

Empowering industry through **innovation.**

Unlock the full potential of your existing systems with custom automation solutions—at a fraction of the cost of new equipment.

Tailored control system solutions, expert programming, seamless integration, and reliable project execution.

Control System Design & Programming

Get automation that fits your process—not the other way around. With PLC, HMI, and SCADA platforms built for your needs, you'll see greater efficiency, higher productivity, and smoother operations.

3D Modeling & Simulation

With our proprietary Rapid Digital Twin tools, we quickly generate 3D models of your facility to test processes virtually and reduce engineering and commissioning costs—all without putting production at risk.

Turnkey Automation Solutions

Get automation that works seamlessly with your equipment and processes. Whether you need a full turnkey system or a targeted upgrade, we make sure the right technologies integrate effortlessly into your operation.

Industries

Automotive

Tire & Rubber

Food & Beverage

Material Handling

System Experience

- Bulk Receiving / Truck Offload Systems
- Raw Material Storage
- Batch Process Controls & Recipe Management
- Conveying, Filling, Inspection & Packaging
- Water / Waste Water
- Robots & Overhead Gantries
- Material Handling, Conveyors, Lifts, Transfer Equipment
- Presses, Extruders, Cutters, Winding/Unwinding
- Discrete Manufacturing Equipment/ Test Cells
- Vision & X-Ray Inspection
- Barcoding and RFID Tracking
