GOOD VIBRATIONS ONLY

Performance Durability Quality

High-performance Solutions and Global presence

74 years since foundation

32+ countries served

69,7% automotive turnover

43% export ratio

11.000.000+ pieces / year produced

FIBET is a manufacturer of high-quality anti vibration products, mounts & bushes with branches in Italy, the UK and China, and distribution branches in the US, Australia and South Africa. The result is a global R&D, testing and development capability to meet your most challenging vibration isolation requirements.

Innovative Vibration Solutions for Every Industry

FIBET components are suitable for application in any market sector that demands a solution for a vibration issue, ranging from passenger and racing cars, as well as the latest hybrid and electric vehicles, to commercial vehicles, agricultural and earthmoving machinery, gen-sets, railways, marine and more.

Engineering the Future of Automotive

Chassis, Powertrain and Driveline systems:

- Suspension bushings (bushings for front and rear axles) and top mounts
- Engine mounts & Hydraulic bushing
- Elastic mounts for sub-chassis, gearbox and differentials
- Stabilizer bar connecting bushings

FIBET Testing & Validation

In addition to design services, theoretical calculations and stress evaluation simulation, FIBET can offer a full turnkey solution for:

- prototyping services
- static and dynamic testing
- lifecycle & bench fatigue testing either on the individual component, or even on the complete subsystem.

This is all progressed inhouse using our two internal Laboratories and our own mould construction workshop.

Integrated Quality System

Our management, production and quality organization systems are all strictly compliant and certified by **ISO 9001:2015** and **IATF 16949:2016**.
FIBET has adopted a management system for environment, health and safety to assure safe and healthy working conditions, certified by **ISO 14001:2015** and **ISO 45001:2018**.

Sustainability, our value

FIBET is committed to reducing environmental impact through the efficient use of resources, applying a continuous improvement policy across all stages - from raw material sourcing to end-of-life recycling. The true driving force behind our success is our people: we promote teamwork, value ideas, and invest in personal and professional growth to strengthen corporate value and achieve excellence.
