

YourContext **Natural language access to** **enterprise data turning complex** **datasets into actionable insights**

YourContext, a pillar of Your IQ Platform, gives business users natural language access to enterprise data – no SQL, no analysts, no delays. Ask a question by chat or voice and get instant, explainable insights grounded in your own enterprise data.

Atos

Challenges

Data access bottlenecks decision-making.

Business users depend on data analysts or IT teams to write queries, pull reports, and interpret results — creating delays that slow down day-to-day decisions and strategic planning alike.

SQL and technical expertise create a barrier.

Extracting insights from enterprise data typically requires specialized query-writing skills, leaving most business users locked out of the data they need most.

Fragmented data sources obscure the full picture.

Enterprise information is scattered across databases, data lakes, and disparate systems — structured and unstructured alike — making it difficult to get a unified, real-time view.

Static reports can't keep pace with the business.

Traditional dashboards and reports are often outdated by the time they reach decision-makers, limiting responsiveness in fast-moving operational and strategic scenarios.

Sensitive data raises deployment concerns.

Many AI-powered analytics tools rely on external cloud processing, creating privacy and compliance risk for organizations handling sensitive enterprise data.

Black-box AI erodes trust.

Without visibility into how an answer was generated, business users and auditors alike struggle to trust — or validate — AI-driven insights.

Solution

YourContext gives business users natural language access to enterprise data — no SQL, no technical expertise, no waiting on analysts. Simply ask a question in plain language, by chat or voice, and get instant, actionable insights drawn directly from your organization's structured and unstructured data.

Powered by Retrieval Augmented Generation (RAG), YourContext grounds every response in your enterprise's own data sources, ensuring accuracy and relevance. Context-aware conversations let users ask follow-up questions and drill deeper — turning a single query into a genuine analytical dialogue.

Atos differentiators

Privacy-first architecture.

On-premises or private cloud deployment keeps sensitive data fully under your control, ensuring compliance without sacrificing capability.

Built-in explainability.

Full transparency into how answers are generated builds trust and supports auditability — critical for regulated industries and high-stakes decisions.

Fast, low-friction deployment.

Minimal configuration accelerates time-to-value, getting business users productive quickly.

Multi-source data integration.

Connects seamlessly across data-bases, data lakes, and enterprise systems — unifying structured and unstructured data into a single point of access.

Chat and voice flexibility.

Intuitive, hands-free interaction options meet users where they work, from desktop chat to voice-driven exploration.

Visualization-ready output.

Structured results feed directly into dashboards, reports, and downstream analytics tools without additional rework.

Benefits

Empowers business users to self-serve data insights, without technical expertise or reliance on IT

Accelerates decision-making with real-time, conversational access to enterprise data

Reduces bottlenecks and backlog for data and analytics teams

Improves data-driven decision quality through iterative, context-aware exploration

Ensures compliance and data security through flexible, privacy-first deployment options

Builds organizational trust in AI-driven insights through explainable, transparent query results

Unifies fragmented data sources into a single, accessible interface

Scales easily across departments and use cases without specialized training

About Atos

[Atos](#) is the Atos Group brand dedicated to AI-powered, secure, end-to-end digital services. Atos designs, develops, and operates critical digital environments that drive performance, resilience and sovereignty, helping public and private organizations worldwide retain control over their data and infrastructures, while meeting regulatory requirements.

With more than 52,000 employees serving over 4,500 clients across 54 countries, Atos helps modernize core IT systems, accelerate cloud and data transformation, strengthen cybersecurity, and deliver secure digital workplace environments to support its clients, its employees and society. Atos also provides consulting and advisory services through its Atos Amplify brand.

A trusted partner in operating complex and mission-critical environments, Atos supports organizations across highly regulated and sovereign contexts.
