

Announcing the Acquisition of Day Wireless Systems and HOFCON Technologies: A Global Expansion in Wireless Telecom Solutions

Milwaukie, OR – Day Wireless Systems and HOFCON Technologies of the Netherlands are excited to announce their strategic acquisition. This union marks a significant milestone in our commitment to providing comprehensive communication solutions, RF, Land Mobile Radio eco-systems, Rentals, and Distributed Antenna Systems (DAS) on a global scale.

About the Acquisition

This acquisition is a direct response to the evolving needs of our global clientele. By joining forces, Day Wireless Systems and HOFCON Technologies are poised to offer enhanced services and support to our customers worldwide. HOFCON leadership and staff will remain in place, but will begin operating as Day Wireless Systems.

Here's why this acquisition is significant:

1. **Simplified Global Operations:** The acquisition streamlines our ability to work with multinational clients, providing a seamless experience across continents.
2. **Increased Competitiveness:** By combining our resources and expertise, we can offer more competitive and comprehensive solutions in the global market.
3. **Expanded European Presence:** With HOFCON's established presence in the Netherlands, we can better serve our customers' needs in Europe and beyond.
4. **Dedicated Global Teams:** We are forming specialized teams focused solely on supporting our global customers, ensuring personalized attention and expertise.
5. **Enhanced Design and Oversight:** While maintaining our hands-on approach, this acquisition allows us to serve as the intellectual oversight and design group for complex, multinational projects.
6. **Leveraging Complementary Strengths:** Day Wireless's extensive experience in North America combined with HOFCON's European expertise creates a powerful synergy in RF solutions.

Our Vision for the Future

This acquisition is not just about expansion; it's about evolving to meet the changing needs of our global customers. For new Day Wireless Systems CEO Lane Falkner, the acquisition has been a logical next step for providing holistic white glove support to global customers.

"We've grown internationally in response to our clients' requests, and this union is a natural progression of that journey. It simplifies how we work with our customers, makes us more competitive, and solidifies our future globally," said Falkner.

The Netherlands, known for its business-friendly environment, serves as an ideal European base for our expanded operations.

Building on a Strong Foundation

Our companies have enjoyed a collaborative relationship for over a decade, making this acquisition a natural step forward. We bring together not just two companies, but a shared history of innovation and customer-focused service. HOFCON owner, Berry Hofstede, will remain as the Operations Manager for Day Wireless Systems Netherlands. Said Falkner, "What is ultimately important is Berry and his team. He's the right person, the right talent, the right attitude."

Looking Ahead

This acquisition positions us to be at the forefront of RF solutions in the US and Europe. We are excited about the opportunities this brings for our customers, employees, and partners. Our commitment to providing white-glove, holistic support for our global customers remains unwavering, and we look forward to embarking on this new chapter together.

About Day Wireless Systems

Day Wireless Systems, headquartered in Milwaukie, Oregon, has been a leading provider of wireless communication solutions for over 50 years. With a strong presence in North America, Day Wireless has built a reputation for delivering high-quality, customized telecom, two-way radio, data and security services to a diverse range of industries. As a platinum Motorola

channel partner, our expertise in designing, implementing, and maintaining wireless networks has made us a trusted partner for businesses seeking reliable communication solutions.

About HOFCON Technologies

Founded in 2008, HOFCON Technologies has established itself as an innovative and dynamic force in the telecom and IT sectors in the Netherlands. HOFCON offers a wide range of products and services, including two-way radio networks, rental services, and customized communication solutions. Their client base spans various industries, including logistics, information technology, retail, security, government, and manufacturing. HOFCON is known for its ability to integrate cutting-edge communication products with existing ICT infrastructure, providing tailored solutions to meet specific client needs.
