Panduit Opticom®: Elevate Fiber Management

PANDUIT®

Elevate Fiber Management with Opticom Solutions

Take your fiber management to the next level with Opticom's modular, scalable designs that integrate seamlessly into modern infrastructures. From low-to-medium density environments to sustainable data centers, Opticom provides unmatched flexibility, reliability and performance.

Why Opticom is Best for You

Efficient fiber management is the backbone of high-performing networks. Opticom solutions ensure:

- Faster deployment and easier scalability to meet growing demands
- Superior organization leading to a reduction in downtime and maintenance efforts
- Support for emerging technologies like AI, edge computing and high-performance computing

What can Opticom bring to your Data Center?

Opticom solutions are designed with the needs of small-to-medium on-premise data centers in mind. Opticom provides industries such as enterprise, military, healthcare and education with:

- **Adaptability:** Modular solutions that grow alongside your business needs
- **Reliability:** Designed to ensure uninterrupted performance and minimal downtime
- **Efficiency:** Reduces installation time and enhances system organization
- **Flexibility:** Variety of connectivity options, including copper connectivity

Improve your Fiber Infrastructure with Opticom

Explore the Opticom Families

Our Opticom product line includes a variety of innovative solutions to meet diverse fiber management needs:

Patch Panels
Low-to-medium density solutions for seamless cable organization

Opticom Cassettes
Modular design for efficient fiber connectivity and scalability

Opticom Fiber Drawers
Accessible, space-efficient storage for fiber connectivity
