## Our Smart Lockers

### Energy self sustaining

Our lockers are powered by long-lasting batteries and solar energy, ensuring minimal environmental impact while providing uninterrupted service.

### Versatile Peripherals

Equip your lockers with LED touchscreens, barcode readers, printers and more. for enhanced functionality and user experience.

### Seamless Software Integration

Our in-house developed software integrates smoothly with existing logistics systems, providing real-time data and analytics for efficient operations.

## Success stories

### Transforming Urban Deliveries with iBoxen

In partnership with agnostic locker provider iBoxen, we implemented over 2 000 Smart Lockers in urban areas, reducing delivery times by 30% and lowering emissions.

*- "Qlocx's Smart Lockers have streamlined our operations and significantly improved customer satisfaction", iBoxen.*

### Sustainable Expansion with Homerunner

Our solar-powered lockers have enabled deliveries to both remote and urban locations, ensuring accessibility and sustainability.

*- "The solar lockers are a game-changer for our accessibility towards our partners", Homerunner.*

## About Qlocx

Founded in 2016, Qlocx AB has established itself as a leader in Smart Locker systems, developing and deploying innovative solutions for the logistics industry. With a mission to revolutionize last-mile delivery, we combine cutting-edge hardware, intelligent software, and eco-friendly power options to create a seamless experience for both logistics providers and consumers.

We are now positioned as a provider of turnkey solutions including deployment, maintenance and logistic services at each local market through our installation network.

## Our story

- 2016** Qlocx founded and launched our first autonomous locker for villas.
- 2018** Locker expansion into residential buildings and construction sites.
- 2019** Introduction of chilled lockers for food deliveries.
- 2020** Launch of the first autonomous BLE locker for e-commerce in partnership with iBoxen.
- 2021** Expansion into other Nordic markets and launch of the first autonomous IoT locker.
- 2023** European market expansion initiated with a strong turnkey solution offering.
