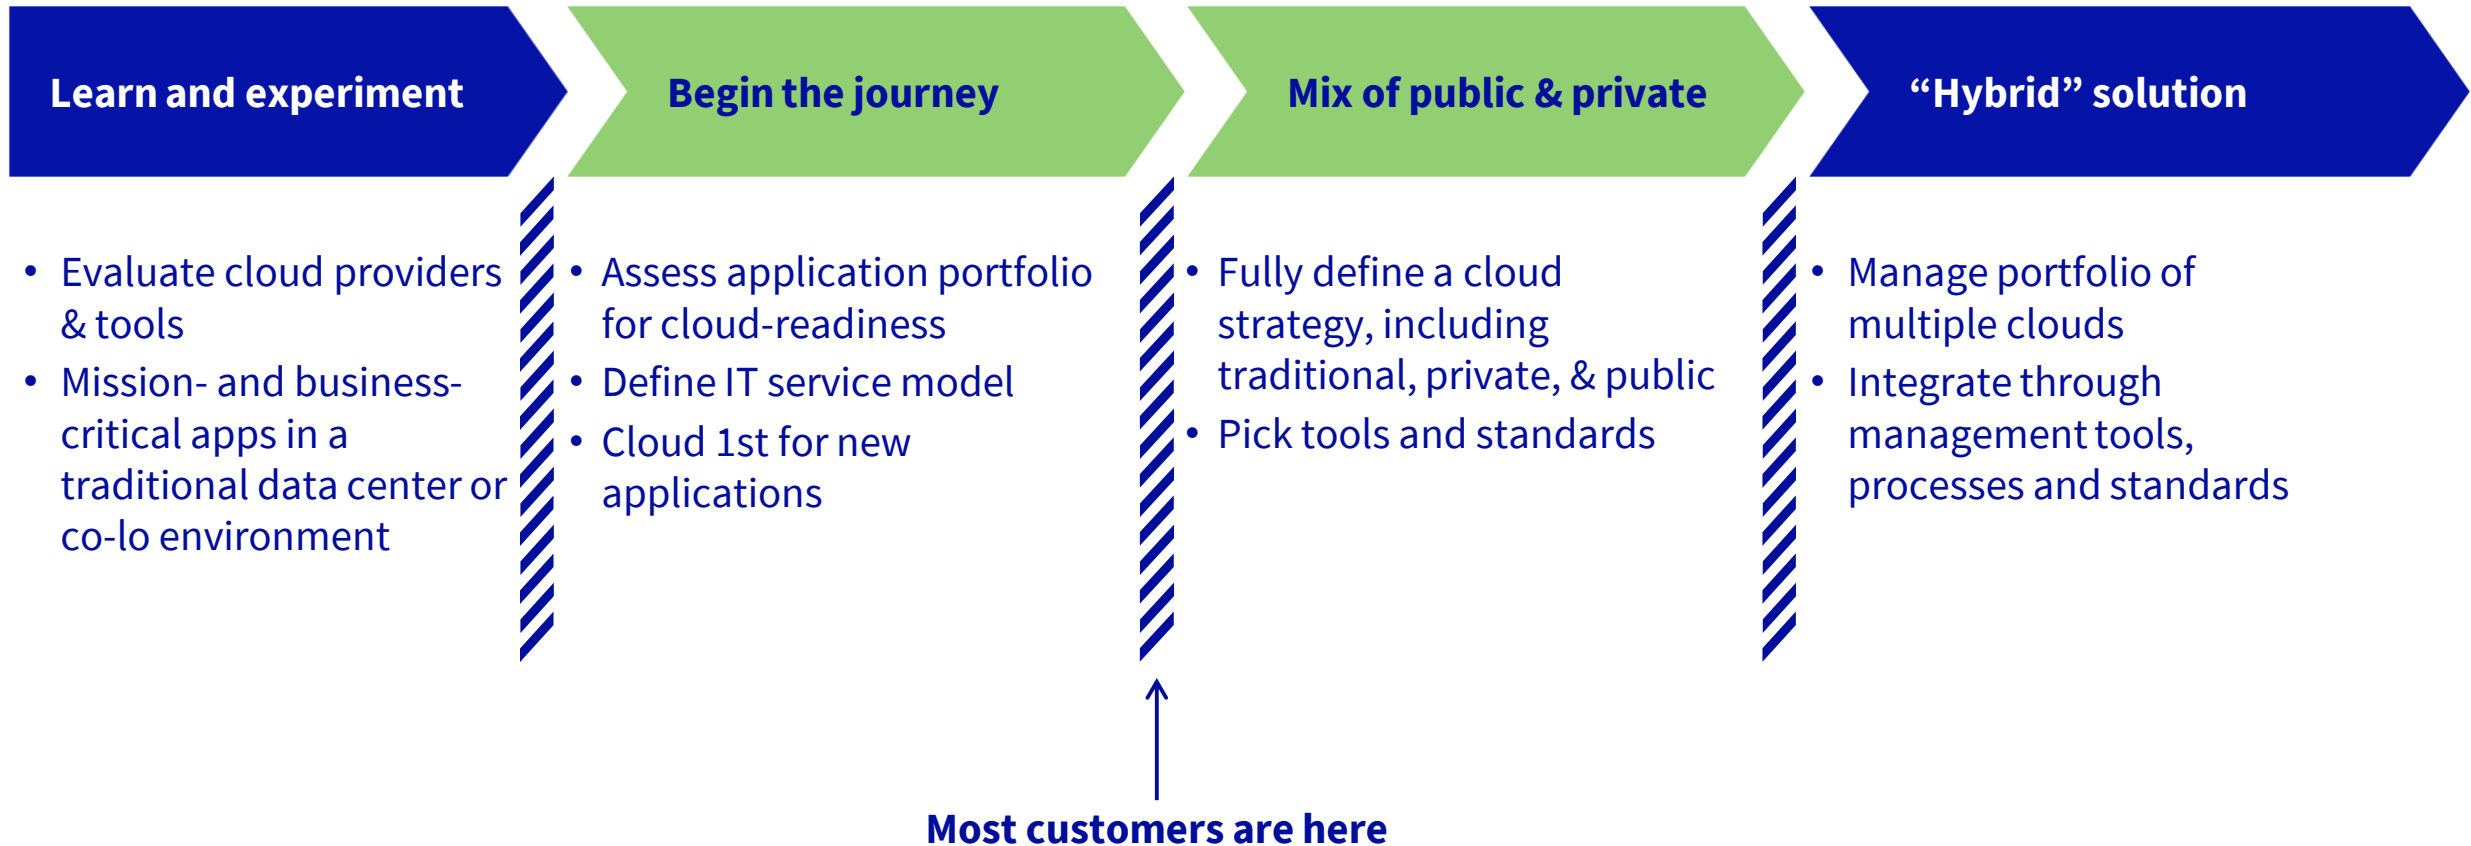

Datacentre Evolution

- ▶ **Niche cloud vendors deliver a services-centric model** via disparate building blocks
- ▶ **Redefines the necessity to create a holistic strategy** for agility, cost management, and performance
- ▶ **Leverage skills and systems** to enable consistent delivery for every application regardless of deployment models
- ▶ **Avoid vendor lock-in**, maintain ability to move

Traditional Data Centre Perimeters are Dissolving

Where is your organisation on the cloud journey?

