Pharmacy Locker for click and collect

Pharmacy locker for click and collect that can boost your e-commerce sales!

Click & Collect is a fast and convenient way to collect your online orders from a automated parcel machine – without queues and regardless of the pharmacy's opening hours.

The machine ensures proper storage conditions and safe storage of products.

How does it work?

- 01 Customers place their order at the online pharmacy.
- 02 Select the "Pick up at Click & Collect" option during checkout.
- 03 Receive a text message or email notification with a pickup code when their order is ready.
- 04 Scan the code or enter their PIN at the parcel locker.
- 05 Collect their parcel – quickly and contactlessly.

Why is it worth it?

- 24/7 pickup
- No queues or waiting
- SMS/email/mobile app notification
- Secure and contactless
- Convenient location
