

CHEESHINE NOVEL MATERIALS ELEVATING RUBBER PERFORMANCE TO NEW HEIGHTS

A TRUE PIONEER IN THE RUBBER INDUSTRY

RELIABLE PARTNER IN MATERIALS INNOVATION

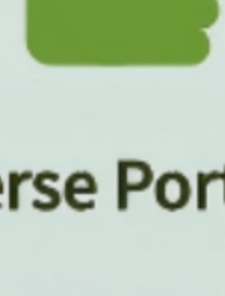

Founded in 2005 and headquartered in Shanghai. We offer diversified and customized material solutions, focusing on new rubber and adhesive solutions for our customers.

As a National High-Tech Enterprise, Cheeshine leverages its Suzhou R&D Center and modern production bases in Jiangsu and Shandong. With four provincial-level R&D platforms, we provide integrated capabilities from molecular design to large-scale production of advanced rubber and adhesive materials.

Join us to innovate and elevate rubber performance to new heights.

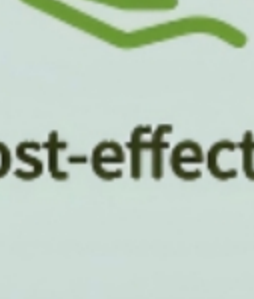

In-House R&D & Production

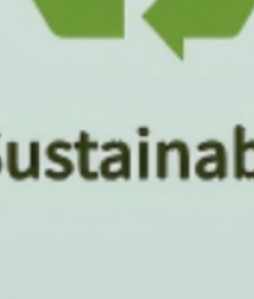

Diverse Portfolio

High Performance

Cost-effective

Sustainable

CHEESHINE

A Strong Foundation You Can Rely On

R&D STRENGTH

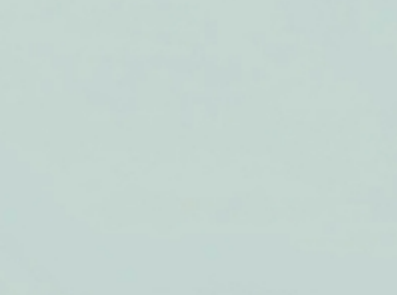

- Comprehensive Tire R&D Capabilities
- 5M USD in R&D Equipment
- 136 Patent Applications
- 100 Experts Driving Innovation
- 106 Granted Patents

ROBUST MANUFACTURING CAPABILITY

- 2 Major** Production Bases
- 80,000m²** Jiangsu plant
- 310,000m²** Shandong plant
- 495K** Tons Annual Capacity

