

A brand new digital learning programme for care home staff (nursing and residential). The programme is for 3 months and aims to improve knowledge and confidence for those caring for service users living with diabetes. This will help to improve standards of care and reduce hospital admissions from hypos, illness and foot problems.

eden CARES consists of:

3 eLearning modules to enhance the lessons:

- What is diabetes?
- Diabetes medications
- Lifestyle considerations
- Avoiding diabetes related emergencies
- Mental Health, Dementia and Learning Disabilities
- Diabetes care at end of life

1 Virtual discussion forum with an eden diabetes educator

Interactive and engaging conversations via video call to consolidate learning, ask questions and discuss case studies

It is vital that our learners feel supported and encouraged throughout, so we plan to support you in this exciting learning journey
