

YourIQ Platform AI-Powered Intelligence for the Modern Enterprise

The YourIQ Platform is Atos' family of AI-powered solutions that extract data from any document, classify and identify physical objects, and turn enterprise data into instant answers – all without templates, code, or compromising data privacy. Built on Small Language Models and Retrieval Augmented Generation, it replaces manual, technically gated processes with one trusted, adaptive layer of intelligence.

Atos

YourExtract

No templates. No retraining. Just accurate extraction.

YourExtract eliminates the limitation of traditional OCR and ML-based extraction: dependence on pre-defined templates. Powered by an integrated Small Language Model, ExtractIQ is layout-agnostic and transparently supports a wide range of file formats — JPG, PNG, WEBP, TIF, PDF, DOCX, and more — extracting relevant data automatically, regardless of how a document is structured. Already in production at a major national postal operator in Europe, ExtractIQ automates customs clearance data extraction from shipping labels and CN22/CN23 forms, replacing manual, template-bound review with fast, adaptive automation.

Key benefits

- Eliminates re-programming or re-training whenever the data layout changes
- Built-in validation tools support intuitive human-in-the-loop review
- On-premises or private cloud deployment keeps sensitive data fully protected
- Structured output (JSON, XML, CSV) and REST API for seamless integration
- Proven in production — not just theory — across real-world postal operations
- Applicable across industries: postal, logistics, healthcare, utilities, insurance, government

YourObject

From images to instant clarity.

YourObject uses AI-powered image recognition to instantly classify packages for faster routing or identify objects to automate HTS codes and hazmat detection — before costly mistakes happen. Using an integrated Small Language Model, ObjectIQ accurately classifies packages from single or multi-sided images captured during sorting operations. Paired with Retrieval Augmented Generation (RAG), it goes further — recognizing the object itself along with key properties such as construction materials, HTS code, and battery content, all from a single image.

Key benefits

- Eliminates manual visual inspection and speeds up sorting decisions
- Integrates into automated sorting and robotics workflows for real-time decisioning
- Automated HTS code suggestions reduce customs delays, fines, and misclassification risk
- Flags regulated contents — including lithium-ion batteries — before they enter the shipping pipeline
- Reduces damage and loss from mishandled fragile or heavy items
- Adapts across industries: postal, logistics, automotive, and beyond

YourInsight

Ask your data anything.

YourInsight gives business users natural language access to enterprise data – no SQL, no analysts, no delays. Ask a question by chat or voice and get instant, explainable insights grounded in your own enterprise data. Powered by Retrieval Augmented Generation (RAG), every response is grounded in your organization's own data sources for accuracy and relevance, while context-aware conversations let users ask follow-up questions and explore insights iteratively – much like a conversation with a data analyst.

Key benefits

- Empowers business users to self-serve data insights without technical expertise
- Accelerates decision-making with real-time, conversational access to enterprise data
- Reduces bottlenecks and backlog for data and analytics teams
- Builds trust through explainable, transparent query results
- Unifies structured and unstructured data across databases, data lakes, and enterprise systems
- Privacy-first deployment keeps sensitive data on-premises or in a private cloud

Enterprise AI, Built for Trust

Every solution in the YourIQ Platform shares a common foundation: self-contained architecture with no dependency on external software, flexible on-premises or private cloud deployment, and Retrieval Augmented Generation that keeps every result grounded in your organization's own data. The result is enterprise AI that's accurate, explainable, and fully under your control – from document to decision.

About Atos

[Atos](#) is the Atos Group brand dedicated to AI-powered, secure, end-to-end digital services. Atos designs, develops, and operates critical digital environments that drive performance, resilience and sovereignty, helping public and private organizations worldwide retain control over their data and infrastructures, while meeting regulatory requirements.

With more than 52,000 employees serving over 4,500 clients across 54 countries, Atos helps modernize core IT systems, accelerate cloud and data transformation, strengthen cybersecurity, and deliver secure digital workplace environments to support its clients, its employees and society. Atos also provides consulting and advisory services through its Atos Amplify brand.

A trusted partner in operating complex and mission-critical environments, Atos supports organizations across highly regulated and sovereign contexts.

About Atos Group

[Atos Group](#) is a global leader in digital transformation with c. 54,000 employees and annual revenue of c. €7.2 billion, operating in 54 countries under two brands - Atos for services and Eviden for products and systems. European number one in cybersecurity and a leader in cloud, Atos Group is committed to a secure and decarbonized future and provides tailored AI-powered, end-to-end solutions for all industries. Atos Group is listed on Euronext Paris.
