

Design

Be-Ge Seating has extensive experience in design, optimization and product development.

Production

The seats are assembled at our facility in Oskarshamn, Sweden. To retain top quality and durability, only reliable components from leading suppliers are installed.

Tested product

Be-Ge Seating's long term development focus has led to a unique plant with good test and inspection prospects. This ensures correct product information and contributes to a documented history of high quality.

Service

Be-Ge's seats are made to require minimal maintenance and still deliver maximum performance over a long period.

Accessories

Be-Ge offers a wide range of accessories for individual seat customization.

Certifications

Be-Ge Seating is quality certified to ISO 9001, environmentally certified to ISO 14001 and ISO 45001.

Be-Ge Seating is the world's oldest manufacturer of individual adjustable suspended driver seats. Today we hold a leading position as a manufacturer of seats for buses, trackbound traffic, trucks, industrial machines among others.

To meet each specific requirement we develop our products in close cooperation with OEM companies (vehicle producers) and users as well as ergonomists, medical expertise and researchers.

Our product development and production are based on the knowledge that different applications require different seats and that the user shall be able to form the place of work to fit his own body.

Heavy Duty Seating

Seats for life.

BE-GE

Heavy duty seating from Be-Ge

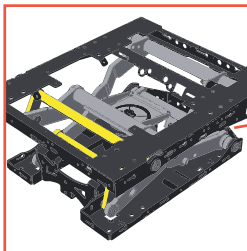

BE-GE 37E00.19 is a driver seat with five motorized functions and CAN-communication as standard. Based on the robust and durable BE-GE 37 series and BE-GE 19 air suspension. Designed for use in tough environments and can be combined with all accessories that Be-Ge offers for the 3000 series.

BE-GE 3700-seat upper. Available in standard foam, XSS- extra side support, ERGO-back. The seats can be equipped with 2-p, 3-p, 4-p and 5-pointbelts. Accessories as seat mounted pods and armrest with joystick and controls.

BE-GE 1919-suspension with a lifting capacity of 210 kg driver weight is built for the highest and toughest demands. Available as standard with adjustable shock absorber as well as double damper and Semi Active Suspension* including special sensor for pothole detection. Ride can be set in soft-, medium- or hard position.

*not for US market

Heavy Duty Seating

Designed for Construction, Mining & Forestry

BE-GE T-Back is a robust and hard-wearing driver seat backrest option. Its T-shaped design allows the driver to carry equipment while operating the machine. The backrest is compatible with the 3000 series and available with air-ventilation, pneumatic lumbar support and heating.

BE-GE 38V-series is a seat upper that can be used as a standalone unit or in combination with BE-GE suspensions. Designed with a seat tilt of +/-10°. Accessories and options are the same as for the 3000-series. BE-GE 38V-series has a V-shaped seat cushion and frame for optimal downward vision.

Options

can be equipped with a builtin horizontal isolator. The horizontal damping can be adjusted via the shock absorber and has a locking function. Brackets for pods and armrests can be integrated into the same unit.
