TMS Analytics

Unlock the full potential
of your TMS data

Powered by The Information Factory

**Deeper insights from your
Transport Management
System (TMS)**

**Custom reports delivered
automatically to your
inbox**

**Single source of truth for
smarter, faster decisions**

Take control of your logistics performance

TMS Analytics

Your all in one solution. Accurate, automated and designed for logistics leaders who need insight – not just information. Our subscription-based, automated service provides accurate and user-friendly analytics that drive smart, data-driven decisions.

Built for logistics leaders

TMS Analytics is trusted by Operations Directors, Transport Directors and logistics professionals who need fast, accurate, actionable insights.

Why choose TMS Analytics?

Complete visibility: from shipments and routes to depots and customers.

Tailored KPIs: built around your business goals.

Automated reports: delivered in real time on mobile or desktop.

Pre-Built dashboards: fast setup with powerful, ready-to-go tools.

Deep drill-downs: analyse performance across every level.

Always current: stay ahead with continuously updated reports.

One version of the truth: consistent, accurate data every time.

Fully scalable: add data, users and reports as your business grows.

Backed by robust technology and expertise that keeps you moving forward

Seamless data integration: file uploads, APIs, databases and streams.

Data warehousing: ensuring your data is cleaned and organised for easy access and analysis.

Advanced reporting tools: visualisations, dashboards and deep analysis.

Expert support & training: guiding your team every step of the way.

Microsoft 365 optional integration: work within the tools you already use.

Open source power: flexible, modern and future-proofed.

Fully managed service: we run the tech, you focus on results.

Data security: fully encrypted end-to-end and at rest, for top tier security.

Let's talk data
