

The NEC, Birmingham | Tuesday 16 March 2027

DIGITAL TRANSFORMATION	NEIGHBOURHOODS	AI	DATA & DIGITAL	CYBER & INFRASTRUCTURE
Delivering the three shifts: what does digital actually need to do?	Beyond the NHS: the neighbourhood team we actually need	AI beyond the acute trust: mental health	Turning NHS data into better decisions at the frontline	The NHS goes offline: are you ready?
Enabling transformation across organisational boundaries	Show me your neighbourhood: learning from the early implementers	New AVT guidance: what does it mean for CCIOs?	Secure Data Environments: the national picture	Cyber security in the age of AI
Delivering the three shifts: building the infrastructure for neighbourhood health	NHS App: the digital front door	The business case: why some technologies get approved and others don't	Population health intelligence for neighbourhood care	72 hours after the attack: a playbook
Meaningful and measurable transformation at scale	Digital beyond the hospital: the technology needed for neighbourhood health	Patient perceptions of AI: Dr AI vs the AI-enabled doctor	Patient generated data: useful signal or more noise?	Infrastructure for AI at scale
From innovation to transformation: global approaches to innovation	Who owns digital in the neighbourhood model?	From deployment to BAU: monitoring AI in the real world	Data sharing across health and social care	Post-quantum cryptography: what you need to know
The transformation playbook	The National Care Service: what does the future hold for social care?	AI and medicines optimisation	Patient admin burden: is digital helping or hindering?	AI by stealth: the implications of AI functionality via routine updates

AGENDA AT A GLANCE

The NEC, Birmingham | Tuesday 16 March 2027

LEADERSHIP	DIGITAL FRONTLINE	EPR IMPLEMENTATION & OPTIMISATION	BEST PRACTICE
Who owns digital in 2027?	AI best practice: practical demonstrations	EPR year two: harder than go live?	Saving staff time
Portfolio careers: opportunity or organisational headache?	Cyber security is patient safety	EPR and clinical productivity	Improving patient experience
Organisational leadership: what we're really thinking	Collaboration across organisational boundaries: success stories	Stop digitising bad workflows	Reducing waiting and improving flow
Digital Health Networks	Digital pharmacy in practice	Using EPR data for research	Improving clinical safety
NHS Innovation Accelerator (NIA) 2027 Fellowship Launch Meet the latest cohort of entrepreneurs accepted onto the national innovation initiative on a mission to scale solutions across the NHS.	Digitally supported prevention	AI in the EPR: opportunities and challenges	Tackling inequalities
	Using the NHS app for health coaching	Proving the real value of EPR	
	Using digital as an AHP: opportunities and limitations		

AGENDA AT A GLANCE

The NEC, Birmingham | Wednesday 17 March 2027

DIGITAL TRANSFORMATION	NEIGHBOURHOODS	AI	DATA & DIGITAL	CYBER & INFRASTRUCTURE
Delivering the three shifts: prevention is better than cure	 Shared Care Record Summit Organised by the Yorkshire & Humber Care Record team and Interweave team, this Summit is designed for anyone working to connect care and make patient information more accessible to those who need it.	Scaling AI across the NHS: how does regulation keep pace with innovation?	Evaluating Federated Data Platform	Hospitals 2.0
Keynote		The AI clinical safety masterclass	Secure Data Environments: data sharing between SDEs	Cyber security across integrated care: who owns the risk?
Patient experience: the core transformation metric		Green AI: what does your prompt actually cost?	Balancing performance oversight and service improvement	Zero trust in healthcare: reality or architecture slideware?
The evolving role of design in health and healthcare: design as a link between disciplines		How AI changes the patient-clinician interaction	Analytics and data maturity	Legacy technology: the risk nobody can afford to replace
Building the team that makes transformation happen		AI and health inequalities: narrowing the gap or simply automating it?	Bridging the gap: connecting people who understand data with people who can act on it	Interoperability: show me something that actually works
The productivity question: where is the return on digital investment?		How can AI support prevention in practice?	EPR data as a research platform	Interoperability vs security: a false choice?

REWIRED

16-17 MARCH 2027

The NEC, Birmingham | Wednesday 17 March 2027

LEADERSHIP	DIGITAL FRONTLINE	EPR IMPLEMENTATION & OPTIMISATION	BEST PRACTICE
Should digital be a mandatory board role?	AI and patient safety: best practice case studies	EPR for neighbourhoods success	Doing more with less
Creating and nurturing a culture of innovation	Welcome to the neighbourhood: stories from early adopters	Build once: optimisation through collaboration	Best practice from social care
Care Plus Group's Year of Digital: a practical account of building digital capability in a constrained community and social-care setting	Digitally enabled point of care testing	Interoperability after implementation	Best practice from primary care
The next generation of digital leadership	Delivering care closer to home	Medicines optimisation through EPR	Pitchfest live final
What leaders need to know about the revised clinical safety standards	Digital nurses: bridging clinical practice and digital	EPR training does not equal adoption	Headline sponsor:
