Hydrogen and Carbon Capture Technology World Expo, the world's largest event for hydrogen and carbon capture innovation, returned to Hamburg Messe, Germany from 21 to 23 October 2025. Bringing together the entire hydrogen value chain, the Expo showcased the latest technologies, solutions, and collaborations shaping the transition to a low carbon future.

This year's edition set a new record in the event's history, filling seven exhibitor halls and welcoming over 18,000 visitors from across the world. From industry leaders to emerging innovators, the Expo provided a dynamic platform for networking, sharing knowledge, and exploring new business opportunities, cementing its role as the must attend event for the hydrogen and carbon capture community.

"The show continues to go from strength to strength each year, and it's incredible to see how the conversations taking place here are turning into real, lasting impact. The collaboration we are seeing with governing bodies, world-leading service providers, manufacturers, end users & industry associations is growing year on year, driving genuine change and giving this event even greater purpose within such a vital and forward thinking industry."

- Charlie Brandon, Managing Director at Trans-Global Events.

Conference Overview

This year's Hydrogen Technology Expo delivered a strong programme across seven focused tracks, capturing the full scope of hydrogen and carbon management. The Hydrogen Leadership Summit opened the event with strategic discussions on policy, investment, and collaboration driving the sector forward. Sessions on Low Carbon Hydrogen Production, Hydrogen Systems and Infrastructure Development, Fuel Cell Innovation, Performance and Mobility, Hydrogen Derivatives and Sustainable Fuels, and Green Hydrogen Production and Electrolyser Development explored the latest breakthroughs and practical applications. Running in parallel, the Carbon Capture Conference covered CCS Policy, Regulation and Capture Technologies, Carbon Capture Storage and Transport, and Carbon Utilisation and Blue Hydrogen. Together, these sessions highlighted real progress, innovation, and partnerships shaping the global clean energy transition.

Hydrogen Leadership Summit

New for 2025

The Hydrogen Leadership Summit opened with welcoming remarks from Cristina Maggi, Director - H2IT - Italian Hydrogen Association and Silke Frank, President - German Hydrogen Association (DWV). Speakers also included Jorgo Chatzimarkakis, CEO, Hydrogen Europe and Ivana Jemelkova, CEO, Hydrogen Council.

Panel Discussion: Germany's New Leadership and the Future Hydrogen Economy

Including Moderator Bernd Pitschak (German Hydrogen Association), and speakers Christine Falken-Grober (Federal Ministry of Economic Affairs and Climate Action), Leif Christian Kröger (Thyssenkrupp Nucera AG & Co. KGaA) and Antje Seitz (Bosch).

Director Governmental Affairs
Energy Market, Bosch

Post Event Report

Carbon Capture Conference

The Carbon Capture Technology World Expo was accompanied by the Carbon Capture Technology Conference, held over three days and covering two distinct subject areas: CCS Policy, Regulation and Capture Technologies; Carbon Capture, Storage & Transport and Carbon Utilisation and Blue Hydrogen. Carbon Capture in Europe, especially Germany; has become a real talking point and the industry is accelerating due to new legislation recently passed that favours growth.

Key talks on “How Carbon Management Is Fuelling Decarbonisation and Growth” by The German Gas and Hydrogen Industry, “Germany’s New Leadership and The Future Of CCUS” and “De-Risking CCUS: How Real Projects Are Becoming Investable and Bankable” with speakers from across the world from companies such as Ramboll, Shell, Rolls Royce, Rystad, and The Scottish Government. This year saw a fantastic lineup and a constantly packed conference hall, which builds a great foundation on years to come and the increasing popularity of this specific industry.

Highlights

Women in green hydrogen (WIGH)

As Hydrogen Technology World Expo looks to evolve, it has to also face oncoming socio-economic problems, as well as others.

That's why we have launched a new initiative with Women In Green Hydrogen at the event to help create a positive buzz around women becoming more involved in a very dynamic, forward thinking industry.

With an all female panel discussion on “Green Hydrogen At An Industrial Scale: Lessons From Frontline Projects”, an all-women’s networking coffee hour and a dedicated ‘women in hydrogen’ lunch during delegate dining; we look to further improve our initiatives in welcoming more women into a male dominated industry.

Testimonials

"The event was a great success, filled with exciting innovations in the fields of renewable energy, carbon capture, and sustainable alternatives for humanity's future on Earth. It showcased cutting-edge technologies, from smart grids and energy storage solutions to breakthroughs in hydrogen and solar efficiency. The discussions emphasized the urgent need for energy transition and highlighted the diversification of the global energy matrix as a key strategy to reduce emissions and ensure long-term resilience. It was inspiring to see experts, startups, and industry leaders come together to shape a cleaner, more sustainable future."

- [Humberto Rubim, Mechanical Design Engineer, Mibur Engineering Consulting](#)

"I found the Hydrogen and Carbon Capture Technology World Expo to be an excellent platform for learning about the latest advancements in hydrogen refueling and carbon capture technologies. The sessions were highly informative, and the opportunity to connect with industry experts was invaluable."

- [Mohammad Nourbakhsh, Development Engineering, Voss-Automotive GmbH](#)

"The Hydrogen Technology World Expo was an excellent opportunity to exchange insights on the latest industry trends and connect with key players in the hydrogen sector."

- [Kerstin Alhajsuleiman, Marketing Manager, LRQA](#)

"The Hydrogen Expo in Hamburg was an inspiring and well-organized event that brought together key players from the hydrogen industry. I appreciated the opportunity to connect with professionals from around the world, discover innovative technologies, and gain valuable insights into the future of sustainable energy. The atmosphere was dynamic, and the variety of exhibitors made it a truly enriching experience. Looking forward to next year's edition! Already looking forward to next year's expo. Extremely useful to find suppliers suitable to different needs. One also gets a very good idea of the trends in the market. Recommended to everyone within the Hydrogen ecosystem to attend."

- [Maroš Begáni, Doctorate, Technical University of Košice](#)

"Hydrogen Technology Expo Europe is one of the most relevant industry gatherings in the hydrogen field. The exhibition floor provided direct access to cutting-edge technologies and professionals truly committed to the energy transition. A must-attend event for anyone developing innovative solutions in hydrogen integration and clean combustion."

- [Evaristo Manuel Alfaya Reguera, Independent Research Collaborator, University of Vigo](#)

"It was an excellent event, very informative, and a great opportunity to connect with industry experts and discover the latest innovations in hydrogen and CCUS."

- [ZAKARIA AIT-LAHCEN, Senior E&I Technician, SOMAS](#)

REASONS TO EXHIBIT

Showcase your latest products and services and services in the world's largest Hydrogen & CCUS trade fair

Access thousands of prospective customers, partners, and existing clients

Network with leading representatives and key decision makers from around the world & across the growing international hydrogen & CCUS industry

Position your company as a leading technical partner for a low-carbon future

Benchmark your products and services against industry competition

Keep on top of evolving customer requirements