ECO-CERTIFIED SYSTEMS

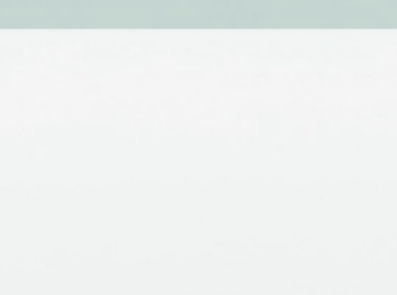

IATF 16949 Certified

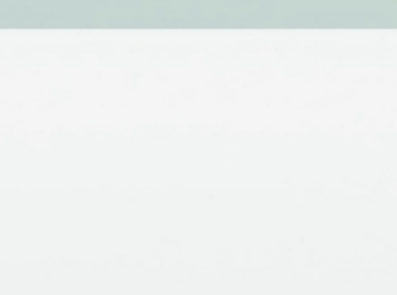

Ecovadis Recognition

EU REACH Compliant

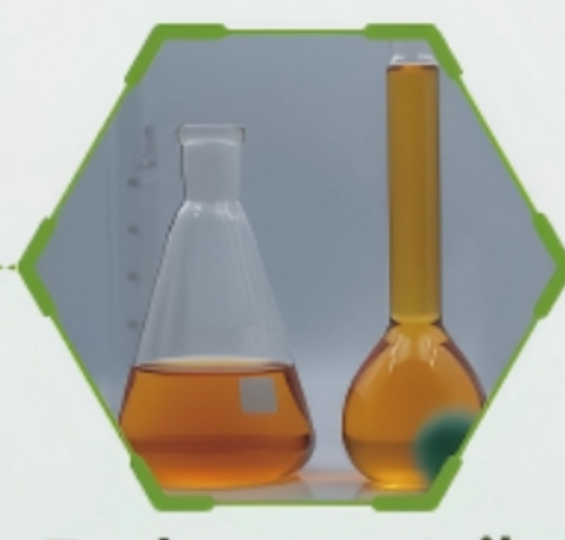

ISCC PLUS Certified

FULL-RANGE SOLUTIONS

CO₂ Neutralization Silica

Environmentally Friendly Rubber Oil

Wet-skid Resistant Resin

Tear-resistant Resin

Adhesion Promoter

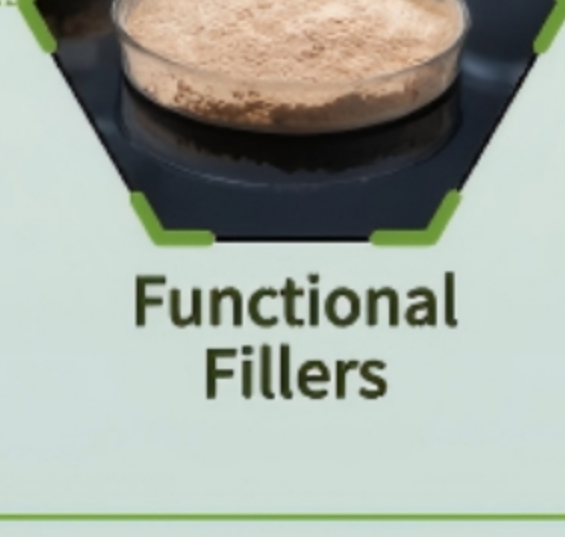

Multi-functional Crosslinking Agent

Super Silane

