

Give us the space. We'll engineer the solution.

Designed in-house

Over 800 bespoke
fuel bladder designs
from historic competition cars
to modern specialist vehicles

Approved for use in
FIA competition

Built in the UK. Proven on track.

Manufactured in-house

Over a decade
of specialist fuel
system engineering

For motorsport,
historic racing,
restoration and defence

Fuel systems designed, manufactured and tested in the UK's motorsport valley.

CapsaFlex designs and manufactures flexible fuel bladders for motorsport, historic racing, restoration, defence and other specialist applications.

With over 800 bespoke bladder designs and more than a decade of specialist fuel system engineering, our team works from the vehicle, packaging space and operating requirements to develop the right solution.

From CAD design through manufacture and testing, engineered to exceed FIA FT3 regulations, the process is managed in-house, giving customers direct access to the engineers behind the product.

Who we support

-  Motorsport teams
-  Historic racing teams
-  Restorers and restomods
-  Defence
