AUTOMATIC BAGGING MACHINE

Alligator Automations is a leading provider of industrial bag packaging machines, with expertise in handling bags from 10 kg to 2000 kg.

KNOW MORE

Open Mouth Filling Machine

Open-Mouth Filling Systems are used to package a wide range of materials and bulk products. In this process, an empty bag is placed under the fill spout and on a weighing scale. Once filled, the bag is released and falls onto the sewing conveyor belt.

Specifications

Filling/Weight: 10-50 kg
Suitable for: Seeds, Grains & Pulses, Powders & Granules
Speed: Upto 20 bags/min (depends on the product)
Feeder Type: Belt, Screw, Vibratory & Gravity
Bag Type: Polywoven, HDPE, Paper & laminated bag

Big Bag Filling Machine

We offer a versatile range of Bulk Bag Fillers, available in semi-automatic and fully automatic options, with capacities ranging from 500kg to 2000kg. Suitable for various project scales and budgets, our Bulk Bag Fillers precisely package dry granular, flakes, or powdered materials.

Specifications

Granular, flake, powder, pellet
Upto 40 bags/hour
500-2000 Kg
Bulk bags
Woven/polypropylene

Benefits-

- Achieve packaging speeds not possible manually.
- Increase productivity and uptime significantly.
- Guarantee 98% uptime for enhanced operating efficiency.
- Ensure continuous operation with 24x7 capability.
- Pack grains, powder, and other products in pre-formed bags efficiently.