Processing Additives

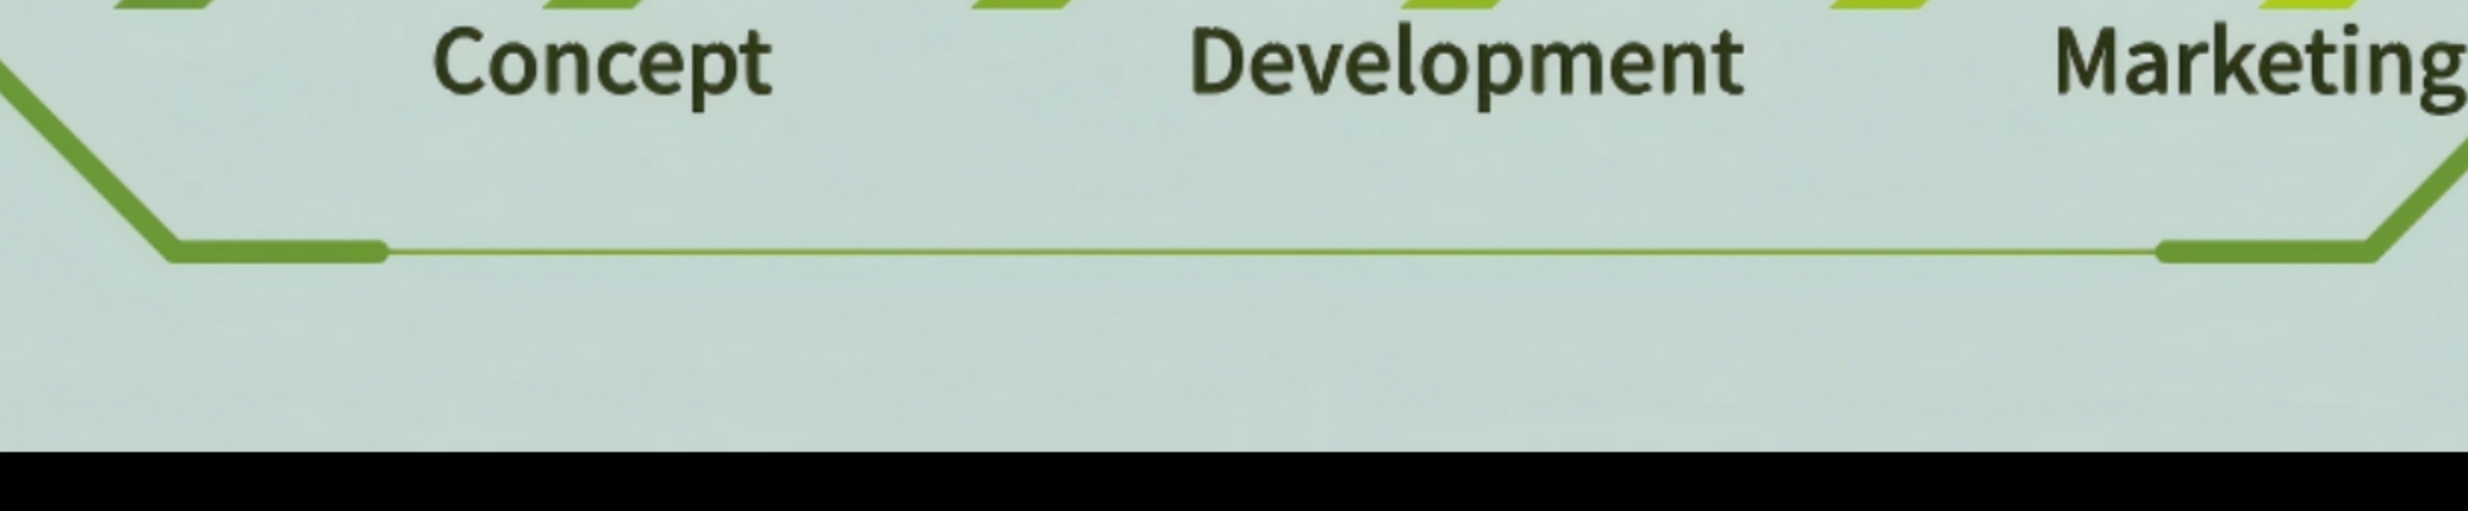

Functional Fillers

Bio-based Materials

High-value & Customized Solutions

CHEESHINE PRECIPITATED SILICA LOW-CARBON SOLUTIONS FOR GREEN TIRES

Excellent Dispersion, Ultra wear-resistant

Low resistance, Fuel efficiency

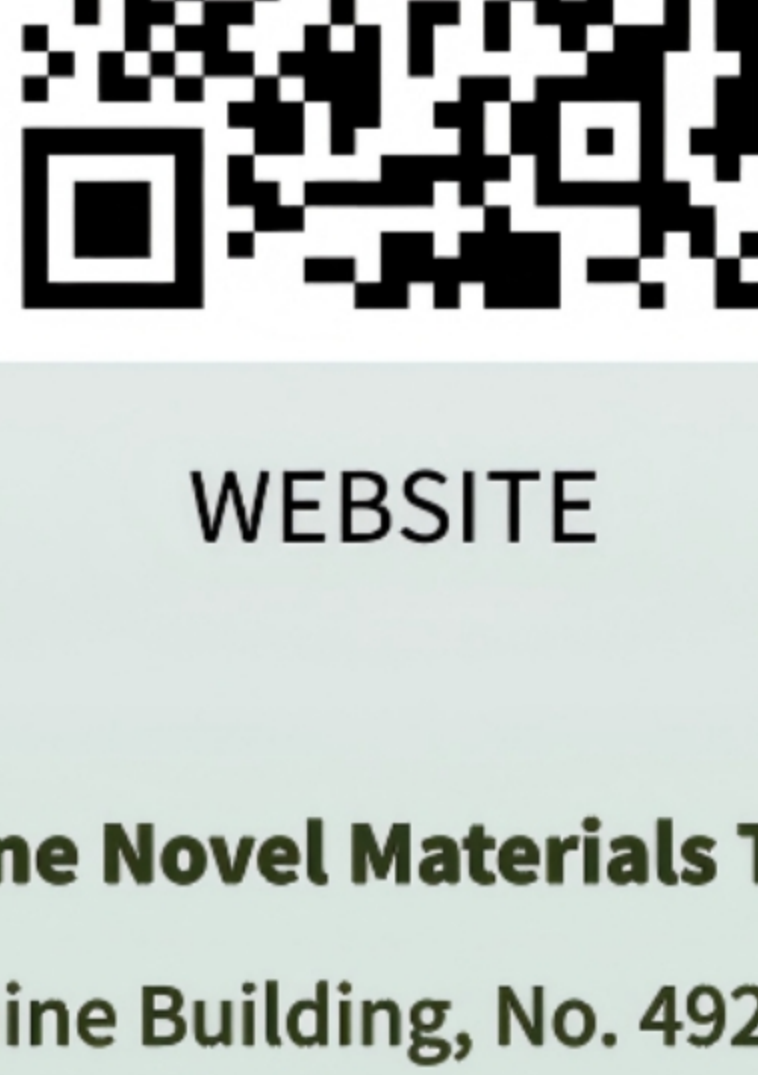

Reduced carbon, Environmentally friendly

**In-House
R&D
Production**

Superior wet grip, Reliable braking

Innovative process, Improved sustainability
