

THE INTELLIGENT DROPBOX

REVOLUTIONIZING PARCEL INDUCTION

SEAMLESS INTEGRATION

- Seamlessly connects kiosks or drop boxes to existing back-end systems
- Designed for minimal operational disruption during integration
- Modular, future-ready architecture adapts as needs evolve
- Supports payment terminals, weight scales, and added peripherals
- Creates a complete, one-stop shipping solution

SECURE BY DESIGN

- An integrated camera captures an image of every package deposited
- Each image is stored with a timestamp for accurate record-keeping
- Client information is logged alongside each transaction
- Creates a clear validation and accountability record
- An anti-fishing mechanism protects against unauthorized access
- The drop box remains locked until a valid package label is scanned.
- Adds security at every stage of the drop-off process.

INTELLIGENT AUTOMATION

- Real-time alerts notify staff or drivers as soon as a drop box reaches capacity
- Real-time alerts are sent when the unit needs consumables
- Eliminates the need for manual checks
- Keeps operations running smoothly and efficiently
- An intuitive POS interface guides users through the shipping process
- Reduces user errors at every step
- Minimizes the need for staff intervention
- Single Activation Hub can serve multiple Dropboxes
- Installation services available
- Up to 4 years of warranty

The most comprehensive parcel drop system I've ever seen — faster for customers, lighter on operations. A true game changer.
