About Company

CB Special Components specializes in **manufacturing high-precision mechanical components** in **metal alloys** and **polymeric compounds**, offering expertise in product creation and process strategies.

Our Services

01. Studio & Development

From **concept** to **finished project**: we develop **tailor-made mechanical solutions**, combining technical analysis, functional design and engineering expertise.

02. Prototyping Precision Machining

We produce **high-precision prototypes** to test, validate and optimise every component and **one-off part**.

03. Production Precision Machining

We manufacture complex mechanical components using **latest generation CNC machinery**, guaranteeing maximum precision, reliable delivery times and consistent performance.

04. Welding

Welding of metal alloys **carried out by qualified specialists** using equipment created internally.

05. Treatments & Surface Finishing

We apply **surface treatments** and **technical finishes** that improve the resistance, durability and aesthetic performance of each piece.

06. Quality Control

Advanced metrological checks and internal protocols ensure perfection in every detail.
