

Human.
Design.
Innovation.

AX250

Compact *Control* Architecture

/ WHEN WIDTH BECOMES A CONSTRAINT.

ENGINEERING
PREVIEW

Who *is*

HMI & System Integration for Off-Highway platforms.
Electronic control architectures engineered for *structural integration* within modern machine ecosystems.
Hardware, software and human-centered *interface design* - aligned to YOUR system requirements.

 U-Control Srl.

Engineered for *fixed-width* platforms.

COMPACT

- 150 mm (5.9") W / 155 mm (6.1") H
- Reduced installation footprint
- 25% narrower than AX400

INTEGRATION

- Prepared for modern control architectures.
- Developed around platform-level constraints.
- Integrated within machine electronic ecosystems.
- Compatible with modular grip configurations.

ERGONOMICS

- Operator-centered layout
- Reach-optimized control positioning
- Designed around real use conditions

AX portfolio

AX250

Compact control architecture engineered for constrained cabin environments.

AX400

High-configurability control platform for complex machine architectures.

BRING YOUR SYSTEM ARCHITECTURE
We'll engineer the control interface around it
