# QUEUE MANAGEMENT SYSTEM AND PREDICTIVE WAITING TIME

## → TECHNICAL SOLUTION

ACOREL provides high accuracy queue management and predictive waiting time solution through its innovative counting technology based on high accuracy **3D stereoscopic sensors**.

### The information is processed to calculate :

- ✓ Predictive waiting time
- ✓ Realized waiting time
- ✓ Number of passengers in the queue
- ✓ Passenger input and output flows

### The main advantages of this solution are :

- ✓ Large area coverage with very few sensors
- ✓ Adapted to both low and high ceilings
- ✓ Precise detection
- ✓ Easy installation and maintenance

ACOREL provides the complete architecture including the video processing unit and dedicated servers and web based application

Technoparc Pôle 2000 - 3 rue Paul Langevin - 07130 Saint-Péray - France

## → APPLICATIONS

The Queue Management and Predictive Waiting Time System can be used in different places such as :

Check-in zones

Safety screening areas

Passport control areas

## → IT BRINGS ACCURATE AND SIGNIFICANT INFORMATION TO ADDRESS :

Staff management optimization

Customer experience improvement

Passenger information

Efficient passenger flow

MAXIMUM LOAD PER DAY

DASHBOARD WITH LOAD PER ZONE / WAITING TIME
