

REVISION SERVICES

Our revision services cover a wide range of components - from driveshafts and uprights to wishbones and many more. These can be carried out on racing vehicles of all common brands.

(special brands on request)

We are always pleased to respond to individual requests and find a solution tailored to your needs.

INFO@CP-TECH.COM

a Nedschroef company

With over 20 years of experience, CP Tech feels at home in the world of motorsports. As an engineering company, we are leading experts in lightweight construction, high-performance materials, prototyping and other projects for the global automotive, motorsports and aerospace industry.

„If you want to finish first,
first you have to finish.“

Juan Manuel Fangio

Failures in today's racing vehicles are predominantly due to inadequate maintenance of various components. This not only costs money, but also victories and championships.

Our experience enables us to efficiently ensure the reliability of your racing vehicle. A multitude of motorsports teams already benefit from our revision services in racing series and venues around the globe - from the Nürburgring, to Le Mans, to Daytona and on to Bathurst.

We take care of the „Finish“,
you go for the „First“!
