BAYONET LOCKING

QUICK AND SAFE

**FASTER,
SAFER, EASIER
CONNECTIONS**

**NEW
2025**

Manufactured according to **IEC 61076-2-011** standard, it allows for a faster, safer and easier connection.

The snap coupling allows you to have confirmation of the perfect closure by an acoustic “Click” and no torque wrench is required.

This system allows a fast assembling also in the hidden corners, guaranteeing an IP67 degree of protection, due the good behavior against vibrations and shocks, it can be used in railway applications (IEC 61373:2010 compliant).

The Bayonet B12 Female configuration is backwards compatible with the current M12 standard.

This is proposed in all the M12 families A-code B-code D-code X-code, in addition to the Min-tec distribution boxes.

B12

BAYONET

BENEFITS AND FEATURES

- Extremely fast
- Secure Locking with acoustic confirmation
- Easy Installation
- No torque wrench required
- Female backwards compatible with M12 standard
- Shocks and Vibrations resistant (IEC 61373:2010)
- A-B-D-X coded available
- Distribution Boxes with Bayonet system

APPLICATIONS

- Mobile Automation and Agriculture
- Transportation and Railway
- Industrial Automation
- Machine Tools
- Data Transmission
- Packaging