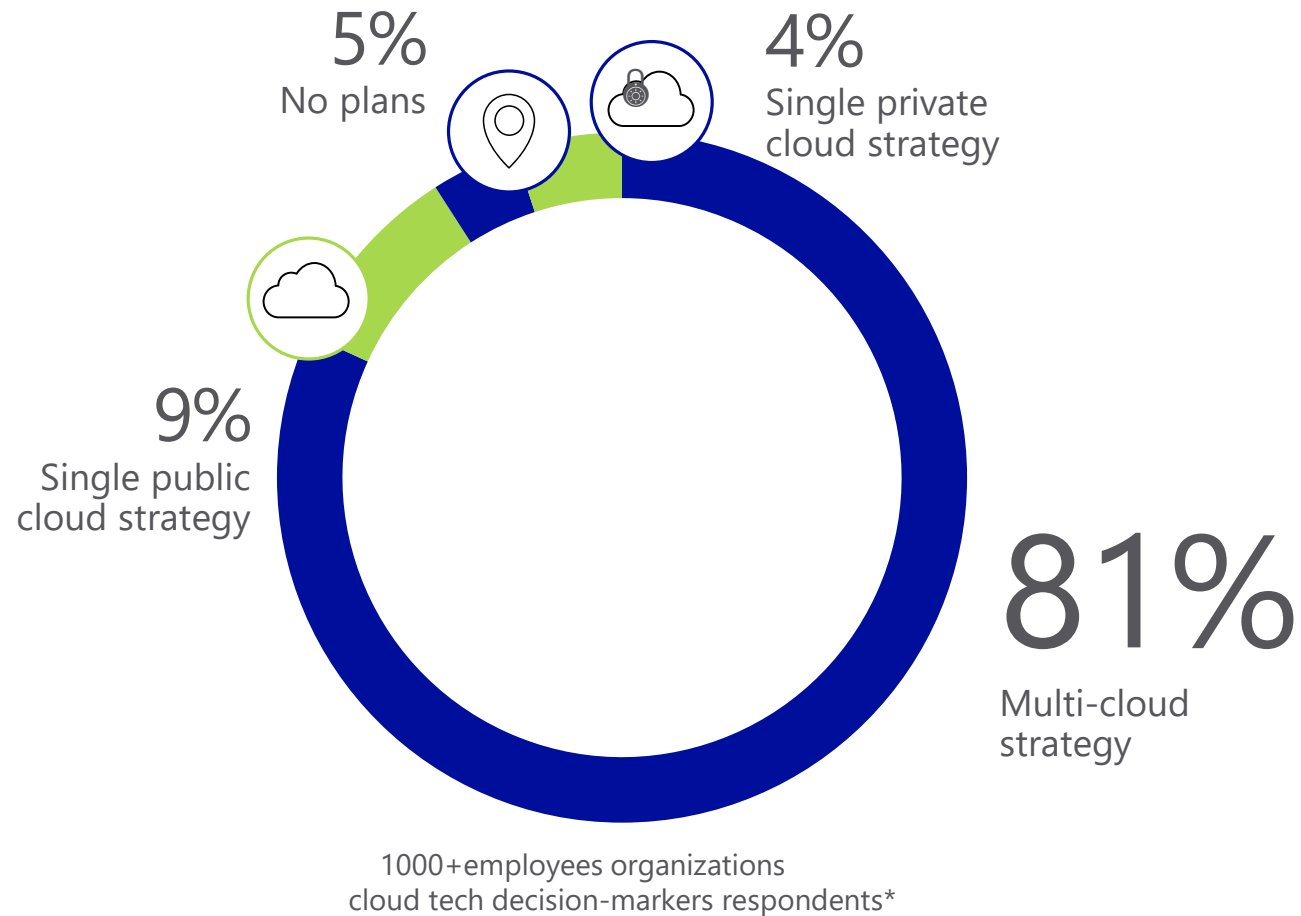

Market Insights

The Enterprise Strategy is Multi-cloud

As Public and Private Clouds Grow, Organisations Focus on Governing Costs

TOP BENEFITS EXPECTED

01

Multi-cloud
offers better IT **cost** management

33% of respondents*

02

Multi-cloud
improves IT infrastructure
management and **flexibility**

33% of respondents*

03

Multi-cloud
Improves **security** and
compliance

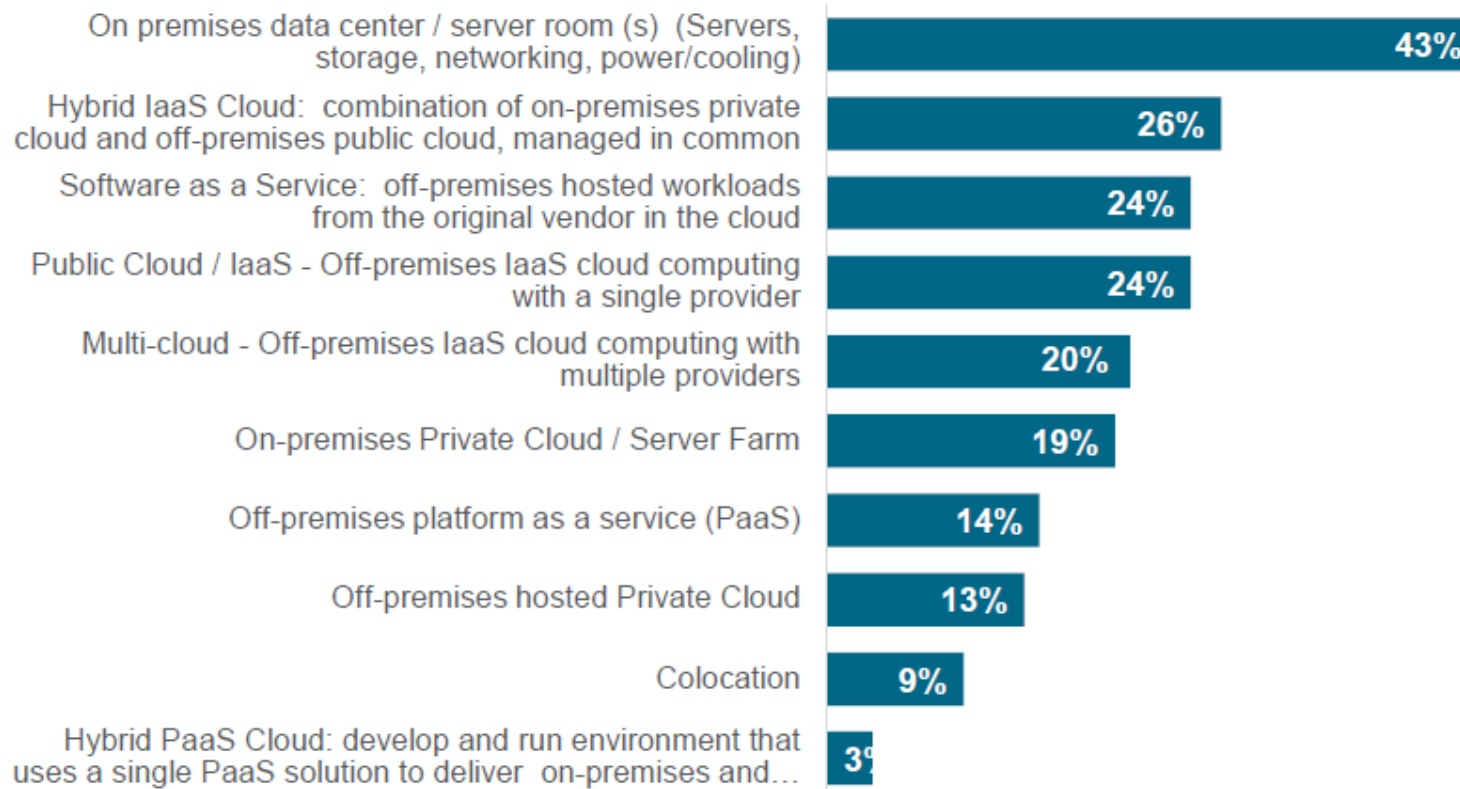

30% of respondents*

Which of these broad initiatives will your company implement in 2019?

Infrastructure in place in 2020

Which of the following infrastructure deployment methodologies will best describe your environment in 2020? (choose up to 3)

Observations

On-premises

infrastructure still most widespread production environment

Hybrid cloud

more widespread – main market

Multi-cloud

more popular choice for larger, global organizations

**So you're cloud-ready,
but
is your cloud
business-ready?**

**CLOUD EXPO
EUROPE**

MISSION POSSIBLE

CLOUD EXPO
EUROPE

Technology that

performs for you.

Cost is no longer the constraint – execution is

Source: 451 Research, Voice of Enterprise: Digital Pulse, Vendor Evaluations 2018

