Submission template
Best use of learning data analytics to impact learner and business performance

The judging panel will score submissions according to how well they fulfil the specific bullet points outlined below .

Please use these bullet points as headings for each section to explain as clearly and concisely as you can how your submission meets the criteria. This does not preclude you from including other sections, however, you should consider the word count if you do.

There is a maximum word limit of 2000 words. Submissions exceeding this limit will not be judged.

Your entry may be disadvantaged if the judging panel is unable to see your submission in action. You also need to be prepared to provide evidence for claims you make about impact and effectiveness.

- The learning data analytics project was aligned to a clearly defined, appropriate and measurable standard or framework.
- The learning data analytics project was conducted using meaningful data derived from effective learning experiences and/or other appropriate sources of data.
- The learning data analytics project produced actionable insights that informed key business decisions.
- Actions taken as a result of the analytics project had a positive impact on learner and/or business performance.
