MADE IN ITALY

Air Tech Italy

WHO WE ARE

We are committed to building the airport of the future

Air Tech Italy is the leading Trade Association representing Italian companies specialized in solutions, products, technologies and services for airports, airlines and air traffic control.

We bring together best-in-class companies to deliver innovative integrated solutions using the latest technologies and the highest level of expertise.

We are the partner to international companies looking for best-in-class Made in Italy solutions, connecting them with Member companies to work together on new integrated solutions by combining the right products or the right technologies.

Air Tech Italy and its Members stand for Internationalization, Innovation and Sustainability.

Let's find together the most appropriate solution for your business.

Air Tech Italy

WHAT DRIVES US

The Italian way to excellence in the airport industry

Air Tech Italy was founded in July 2020 with the institutional patronage of ENAC (Italian Civil Aviation Authority), aiming to bring together the best-in-class Italian aviation-oriented companies.

Air Tech Italy supports its Member companies through networking, providing business intelligence, and organizing workshops, trade missions, and international trade fairs.

- Data Analytics / Business Intelligence
- ICT Infrastructure
- Operational Services Monitoring
- Passenger Management

Terminal

- Baggage and Cargo Handling
- Finishing and Accessories
- Furniture, Seats and Signage
- Passenger Handling
- Security Equipment

Air Tech Italy

COMMITMENT ON SUSTAINABILITY GOALS

Sustainability is a strategic pillar of Air Tech Italy.

We actively promote how the association and its Members contribute to the sustainability and environmental programs of Airports, Airlines and ATC.

We do this by:

- Promoting initiatives to inspire Sustainable and Environmental approaches in everything we do.
- Promote the association's and the Members sustainability focus and targets.

Air Tech Italy has organized company assessments - set up by the Enterprise Europe Network - to benchmark our (Members) sustainability performance with other leading companies and competitors to understand in which areas improvements could be made through specific sustainability initiatives and what priorities should be made. The progress is then monitored and measured.

As part of the exercise, each Air Tech Italy Member highlighted a product or service that supports the drive to a greener aviation industry and its overall impact. This overview can be found on <https://airtechitaly.com/sustainability/>

Want to collaborate on joint sustainability initiatives? Contact us or our Member companies directly!