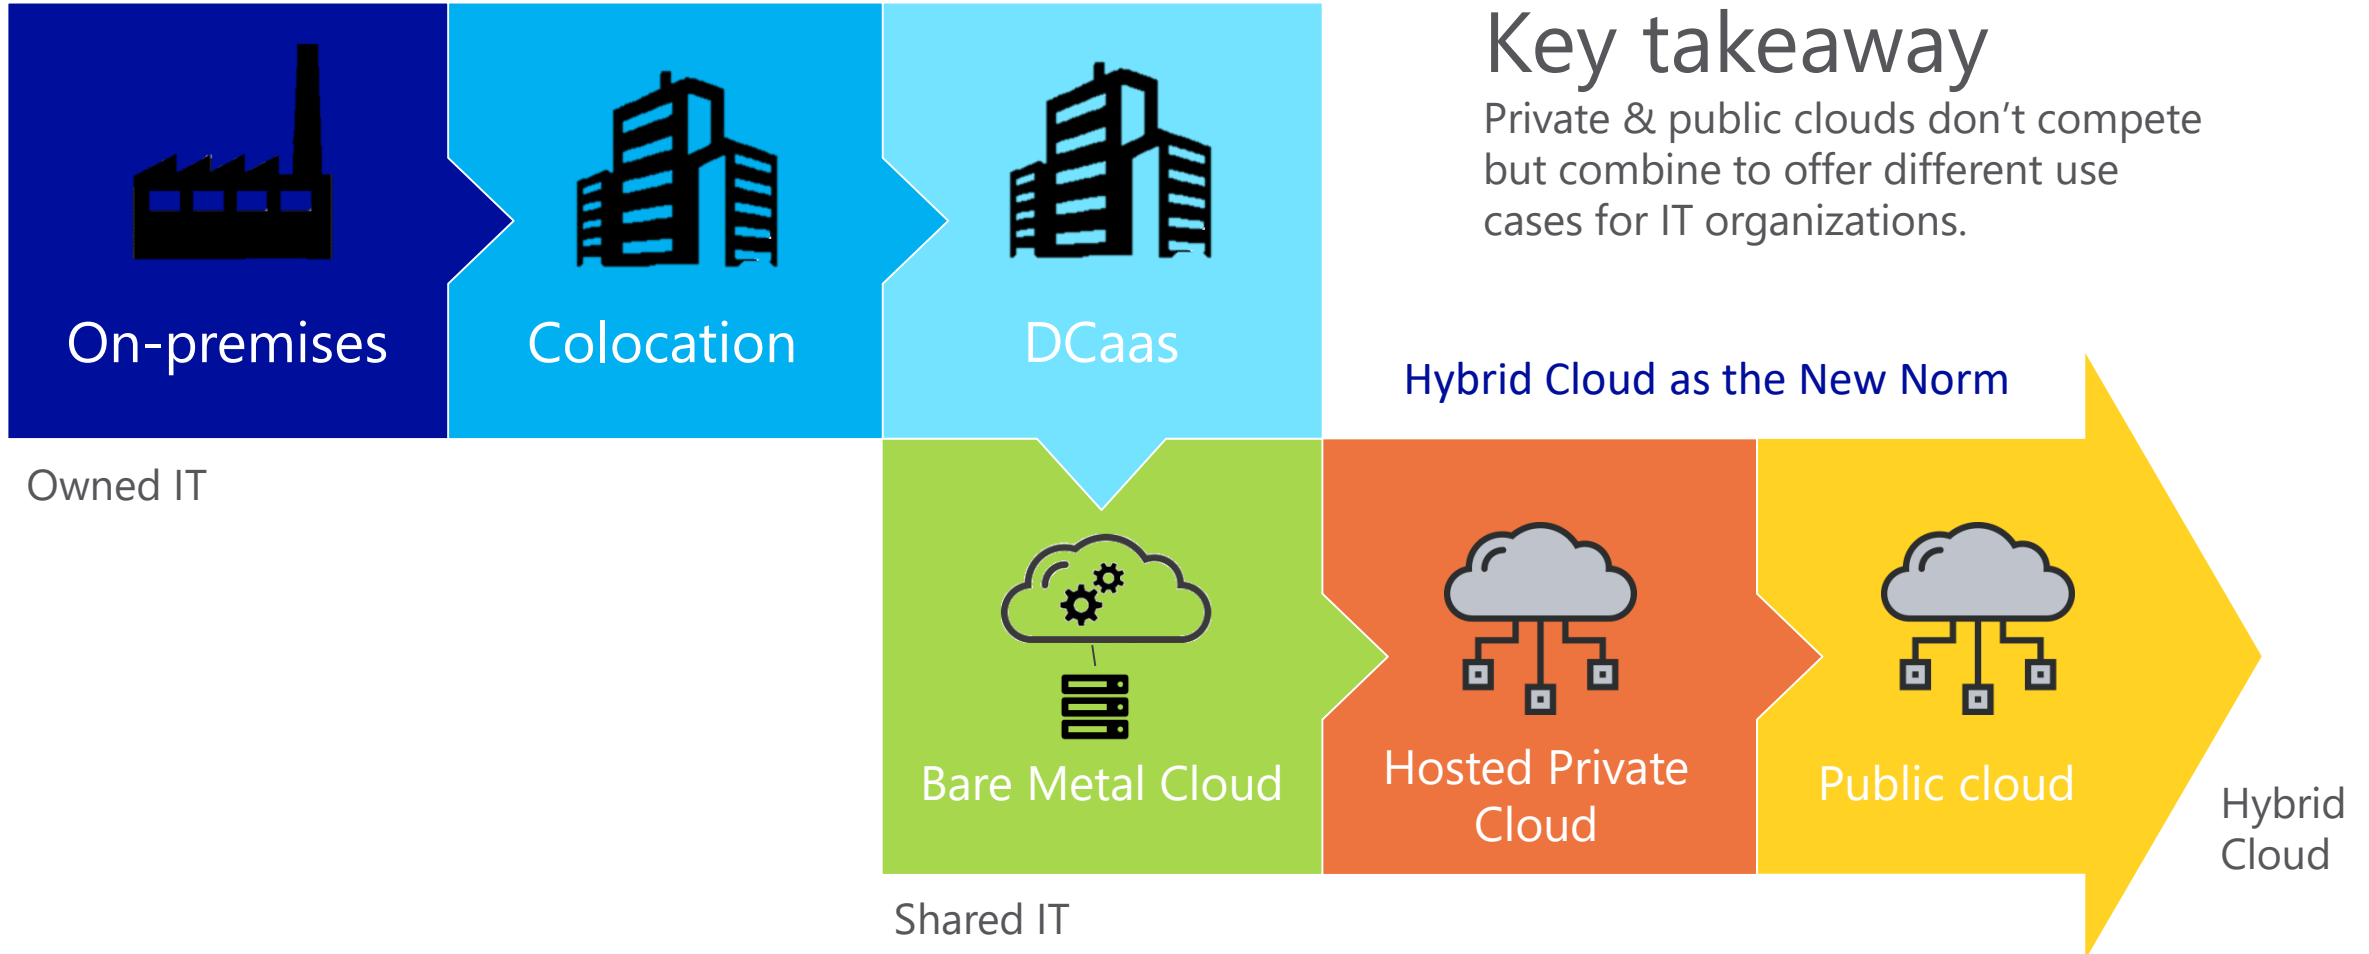

Deliver Business Value

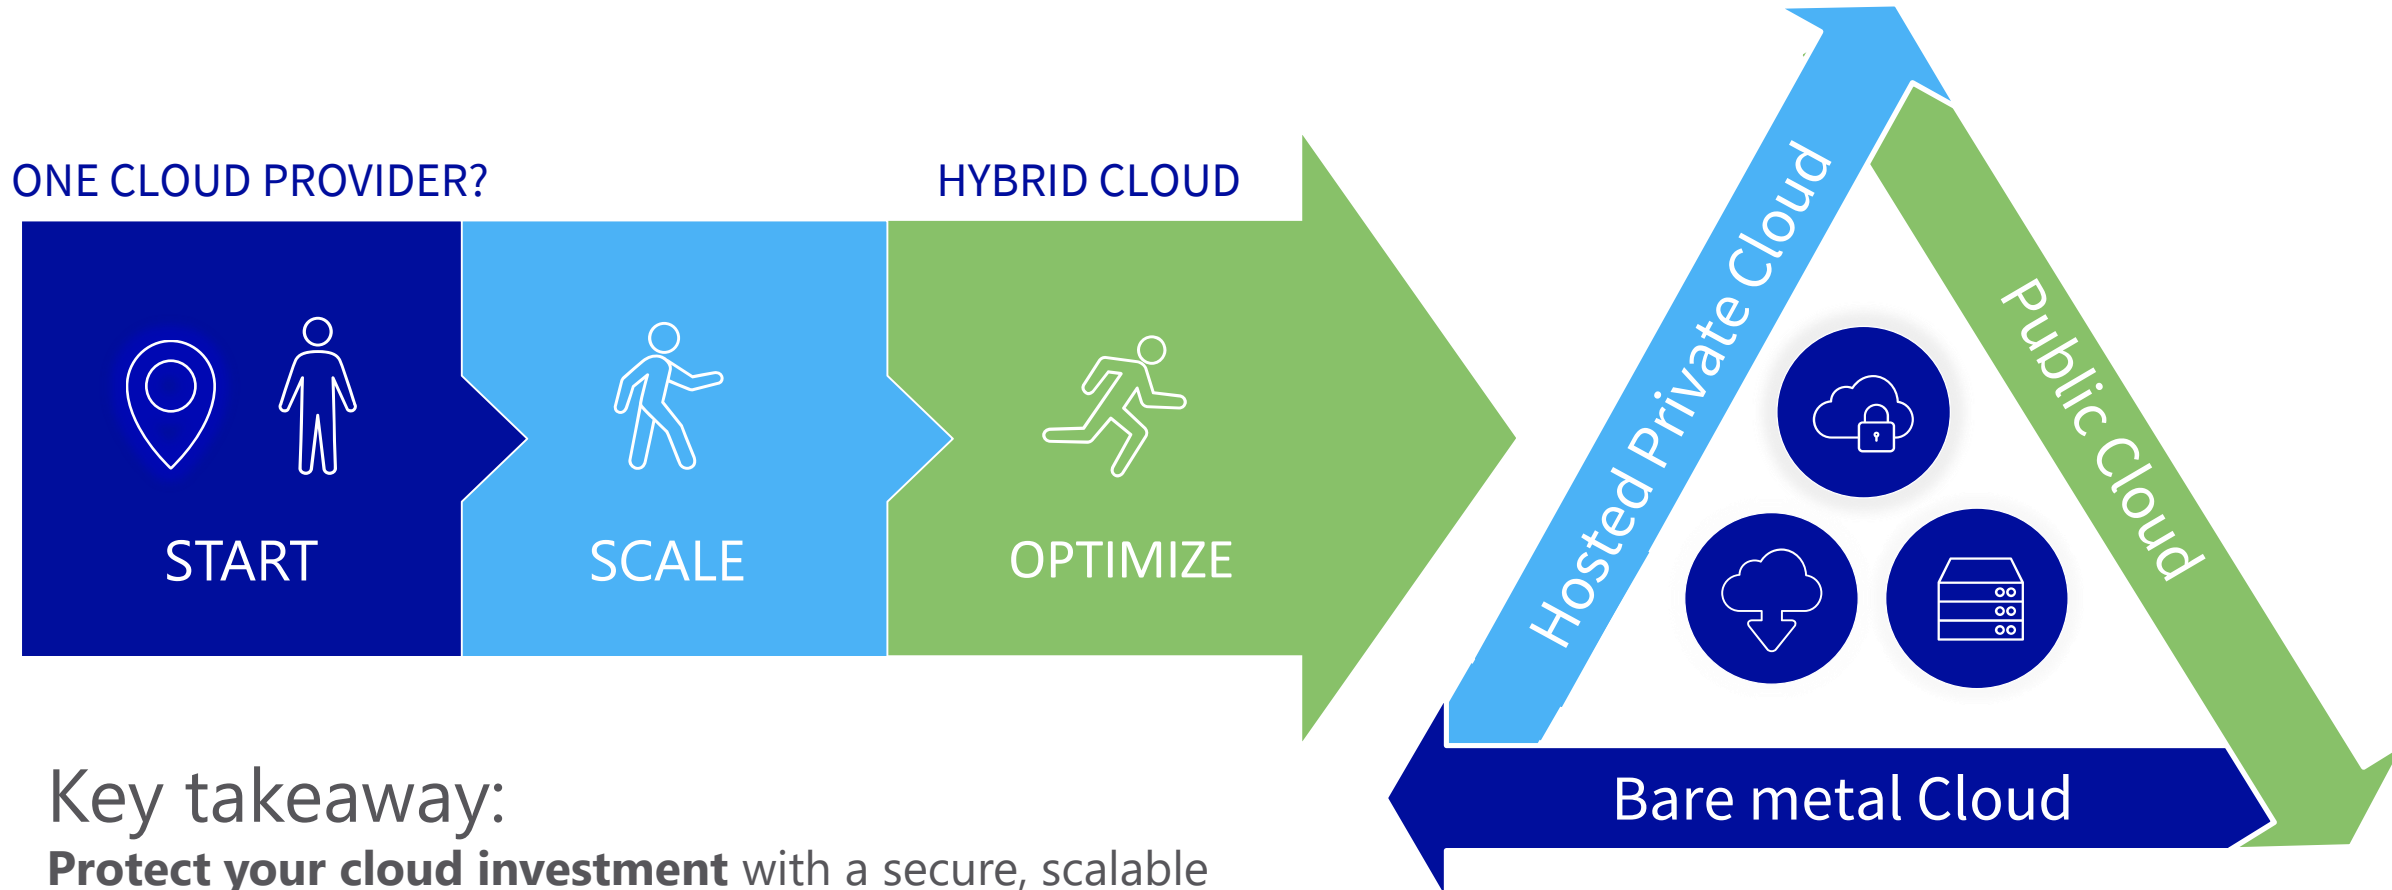

Faster time-to-market, innovation, ease of deployment and management, cost reduction, enhanced security, governance...

- 1 What value are we creating for the customer?
- 2 What outcomes is the product helping the business to meet?
- 3 How can we execute a plan to achieve this in the smartest way possible?
- 4 How do we measure these outcomes

Connect your on-premises to the cloud with OVHcloud Solutions

Options no matter where you are in the journey

Key takeaway:

Protect your cloud investment with a secure, scalable and cost-effective **hybrid cloud** approach which is a fully **reversible** technology solution.

Find yourself a cloud that is...

- ▶ Secure and compliant through policy and access controls
- ▶ Provides high availability
- ▶ Automates disaster recovery
