REVOLUTIONIZING PARCEL INDUCTION

THE INTELLIGENT FLO-ID DROPBOX

Move parcel induction beyond the counter—and
build a network designed for increasing volume,
convenience and efficiency.

More Parcels. Less Counter Pressure.

Growing parcel volumes shouldn't automatically mean more counter staff, longer queues or added operational pressure.

FLO-ID moves parcel induction from staffed counters to secure, intelligent self-service.

Scale volume

Handle more parcels without simply adding counter capacity.

Reduce operational pressure

Shift routine induction away from staffed counters.

Extend access

Enable secure parcel drop-off beyond traditional operating hours.

Modernize infrastructure

Add intelligent induction points where your network needs them.

Give Your Teams More Capacity

FLO-ID helps postal operators move routine parcel induction to self-service—reducing pressure at the counter while supporting growing volume and freeing time for higher value transactions.

FOR OPERATIONAL TEAMS

Less counter congestion

Move parcel induction away from staffed service points.

More capacity

Support higher parcel volumes without proportional increases in counter staffing.

Connected operations

Monitor induction points and receive alerts when collection is needed.

Built for the network

Deploy intelligent induction for the best operational value.

Shipping Available 24/7

Today's customers expect convenience beyond traditional operating hours. FLO-ID provides secure, unattended parcel drop-off 24/7, giving customers another way to ship without waiting at a counter.

A BETTER SHIPPING EXPERIENCE

24/7 access

Drop off parcels beyond store and counter hours.

Self-service convenience

Complete induction without waiting for staff.

Secure transactions

Support a controlled, traceable drop-off experience.

Less friction

Make shipping easier, faster and more accessible.

Improved Operations

FLO-ID creates a more connected handoff between customers, retailers and parcel carriers.

COURIER & RETAIL BENEFITS

Smarter collection

Connected induction points can alert your network when collection is needed.

Scalability

Single Activation Hub can serve multiple Dropboxes.

Better traceability

Recorded transactions support greater visibility.

Simplify returns

Give customers a self-service option for high-volume returns.

Reduce queues

Keep parcel drop-off from creating another counter bottleneck.

Security

Advanced locking mechanisms- even if the power goes out.

REACH ANYONE
ANYWHERE

SECURE. CONNECTED. SELF-SERVE. SCALABLE.

THE FLO-ID DIFFERENCE

Intelligent self-service parcel induction.

Built to help networks handle more volume,
deliver greater convenience and modernize
the way parcels enter the network.
