

From the science of graphic and label materials and RFID and wireless IoT enablers, we create solutions across the value chain to deliver **digital transformation** for businesses around the world.

As a global leader in RFID and wireless IoT solutions, **sustainability** is deeply embedded in Beontag's mission and operations. With a presence spanning over 40 countries, 7 R&D centers, and over 2,000 dedicated employees, we are relentlessly innovating to develop **cutting-edge technologies** that enable our customers to achieve their **ESG goals**.

By pioneering the use of renewable and sustainable materials to replace non-renewable inputs, Beontag acts as a key ESG enabler across our clients' value chains.

Our transformative solutions are designed to seamlessly connect items, unlocking new levels of efficiency and providing complete end-to-end traceability, empowering businesses to optimize their operations, reduce waste, and make data-driven decisions to minimize their environmental footprint.

Enabling
the future.

RFID Tags and Labels for the Automotive Industry

RFID technology revolutionizes the automotive industry by enabling real-time tracking of raw materials, parts, and vehicles throughout the supply chain. Durable RFID tags withstand

various conditions, ensuring accuracy. Beontag's IoT expertise and diverse RFID solutions enhance efficiency and reliability in automotive manufacturing.

Beontag **Viking**

Beontag Viking Bluetooth® Low-Energy (BLE) beacons track assets and people, with optional sensors for environmental data. Combining BLE with passive RFID, they offer modular, real-time tracking for indoor and outdoor industrial use.

Beontag **Steelwave**

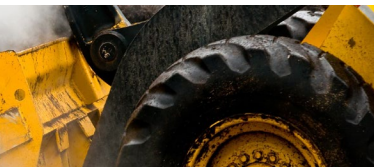

The Steelwave family offers durable, high-performance products for indoor and outdoor use. With versatile attachment methods, a compact design, and flexibility, it ensures successful asset-tracking deployments.

Beontag **Carrier**

The Beontag Carrier family is designed for tracking plastic RTIs. IP68-rated, they withstand washing while maintaining a strong grip. Labels can be printed, encoded with RFID printers, or pre-personalized.

Beontag **Ironside**

The Ironside family is built for metallic RTIs and industrial assets in harsh conditions. Its patented antenna and robust design ensure reliable tracking, with multiple attachment options.

Beontag **Silverline**

The Silverline family offers IP68-rated on-metal labels for demanding applications. Combining hard tag performance with easy personalization, it enhances RFID efficiency. Available in various sizes for different needs.

Beontag **DesignStudio**

Beontag DesignStudio provides you with uniquely new products or standard product modifications for your specific needs, be them simple or complex. Let's co-create a BLE, RFID or NFC product that meets your requirements.

Beontag **Heatwave**

The Heatwave family, developed over ten years, offers highly reliable high-temperature tags proven in industrial applications like automotive paint shops.

Beontag **Ferrowave**

Beontag Ferrowave products offer cost-effective, reliable logistics solutions with omnidirectional reading, eco-friendly design, and VDA compliance—ideal for tagging specialty retail items like sports equipment and beauty products.
