Thank You – From “The Power Guys”

Datacloud Global Congress 2025

A big thank you to everyone we met at Datacloud Global Congress 2025 in Cannes. What a week!

Watch the event highlights:

Whether you stopped by the booth or caught our message another way, we are grateful for the great conversations and shared insights.

Dubbed “the power guys”, we set out how Langley companies are tackling the #1 challenge facing the sector right now.

“The message from Cannes was clear – the grid is now the biggest bottleneck for AI. We are here to help fix that” said Bernard Langley, Main Board Director at Langley, showcasing their behind-the-meter power solution.

At the event, we showcased **Grid-Free Power** – a modular, behind-the-meter solution delivering scaleable utility grade power.

Our Bergen Engines subsidiary secured its first AI data center deal at the show – a 130MW+ solution for an AI data center in the US for PPA provider, E-Finity Distributed Generation. Judging by the interest we saw last week, it will be the first of many.

“*This project marks a turning point*,” said William Langley, Main Board Director, Langley Holdings. “*AI needs power now, and we’re delivering it, without waiting on the grid….*”

The solution combines lean-burn medium-speed gas engine technology from Bergen Engines (formerly Rolls-Royce Bergen Engines) with Marelli Motori generators to provide fast, scalable behind-the meter-power.

The third member of our power solutions division is Piller Power Systems. Its technology is the Gold Standard for power quality, installed in ultra mission-critical data centers worldwide – including the London and New York Stock Exchanges, the Bank of England, the ECB, the Federal Reserve and the CIA.

Piller dynamic UPS technology is battery free and effortlessly handles AI load profiles in a way batteries simply can’t.

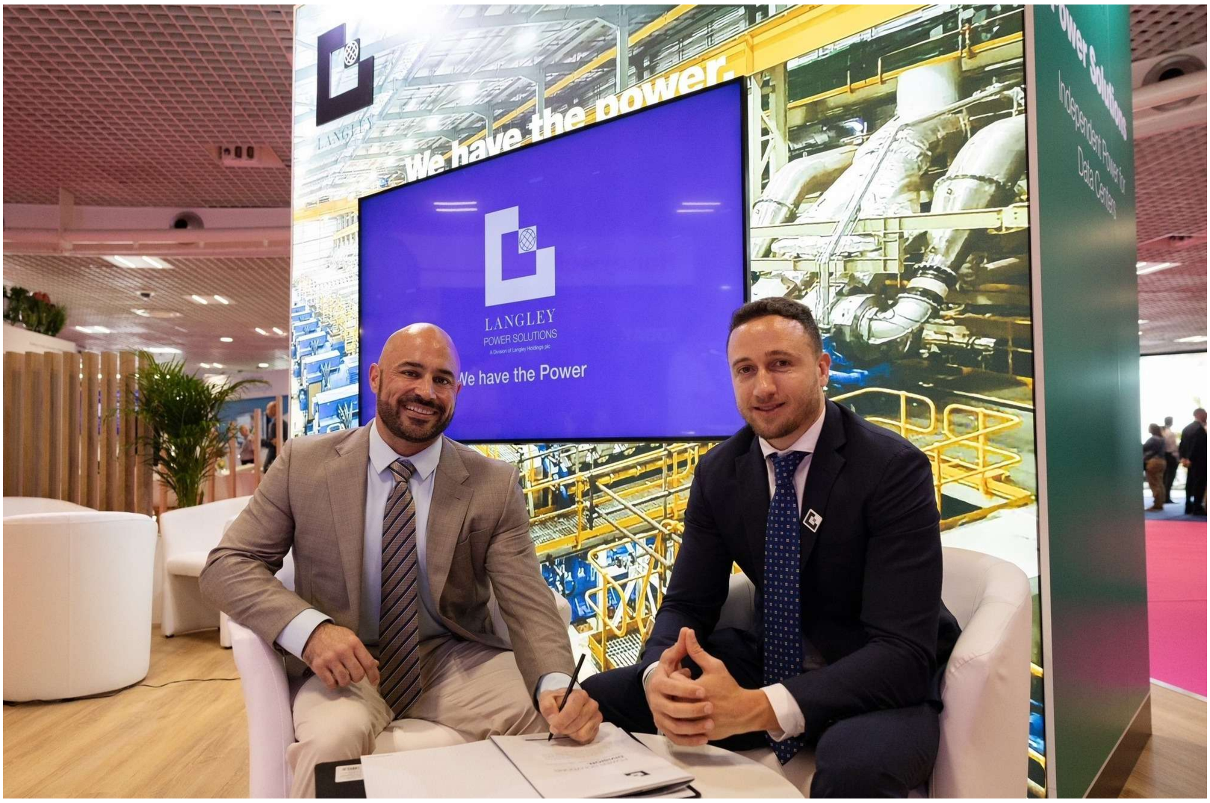
Thank you all once again from the Cannes Langley team – “the power guys”.

Founder & CEO Anthony Langley sat down with Capacity TV to share his vision and outlook. *"AI is like a latter day California Gold Rush"* he said *"...and we have shovels."*



And we announced a major milestone: Bergen Engines secured its first AI power deal. Left: Jim Bondi, Partner & Chief Operating Officer, E-Finity Distributed Generation and right Theo Lorentzos, VP Sales, Bergen Engines Americas.

We hosted a standout reception to wrap up day one on board the Langley family yacht.

"The power guys" from left to right: Bernard and William Langley (Main Board Directors), Jack Pearce (CEO, Active Power), Anthony Langley (Founder & CEO), Crista Baxter (Head of Global Marketing) and Theo Lorentzos, (VP Sales, Bergen Engines Americas).

Jack Pearce delivered a case study on the Innovation Stage outlining our grid-independent solutions for data centers.

About Power Solutions

The Langley Holdings Power Solutions Division comprises Bergen Engines, the Norwegian medium-speed engine builder acquired from Rolls-Royce in December 2021; Marelli Motori, the Italian producer of electric motors and generators, part of the Group since May 2019; and Piller Group, Europe's leading producer of critical power conditioning, stabilisation and backup systems, based in Germany and celebrating 20 years of Langley stewardship this year. In 2024, the Division accounted for approximately half of the Group's $1.5bn revenues and 5000+ employees.

About Langley Holdings

Langley Holdings plc is a privately owned UK-based engineering and industrial manufacturing group, principally producing capital equipment for diverse markets worldwide. Langley businesses are either outright market leaders, or occupy strong niche positions in their respective fields, providing advanced technologies in a solutions-based approach. The group operates in three principal areas: Power Solutions, Print Technologies and Other Industrials. The group's operations are based in Germany, Italy, France the UK and Norway, with 18 production facilities in Europe, the UK and the USA. The group has more than 90 sales and service subsidiaries worldwide and employs around 5,000 people. Langley Holdings was established in 1975 by the current Chairman & CEO, Anthony Langley and remains entirely in family ownership.
