

**SMART RESPIRATORY LAUNCHES INNOVATIVE DIGITAL HEALTHCARE SOLUTIONS, FOR PATIENTS AND DOCTORS TO MANAGE CHRONIC RESPIRATORY CONDITIONS, AT RESPIRATORY PROFESSIONAL CARE 2021.**

Cutting-Edge Connected Device Technology with Platform Solutions to **Improve Patient Outcomes**. Affordable **Smart Sensors + App + Cloud Platform** gather data for self-management and telemedicine, using **Artificial Intelligence**.

**Patients** - 'Asthma Control in Your Pocket'

We put you in control of your condition. Learning about your body and staying engaged with a chronic disease helps you live a full life.

**Clinicians** - 'Data-Driven Asthma Control'

We provide you with clinical data on chronic conditions. You can be a lot more confident about therapeutic decisions based on physiological data.

**Pharmaceutical Companies**

We help you go beyond the pill. Our tailored solutions increase the impact of your drugs on patients and doctors alike.

**Researchers**

We deliver research data on a reasonable budget. We build custom apps for respiratory trials without breaking the bank.

**OUR DIGITAL HEALTHCARE SOLUTIONS**

**Smart Asthma** - Asthma Control in your Pocket: a small digital peak flow meter.

### Smart Rescue - keeps track of inhaler use

### Smart Inflow - measures inhaler technique and inspiratory flow

**Smart ANP** - measures nasal congestion (PNIF)

**Smart Console** - telemedicine dashboard for virtual consultations and for clinical studies. Data-Driven Asthma Control. Telemonitors lung function, Symptoms, Rescue inhaler use, Asthma control level, CompEx events and more.
