

MaPPs[®]

Medicines: A Patient Profile Summary

"A hard copy of what you'd say to a patient"

High quality patient information leaflets

All a patient's medication summarised in one leaflet. Available in electronic format and can be viewed, downloaded, printed, stored or emailed.

Paragraphs of around 250 words or less include:

- Drug name(s) and brand name(s)
- Main uses (licensed) and other uses (unlicensed)
- Main side effects and ones to get worried about
- Any administration advice
- Warnings and cautions in plain English
- Completely up to date

Additional system functions:

- Reminder charts (MRCs)
- Administration charts (MARs)
- Safety information
- Consent forms repository
- Large print leaflet option
- Nationally recommended resources
- Development of easy read leaflets
- Development of translated leaflets

Adherence Driven by Technology

'Clearly Quite Clever'

Aims to improve adherence and empowerment of patients

Patient information leaflets that are:

- Individualised to that patient, on-line, available 24/7
- Trustworthy, with credible expert authors
- Found useful or very useful in patient surveys
