REIDsteel • Project 8810
Aircraft Hangar

Dorset-based structural steel firm John Reid & Sons Ltd (REIDsteel) designed, detailed and fabricated this aircraft hangar at Simpang Empat Bandara - International airport, Batam, Indonesia.

The hangar contains 1200 tons of steel and is 165m long with a 97m span. It is 17.5m to the underside of the truss and has an overall height of 25.5m.

There are hangar doors on each side of the hangar and these feature 10 independently powered leaves on 5 tracks. Maximum clear opening is 77.5m at one end.

REIDsteel Elements	
Conceptual Design	✓
Structural Design / Detailing	✓
Fabrication	✓
Erection sequence advisor only	✓
Roof & Wall Cladding	✓
Ridge Vents	✓
Permanent Edge Protection	✓
Hangar Doors	✓
Personnel / Entrance Doors	✓

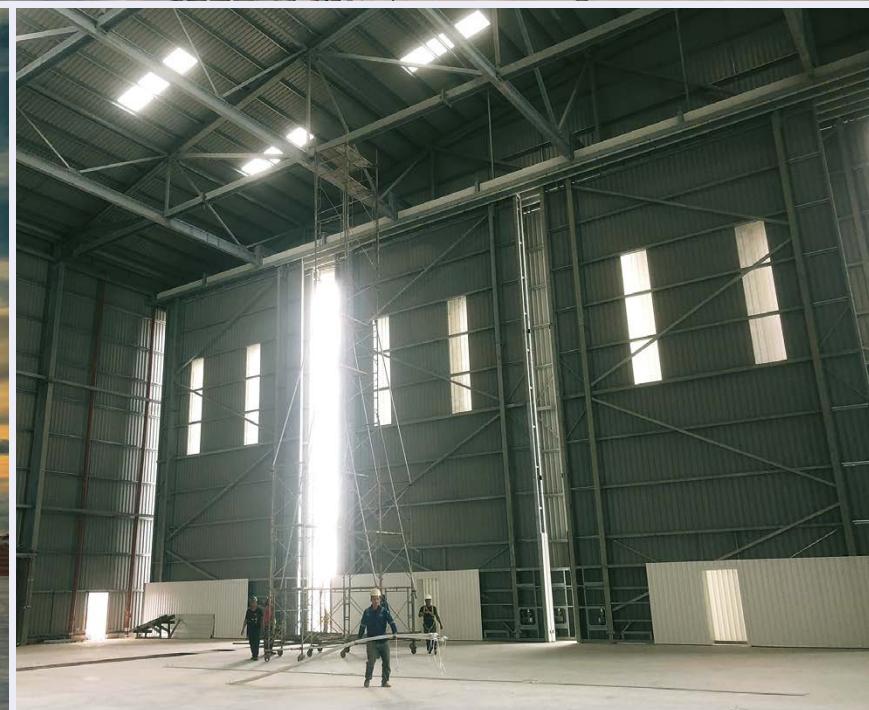

Construction images:

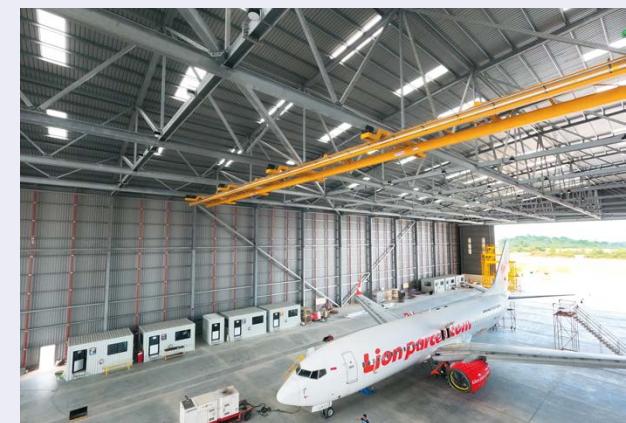

The hangar is designed to accommodate 6no Airbus A320s. The sheer scale can be appreciated when looking at the personnel, plant and aircraft.

The hangar doors - hanging of the frames, cladding and finished.

Hangar door and door track configuration for this project

This hangar features identical hangar door configurations on both sides

REIDsteel are experts in the design, fabrication and erection of the following:

Aircraft hangars & hangar doors

Industrial and warehouse buildings

Commercial and office buildings

Retail superstores

Waste processing and recycling buildings

Steel bridges

Car parks

Grandstands & stadia

Reservoir covers

HVM security gates and barriers

Commercial glazing and solar shading