- ▶ Ensures Data protection
- ▶ Flexible and adds scalability
- ▶ Maximises operational efficiency
- ▶ Enforces predictability
- ▶ Integrated and interoperable
- ▶ Allows reversibility
- ▶ Enables portability for DevOps
- ▶ Empowers usability
- ▶ Comes with no forced long-term commitment – keep it light

Nb. There is no silver bullet

Not all clouds are created equal

Mission-critical applications managed in-house

Certified solutions

Edge computing

Private

Fully managed DCaaS infrastructure

DC modernisation, extension and migration

Implementing Disaster Recovery Planning

Consolidation of worldwide DCs and perimeters

Overflow (capacity or compute) to hyperscaler hosting

Public

Cloud migration and multi-cloud strategy

Cost optimised and sovereign storage

Digital Factory: DevOps CI/CD

AI and data-driven applications

Why OVHcloud?

S

Simple

Easy of use, predictable costs, saves time and resources.

M

Multi-local

Worldwide datacentres and local teams.

A

Accessible

Predictable pricing, quick to set up with no surprises

R

Reversible, open and interoperable

Robust and reliable. It is a cloud that does not lock people in.

T

Transparent and responsible

A cloud that says what it does, and does what it says.

Options no matter where you are in your Cloud journey

Hosted Private Cloud

115,000 Private Cloud
VMs running using
VMware cloud verified
architecture

- Built on a foundation of SDDC technology

Public Cloud

300,000 Public Cloud
live instances running
on validated industry-
standard OpenStack

- One of the largest OpenStack deployments in the world.

Dedicated Servers

380K Physical
bare metal
servers

- The latest high performance accelerated CPUs for intensive workloads

Our Ecosystem

Our ecosystem collaboration is vital to digital innovation and problem-solving.
As a result, our customers benefit from a valuable end-to-end experience.

Technology

Community

Key Takeaways

Leverage the multi-cloud opportunity in the right way

Maximise your performance and business value with the right mix of infrastructure, platforms and partners.

- ▶ Pursue agility with flexibility, security, and simplicity
- ▶ Align with business goals to identify different use cases
- ▶ Combine private & public clouds to enable innovation
- ▶ Integrate open standards via APIs and maximise interoperability
- ▶ Consider all costs, governance and managing change
- ▶ Protect the business investment with reversible and hybrid cloud
- ▶ Remember that cloud is a strategy and not a destination. *Don't* get caught in complexity, chasing maximum use cases, legacy systems, or TCO overlooking ROI.
