Why attend Respiratory Professional Care?

Respiratory Professional Care - the UK's leading event for the respiratory community - returns to the NEC in Birmingham on 13-14 October 2021.

After a two-year hiatus we're so excited to be back and able to provide you with the opportunity to gain CPD points, forge new relationships, meet old acquaintances in person, and hear from an incredible line-up of speakers providing valuable, practical learning. What's more, this is all provided free of charge!

The programme will include 50+ stimulating sessions across three focused theatres, all delivered by healthcare leaders, policymakers, and front-line primary and secondary care professionals. Build on learning from the pandemic, restart your services and improve outcomes for people with respiratory conditions.

A vital leap forward in cardiac testing

Speed meets accuracy where it matters most—the wait is over for hs-cTnI at the point of care.

The Atellica® VTLi Patient-side Immunoassay Analyser, powered by Magnotech® Technology, will transform your chest pain assessment process to benefit patients, clinicians, and your operational workflow. Because when it comes to assessing patients with symptoms of an MI in the ED, trust, time, and resources aren't just valuable—they're vital. High-sensitivity troponin I (hs-cTn) results in just 8 minutes.
